Published by MEDFORD PRINTING CO. 123 N. 2nd St. Phone 18. ROBERT W. RUIHL, Editor.

Subscription Rates: Daily, one year, \$10.00; Daily, six months, \$6.00; Daily, three months, \$3.50.

Official Paper of the City of Medford, Official Paper of Jackson County.

MEMBER OF THE ASSOCIATED PRESS, MEMBER OF AUDE BUREAU OF CIRCULATION.

MEMBER OF THE OREGON STATE EDITORIAL ASSOCIATION.

Ye Smudge Pot

There is the "Roosevelt School of Thought," the "Hoover School of Thought," and "The Liberal School of Thought." Then there is the well-known School-of-Trying-to-Think.

THE GAD-ABOUTS

For the first time in 23 years, Mrs. Bertha Rose—Her first, and only, pioneer resident of Eugene in her 83 years of life here was made more than half last week by Mrs. L. S. Watkins.

NOT SHAME ENOUGH FOR ALL

With customary effrontery, the Yreka semi-weekly "Doodle-Bug" appropriates, or attempts to, whatever notoriety or glory which emanates from the recent "trashing" of the Doodle-Bug.

NEW YORK DAY BY DAY

NEW YORK, Aug. 14.—The newest dog shop, decorated at a cost of \$20,000, is indicative of the exorbitant prices of the dog market.

Incredible Stupidity!

If that death sentence bill against the holding companies isn't revived and passed, it won't be the fault of the holding company officials!

The spokesmen and big wigs in this branch of the public utility business are doing everything they can to lose the few friends they have left.

Last Sunday one of them challenged President Roosevelt to make a campaign issue of the death sentence bill, and boasted 5,000,000 stockholders with 10,000,000 votes would beat F. D. R. to a frazzle.

Yesterday another, fat-jowled, bald-headed and gun-toteyed, H. C. Hopper, refused to tell an investigating committee what he made out of the holding company racket, clambered up on his high horse, and defied the senate to serve a subpoena, on such a plutocratic and exalted personage as HIMSELF!

IN the opinion of this paper, the so-called death sentence measure was needlessly extreme. The conference substitute measure promises to answer every useful service, and be entirely effective in curbing holding company ABUSES.

But if at the next session of congress, an aroused public opinion DEMANDS this death sentence bill, the leaders of the public utilities will have no one to blame but themselves.

IMAGINE a public utility executive so dumb that he would challenge the President of the United States to make an issue of the holding company racket, and boast that in such an event, he and his associates would emerge victorious.

And this utility chieftain, not denying his million dollar lobby; not denying that while his stockholders got nothing, he pulled down his two millions; not denying forged telegrams, "cigar box" gifts, and all the shenanigan and flim-flam that have been frowned upon and discredited, by all the TRUE leaders of big business in this country for nearly a generation; having the CRUST to tell the people of this country, through their representatives in congress, that they had no right to pry into his private business, his record or his methods, and he couldn't remember what his income had been since 1922!

He couldn't remember! Remembered it was about \$100,000 13 years ago, but couldn't state what it had been any single year since!

THIS paper has always believed—and still believes,—that business in this country, big or little, holding type, operating type or any other type,—is entitled to what every individual in the country is entitled to,—fair treatment and a square deal,—nothing more and nothing less.

But how can the public utility business expect fair treatment,—except anything but unfair and retaliatory treatment,—when it is under the control of such a bunch of nit wits, bunglers, and thick-necked bulls in the economic china shop, as the men who during the past few weeks have appeared as its champions and defenders.

The holding company, properly administered, we believe has a legitimate place in the modern economic set-up. But in too many instances it hasn't been properly administered.—The Insull fiasco for example. The sensible course obviously is not to destroy all holding companies,—but to reform all of them, make them behave.

BUT that will NOT be done—extinction, not reformation, will be the inevitable outcome.—UNLESS the type of character and mind now in control of this branch of the public utility business, is taken by the scruff of the neck and kicked into the middle of next week,—not by Uncle Sam but by the powers that be in the industry itself.

