cautionally complained there was something wrong with it, particularly in the crowded subway stations.

Also it has been apparent there is something foul about the atmosphere in Wall Street, especially since the new deal. All this will undoubtedly be covered by the air-pollution survey, which will give "special attention to both chemical and bacteriological impurities."

The best legal authorities here believe the Massachusetts court decision against AAA whittles down the interstate commerce clause to a railroad yardstick.

The supreme court decision in the Schechter case said that poultry was no longer in interstate commerce after it arrived at the point of destination. The Massachusetts court said cotton was not in interstate commerce until it started moving from the point of origin.

If such interpretations hold, the federal government will have jurisdiction only over products while actually in transit.

President Roosevelt and the other new dealers did not take the AAA setback very much to heart. They seem to have developed something of a persecution complex which steels them against criticism and reverses; believing they are right, they do not have much trouble convincing themselves that their adversaries are only the rich, the political opponents and the satellites of both.

Huey Long sent out a letter to his supporters recently saying the newspapers told lies about him. One of their worst, he said, was ther insinuation that he was a rich man, adding: "If I could sell everything I own, which is not much, I could not pay one-half of my debts." This is the only self-confession of bankruptcy yet made voluntarily by a politician. However, it is understood he did not send the letter to his creditors.

Rexford Tugwell's rural rehabilitation service concerns itself with trees, but outside the window of his office are two which are obviously suffering from sort of blight or tree disease.

UTILITY DIVIDENDS SPENT IN LOBBYING IS CHARGE IN QUIZ

expense on down through the operating companies and, since the parent got its income from the operating companies the user of electricity bore the ultimate cost of the anti-utility bill campaign.

Beach said he did not know what the $700,000 was charged to, but agreed the A. G. E. got its revenues from the operating companies. He added he had spent over $100,000 for telegrams to Washington protesting against the measure.

Under a rapid fire of questions, Beach insisted the records destroyed were not of an incriminating nature.

"I simply made an error in judgment," he said. "I acted too quickly."

Asked again and again whether anyone higher up gave him the order for destroying the records, Beach said the fact that O. E. Wasser, comptroller of A. G. E., at Ithaca, entered no protest when he discussed it with him was an indication his superior approved the orders.

The committee then adjourned, subject to the call of Chairman Black.

CAPITOL RAZING TOTALS $16,808

SALEM, July 19.—(AP)—Razing of the old capitol building, up to July 1, cost a total of $16,808, including both SERA and state payments, Dan Fry, secretary of the board of control, reported today.

Of this sum $8735 was paid by the SERA and $7073 paid by the state restoration fund. The latter figure included the workmen's compensation fees, hauling and materials.

Receipts from salvage materials sold was $2856 which reverts to the state, the report showed.

The blast six weeks ago in which the main walls were tumbled, cost but $236 damages. Broken windows and damage to nearby residences and Willamette university were repaired with this sum.

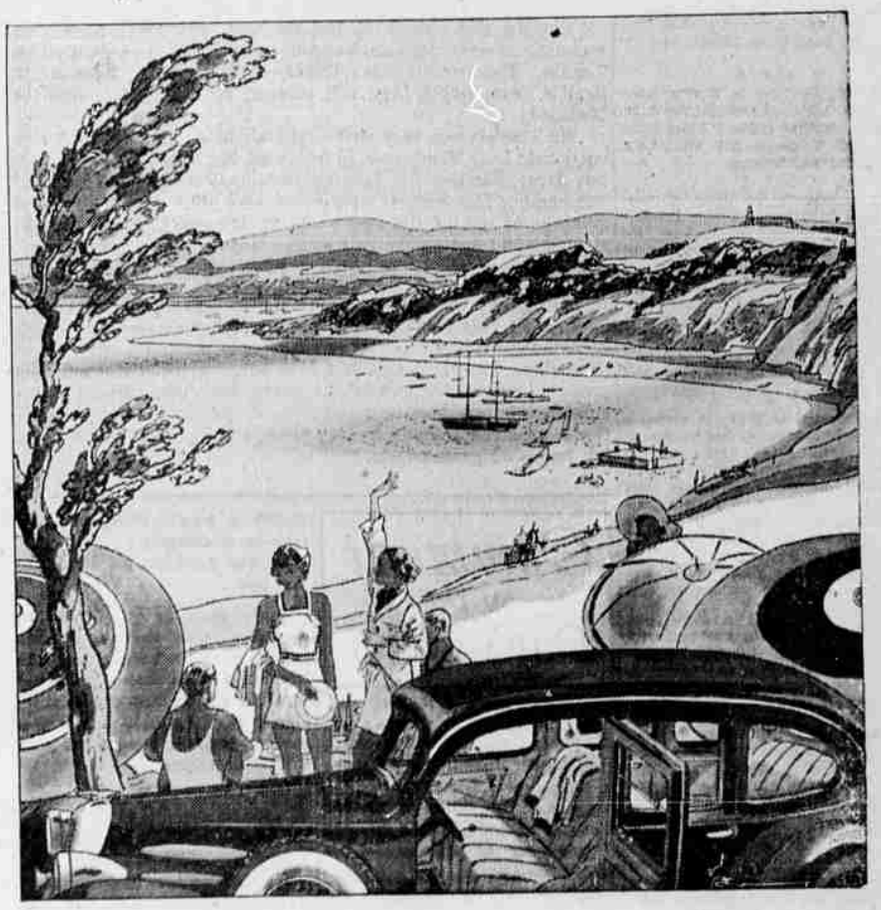
Saturday's shopping can use more gasoline

THAN SUNDAY'S LONG TRIP TO THE COUNTRY —



4 out of every 5 miles you drive *are stop-and-go*

Today's starting, shifting and accelerating waste your money —unless your gasoline has these Three Kinds of Power . . .

TO THE butcher . . . the grocer . . . the dry goods store . . . the bank . . . the druggist's! Count up and you'll find that you often make 10 stops a day.

Then, remember that a short run from a "cold" start can use up to a "mile" of gasoline.

Also, remember that rapid accelerating as you shift gears can use 33% more gasoline than steady running. To cut down this waste, you need a gasoline with 3 *different kinds of power* . . . power for quick STARTING . . . power for hard PULLING . . . power for steady RUNNING.

What's more, you need these 3 kinds of power in exactly the right proportion . . . in perfect BALANCE!

Super-Shell is the FIRST truly balanced gasoline. And so it saves you money in three important ways:

STARTING—With its even volatility, Super-Shell can save up to a cupful of gasoline on a "cold" start—even in summer, your engine is "cold" when idle.

SHIFTING—Super-Shell can save up to a cupful in 10 minutes of hard pulling, or rapid accelerating, or hill climbing.

RUNNING—With its abundant heat units, Super-Shell can save up to a cupful of gasoline in every hour of steady running, many motorists report.

This gasoline has met such great popularity that today there are over 30,000 stations to serve you from Coast to Coast. Stop at one of these stations, and start saving TODAY! See why thousands are becoming Shell "regulars."
