Resconable Denustry,

## Why Not Outlaw Strikes?

THE Oregon lumber strike has cost approximately \$2,000,000 to date; about equally divided between what the operators have lost in business and the workers in wages.

And what has been gained? Absolutely nothing!

At a time when business is straining night and day to make a little profit; and thousands of able bodied men are on relief because they can't get a paying job; here is the state's chief industry, being deprived of business, and men with paying jobs. abandoning them, -and presumably going on federal relief!

Could anything be more absurd, or more needlessly and crimthe present method of handling controversies between capital and term, each in serence. and labor be imagined?

> The way out seems to us so simple and so plain, that we can' for the life of us imagine why it hasn't been adopted.

WHY not have in each state a supreme court of industrial relations, and in the nation a similar court to rule over interstate disputes?

Why not treat disputes between labor and capital just as we now treat disputes between individuals, render direct action on either side illegal, and force the parties to the controversy, to go to court to settle their difference, according to what is right and just, from the standpoint of both parties and the public

IN other words, under present conditions, all strikes end sooner or later in arbitration,—in judicial action,—only such a conclusion is only reached, AFTER the harm has been done-in-

stead of before.

Why not, in the name of common sense reverse the process!

Why not settle the rights and the wrongs of the dispute, FIRST,—and then if either party refuses to peaceably abide by the court decision, such party will be in the same position as the individual who refuses to abide by a similar court decision,—he individual who refuses to abide by a similar court decision,—he individual who refuses to abide by a similar court decision,—he lightly and an aroused leaves of tightness in masseter muscles. Entered hose line the state of tightness in masseter muscles. Entered hose line the tent decision, and the manual of the court decision, such party will be in the same position as the lightness of the dispute, and the manual threshing and rolling the to the memory of your famous to to the memory of your famous to to the memory of your famous to the to memory of your famous to to the memory of your famous to the to memory of your famous to to the memory of your famous to to the memory of your famous to to the memory of your famous to the to the memory of your famous to took the memory of your famous to the to the memory of your famous to took the memory of your famous to to the memory of your famous to took the memory of your famous the to the memory of your famous the to took mexidous the to the memory of your famous the to took the memory of your famous the to took the memory of your famous the totook

the court decision, such party will be in the same position as the individual who refuses to abide by a similar court decision,—he will have the police power, the national guard, and an aroused public opinion to deal with!

Establishing labor-capital courts, just as we have established criminal and civil courts, would effectively solve the problem as we see it. Why something of the kind isn't done, remains one of the major mysteries of what we call an enlightened civilization.

## Wanted—An Entirely New Party

THE inside dope from Washington merely confirms the opinion we have had all the time, namely: that not one member on the congress out of fifty voted his honest convictions on the Patman bonns bill,

Both houses of the congress were by conviction overwhelm ingly opposed to both immediate payment of the bonus and securing it through printing press inflation. But an overwhelming majority in the House, and a slight majority in the Senate. voted for it nevertheless-voted for what they didn't believe in

Simply because they lacked the courage to vote against the S. Moris, the T-Rock, G-Mill, & well organized minority of veterans who demanded their sup-sams Valley tiller, is bearing up well under the Sales Tax of the if it wasn't granted.

In other words political blackmail and intimidation wongovernment by minorities won-as they have won for lo these many years. And as they will continue to win, unless the people of this country, as a whole, get up on their hind legs and stop it.

HOW CAN they stop it?
As we see it in only one way, and that neither an easy way, nor one likely to be adopted, until the danger of minority government, becomes more acute and far more apparent to the rank and file, than it is today.

Namely, by meeting organization with organization, fire with fire, in short by in some way making the majority vote in this country, as effective and articulate as the various and sundry minorities are. Not once in four years when a new President is to be elected, but throughout the years, and particularly when the congress is in session.

If this is NOT done, then as we see it, there is no hope of ending this abuse of the political power in this country, and Bill Isaars has been flaunting great danger, as Lord Macaulay predicted so many years ago Eate Testout rose in his cost of the destruction of our democratic form of government en-

ending this abuse of the political power in this country, and great danger, as Lord Macaulay predicted so many years ago, of the destruction of our democratic form of government entirely.

IT isn't the war veteran minority only. By no means. There is the labor minority, the farmers minority, the old age pension minority, the Coughlin and Long minorities, there are a hundred and one self interested and grasping minorities, all trying to do the same thing and in the same way, namely: get something for THEMSELVES from the government, and threat ening political reprisals if they DON'T get it!

OF course it is easy to say members of congress should not be intimidated by such threats, should defy what is nothing less than political blackmail,—should vote for their convictions and what they believe to be best for the country—ALL.

The continue our walk.\*

So that's how she feels! Tm glad. It around the neighborhood, I suppose, they'll refer to me as Signing Bull. When we get back to the landing Bull.