Many amazing things have happened in public life during the past decade. But considering the growing public resentment against the light and power utilities the most astounding single phenomenon in all this time has been the revelation during the past few weeks, that those still in control have forgotten nothing, learned nothing, are still living, economically, socially and ethically in the middle ages.—true spiritual legatees of the Jim Fisks, the Jay Goulds, and that founder of the Vanderbilt family, whose idea of public service and social responsibility was cogently expressed in that familiar phrase, "The public be damned!"

restrained masculine grief. In a traffic tie-up today, a huge limousine revealed a patriotic Union League type. A sort of Warren Harding in his pontifical prime. One hand clutched a telegram in slight convulsive twitches. But he sat up bowed, with tears oozing slightly down. It was easy to see he was suffering stoically some terrific wrench. After thought: Maybe it was tax news from Washington.

America's willingest editor is Milton Quader. Aside from editing several magazines, he writes most of the editorials, reviews the books, turns out special articles and fiction under various pseudonyms and generally manages to author one, sometimes two, full-length novels a year. He does his editing by teletype, living at Cape Cod and visiting his city office at intervals. His wife, Grace Perkins, is also a successful writer. She is a sister of the radio's Kay Perkins, another success.

Paris had a pathetic little upshot of journalism recently. A group of young correspondents suddenly beset by the suspension of the long-continued edition of an American paper, launched a quixotic and peppy little tab. It was both geeky and weakly, survived a few editions and was seen no more. There are now more than 200 stranded newspapermen from all parts of the world in Paris. They have a little club room, the management of Du Dome has set apart for them on the third floor. Another who gets a striking assignment is pledged to give 35 per cent toward sustenance of unemployed brothers.

One of the older day office buildings in the 40's is known to grifters as "Roccus Beach Tower." Its common room, tenanted by poultry, electronic film-famers—mail order electronic belts, concerns, deep breathing schools,

can use, while others by the million produced when the best they can in the twilight zone between life and death, it is not an unsober reflection on him, but a sad commentary on our social intelligence responsible for it.

Mr. Jenkins holds that Ford makes cars to use. Ford says so himself. But it would be more in keeping with the reality to say that he (or rather his employees) make cars to sell. Their use-value is unavoidably necessary.—Incidental, it is exchange-value that interests the manufacturer because through its instrumentality, he realizes the variable capital in the money form which has cost him nothing. It is axiomatic that you cannot get anything for nothing. But the profit system is squarely based on that paradox. What Mr. Jenkins fails to understand is the contradiction in capitalist production. Commodities are produced when there is a desire for them by people with money. Their buying number diminishes as the system reaches maturity—in proportion as profits cease to be profitable. Capitalism can produce use-values in great abundance but it cannot produce a moneyed public to buy its products. It can only destroy such as exists. Like the parasite that it kills, it kills that off which it lives. All the movements such as Long's, Coughlin's, Townsend's, etc., calculated to prevent its collapse, are doomed to failure! It must be supplanted by production for use.

Gold Hill, Aug. 10. Much Better, Thank You! To the Editor: Just want to express my appreciation of your editorials. They have no idea what you look like, never have I seen you, but I have known for a long time there is something "super" about you, with that keen insight into things political, and everything in general. It is a gift of God. We have read your editorials three many years and followed you over the U. S. in your travels. But your editorials last night on Mr. Hoover was the best ever. Now put this in your pipe and smoke it. "A rose to the living is more than sumptuous wreaths to the dead."

From 1850 to 1860, Waples and Hardin counties help court in the ancient cave behind Natural bridge in Tennessee.

Wages Cut, Hours Boosted by Many WASHINGTON, Aug. 14.—(AP)—NRA observers have reported to headquarters that some 12,000 to 15,000 American employees have cut wages or increased hours or both, since the old Blue Eagle met its death.

THE MARYLAND FUND is quoted in this newspaper daily. Prospectus may be secured from your investment dealer.

STOP over night at... the SAN PABLO en route to the SAN DIEGO FAIR.

