

URGE TRI-COUNTY PLANNING GROUP IN DEVELOPMENT

Chairman of State Committee Confers With Chamber Officials Here—Valley Resources Seen Numerous

Organization of a regional planning commission for Jackson, Josephine and Curry counties to work out projects for federal development that would benefit the entire drainage area of Rogue river was the suggestion of Dr. P. A. Parsons, chairman of the state planning co-ordination and development committee of the state planning board, who conferred here yesterday with members of the five-year development committee of the Jackson County Chamber of Commerce.

A plan of building up industry and natural resources that would be of inestimable value to the vast country tapped by the Rogue was outlined by Dr. Parsons and met with the approval of the city and county representatives.

It is Dr. Parsons' job, he pointed out, to organize groups in each county or in regions comprising several counties, to co-operate with the state planning board in spreading a drag-net for projects that may be worked out through intelligent expenditure of federal funds. Purpose of the co-ordinated program of the county, state and federal planning boards is

to break the back of the depression, Dr. Parsons said.

In forming the tri-county board in southern Oregon, Dr. Parsons suggested that the staff be divided to include county chairmen to investigate possible development of every industry by building up a group of interested persons who would carry forward together.

The speaker said that there are more phases of industry connected with Rogue River valley than any other section of the state. Drainage area of the Rogue offers splendid mining, irrigation, recreation and sport development possibilities. He suggested that first a survey of the entire watershed be made to determine the extent and various fields of possible development.

"The state planning board and the federal government give preference to projects for the correction of pollution of streams, rural rehabilitation and similar programs," he stated. "There is chance for immediate federal aid in projects that call for breaking up areas into small farming tracts for self-support, and also in the recreational field. The government would also favor a local sustained yield forest project. Relatively small projects on a work basis are going to get first consideration."

Dr. Parsons cited as an example of the type of project that could get best possible results through regional development, the water storage project of the Big Apple district, which he said should be developed to include the entire Applegate area.

Judge Earl B. Day, with whom Dr. Parsons had earlier conferred, described the present county planning committee, which he said has been organized to include sub-committees and is functioning on a small scale very similar to the suggested tri-county plan.

Card of Thanks.

We wish to thank our friends for the kindness and sympathy during our recent bereavement. We also thank them for the beautiful flowers. —Mr. and Mrs. Chandler and Family

ARTHUR M. GEARY ATTENDS HEARING ON WATER RIGHTS

Arthur M. Geary, Portland attorney and native of Medford, was in the city Thursday, appearing in behalf of S. T. Metadown and Sam Meadows and Mr. Geary's mother, Mrs. Edward P. Geary, at a hearing conducted by W. F. Coshaw, assistant state engineer, regarding application of the Sterling Mining Co. for right to divert water from the headwaters of Griffin creek to the site of its mining operations on Sterling creek. Porter J. Neff appeared for the mining company and Mr. Geary for the protesters, who have water rights on Griffin creek. Decision will await filing of briefs.

Mr. Geary is president of the Oregon branch of the American Society for Control of Cancer and during his visit here said the educational work for cancer control "has been largely left to the cure-all remedies of quacks. But it is hoped that a continuous program of sane and up-to-date scientific education regarding cancer will be under way soon."

"The Oregon State Medical society has suggested a plan of co-operation which will enable Oregon to keep abreast of other progressive states in encouraging early diagnosis and scientific treatment of the dread disease."

"According to statistics, one out of seven persons 40 years of age is doomed to die of cancer. The American Society for the Control of Cancer is an endowed organization interested in reducing deaths from cancer." The late Dr. Edward P. Geary, father of the Portland attorney, was a pioneer physician of Medford, hence probably arises much of his son's interest in the cancer control program.

Gold Hill

GOLD HILL, June 21.—(Sp.)—Mr. and Mrs. H. R. Ingling of Medford visited with Mr. Ingling's father, J. C. Ingling here Saturday.

Mrs. Cella Edler who has been staying at the John Hayes home, left Tuesday for Union Creek where she has a position for the summer.

Miss Jeanne Hammerley returned to her home in this city Wednesday after spending several days in Medford.

Miss Mildred Smith is now staying at the McEee home in Medford.

Mrs. Dora Eddings of Eugene came Sunday for a short visit with her mother-in-law, Mrs. Minnie Eddings.

Mrs. B. E. Millsbaugh and daughter Orpha of Portland came Tuesday for an extended visit with her parents, Mr. and Mrs. Neil Doty, Sr.

Mrs. Emma Huff, Mrs. Lillie Carter, Mrs. Etta Carter, Mrs. Dora Hammerley, Mrs. Blanche Merriman, Mrs. Maude Robinson and Miss Bertha Coy were among business visitors in Medford Wednesday.

