

SOVIET PLANNING GREATER MOSCOW IN TEN-YEAR PLAN

Modern City to Accommodate Five Million Visioned - More Space, Better Living Conditions Aims

By JOSEPH H. BAIRD United States Staff Correspondent MOSCOW, U. S. S. R., July 11.—(UP)—A 10-year plan for reconstruction of Moscow into a modern city...

Expansion of the city will be in the direction of Lenin hills, where the United States has selected a site for its new embassy...

The plan foresees construction of 15,000,000 cubic centimeters of new living quarters, including 2500 new apartment houses...

Regarding places of historical interest, "Red Square" will be doubled in area. Facing it—on the site of the ancient "Chinese city"—will be erected a section of enormous buildings...

They are making their home on Mr. Skyrman's farm near Central Point.

WALLACE MAPPING WESTERN JOURNEY

WASHINGTON, July 11.—(AP)—Working steadily to complete the itinerary for Secretary Wallace's western trip, attached to the secretary's office today the secretary's staff...

Wallace's secretary said efforts were being made to keep plans for the trip as flexible as possible.

SOLID GASOLINE CALLED PERFECT AS MOTOR FUEL

(Continued from Page One) engine in the Guggenheim laboratories in conclusive tests.

No carburetor is used. Heat from the exhaust is applied to the fuel container and this, together with the suction from the engine, is sufficient to create a vapor which then passes directly into the intake part of the engine.

With the gasoline passing from the solid to the gaseous state—without an intermediary liquid stage—there is no possibility of getting a "wet mixture" in the combustion chamber.

With the gasoline passing from the solid to the gaseous state—without an intermediary liquid stage—there is no possibility of getting a "wet mixture" in the combustion chamber.