POLICE INJURED IN STREET CAR STRIKE RIOT

Sympathizers of striking organized street car employes in Omaha, Neb., rioted and looted a store there and six police were injured. The rioters smashed in the front of the store, surged in, upstair shelves and hurled groceries into the street. The sympathizers said the manager had ridden on a street car. (Associated Press Photo)

Miss Zella Smith and Miss Lois Hill of Medford spent Sunday at the home of Mr. and Mrs. T. Z. Smith.

Mrs. Blanche Merriman and Mrs. Dora Hammerley visited Tuesday in Grants Pass at the home of Mrs. Merriman's mother, Mrs. Mattie Cole.

Mr. and Mrs. Floyd Lance and daughter Ruth moved Sunday to Laurel Camp. Mr. Lance will be employed at the dredge on Graves creek.

"Pop" Tranah left Tuesday evening for Yakima, Washington where he has work.

Mr. and Mrs. George Dorman and daughter Helen will spend Sunday at Keeno.

Mrs. Ruby Quackenbush of Medford visited relatives in this city Monday.

Guy Disimini returned to his home in this city the first of the week after spending several weeks in Portland.

Chris Jorgenson spent Monday at his home in Ashland.

Miss Eugenia Quackenbush of Medford visited friends here Wednesday.

Mrs. Maude Coy Robinson expects to leave Monday for Eugene where she will attend summer school.

At the school election held Monday Chas. Kell was elected director for a term of 3 years succeeding E. T. Ham.

Mrs. Holderness was elected clerk for a one year term to succeed Miss Bertha Coy.

Mr. and Mrs. Charles Householder of Los Angeles are visiting relatives here and in other parts of the valley.

Mr. and Mrs. Earl Croft, daughters Sylvia and Nina, and Mr. and Mrs. Wm. Campbell attended Grange in Jacksonville Friday night and report a very interesting meeting.

Ed Shipley is putting up hay this week for Earl Croft.

Mrs. Nina Dusenberry and daughter Mabel, and son Lester, were employed thinning fruit last week near

talent, in the orchard where her brother, Ralph Householder, is foreman.

Mrs. J. D. Hedgepeth of Gold Hill and Mrs. C. L. Dusenberry spent Tuesday afternoon visiting Mrs. S. A. Dusenberry and family.

Mr. and Mrs. P. L. Wait, delegate from the Live Oak Grange of Rogue River, attended state Grange at McMinnville last week, and after Grange closed Friday night, motored on to Portland to visit her mother, Mrs. Eva Newton, and sister Mrs. R. Sutherland and husband Robert. They report Mrs. Newton as slowly improving from a paralytic stroke which

she suffered in April. Mr. Wait returned by bus Sunday night and Mrs. Wait Wednesday with Mrs. Milly Walker.

Dr. Charles W. Lemery was host at the last meeting of the year for the Jackson County Medical society on Wednesday evening at Hotel Medford. A large number of members attended, enjoying after the dinner, several papers and talks.

Dr. Charles A. Haines of Ashland, president was in the chair. Dr. Lemery presented a paper on "Sinus Disease" as an interesting feature of the business program.

Dr. Smith, a regular lieutenant in the United States navy, and Bob Sleeter, son of Dr. E. W. Sleeter, were the two guests present.

Dr. Harvey A. Woods and Dr. Gordon MacCracken of Ashland are planning the only gathering scheduled during the summer, which will be a picnic during July at Lathia park in Ashland.

Rebel Battleships Escape Is Foiled

HONGKONG, June 21.—(AP)—The two 87-year-old Chinese rebel cruisers which on June 17 ran through land forts' fire from Canton, tried to leave Hongkong today but were beaten back by a large modern cruiser.

Their foe was believed to be the 2300-ton Ning Hai, four years old, and one of the prize ships of the Nanking government.

The stranger fired a dozen shots before her prey turned tail and reentered British waters without firing a shot.

LINDY INVENTION KEEPS HEART AND LUNGS OPERATING

(Continued on Page Four)

heart, thyroid gland, ovaries and suprarenal glands.

In only two did infection develop, and that was in the organ before removal. Thyroid glands were kept more than 20 days with pulsating arteries and active circulation.

With the organs were removed enough surrounding tissues and arteries to enable them to function. Ovaries and thyroids grew rapidly in their artificial boxes. On ovary developed signs associated with pregnancy.

Although this work is in no sense artificial production of life, it shows that if scientists find out how to change non-living stuff into living, they can hope to maintain the life thus brought into being.

No description of Lindbergh's new pump was given. It was made this year, the last in a series which he began in 1931.

The announcement revealed that the first mechanical heart and lung Lindbergh made was described by him in 1931 in Science, without his name appearing.

At Rockefeller Institute it was said the colonel goes and comes as he pleases. His published work was done in the division of experimental surgery. The institute itself later will publish a description of his latest mechanical heart.