THE SCAR LEFT BY OPERATION of them are more or less shady, near-dog, or without standing, on the fringes of the profession, but some of them are now and then specialists of the best standing. Here I approve and commend the method, not the man who uses it. If I know of a physician in your vicinity who is competent I am always glad to name him by private letter. But so many good doctors now use diathermy for extripation of tonsils and adenoids that I have given up trying to keep a list of them all. I feel that diathermy or electro-coagulation is now firmly established in American practice, and satisfied patients themselves are its best advocates.

QUESTIONS AND ANSWERS Footwear and Bare Feet How do shoes and stockings interfere with the discharge of waste matter from soles of the feet? Is it better to dispense with stockings whenever possible?—O. H. B. Answer—I think it is always healthful to go barefoot whenever possible, with due care about the hazard of contracting foot itch (ring worm) or dew itch (hook worm). Footwear does not interfere with discharge of waste-matter. If you are troubled with sweating feet, with or without bad odor, send stamped envelope bearing your address and ask for monograph on "Care of the Feet."

A Class A Neurotic Wish to congratulate you on your clear and helpful articles on "Neurotic." I considered myself a neurotic until you opened my eyes. (Mrs. E. H.) Answer—Fortunately there are more Class A neurotics than Class B—their fan mail on that subject is not entirely bitter. If you're a Class B neurotic, don't write. If you want to find out where you stand, send ten cents coin and a stamped envelope bearing your address, for booklet "Chronic Nervous Imposition." The question is, are you imposing on the world, and stamped envelope bearing your address and ask for monograph on "Care of the Feet."

Hold Your Fire, Citizens Shoot your neighbors' cat and dog! Take it back or I'll report you to the Humane Society. A neighbor shot my cat with a BB gun and it took the wound several months to heal. Are you a veterinarian or a medical doctor? (G. A. S.) Answer—Sorry, I did not know an air rifle would make a sound. Thought it only stung. Port Wayne concern offers a dust spray which is harmless to man, beast or shrub, yet repels cats or dogs, if shaken on flowerbeds or at base of trees or shrubs. Do not be misled by my horse laugh. I'm a doctor of Medicine. (Copyright 1935, John F. Dille Co.)

ED. Note: Persons wishing to communicate with Dr. Brady should send letter direct to Dr. William Brady, M. D., 265 El Camino, Beverly Hills, Cal.

Personal Health Service

By William Brady, M. D. Signed letters pertaining to personal health and hygiene not to disease diagnosis or treatment will be answered by Dr. Brady if a stamped self-addressed envelope is enclosed. Letters should be brief and written in ink. Owing to the large number of letters received only a few can be answered. No reply can be made to queries not conforming to instructions. Address Dr. William Brady, 265 El Camino, Beverly Hills, Cal.

THE SCAR LEFT BY OPERATION of them are more or less shady, near-dog, or without standing, on the fringes of the profession, but some of them are now and then specialists of the best standing. THE NEW DEAL, and the politicians engineering it, promised everybody everything—riches without work, security without thrift, prosperity by the simple process of passing a law.

These promises are impossible of fulfillment because they run contrary to human nature. People are beginning to find that out.

That, in this writer's judgment, is the lesson of the Rhode Island congressional election.

SOME things are fundamental. Water, for example, won't run uphill of its own accord. Daylight follows darkness. When you drop a rock off the roof of your house, it falls DOWN, not up.

Everybody, by EXPERIENCE, knows these things to be true.

THERE are other things that are equally true. Here are some of them:

There is no such thing as something for nothing. You can't spend yourself rich. Wealth is created by the application of labor to natural resources. You can't share what isn't produced.

There is ample proof, over centuries of human experience, that these things are true, but from generation to generation people FORGET that they are true and listen hopefully to demagogues and impractical dreamers who ASSERT that they are true.

Among the New Dealers are both demagogues and practical dreamers.

PEOPLE have listened to the New Deal promises of something for nothing, of wealth without labor, of sharing what isn't produced, hoping against hope that this time they MIGHT be true.

They are beginning to find out by the sad experience that they aren't true and CAN'T be true.

The reaction to that experience is beginning to set in.

Senate Will Let Coal Bill Slide WASHINGTON, Aug. 14.—(AP)—A high Democratic house leader said today he had been informed that the senate was preparing to adjourn without acting on the Guffey coal stabilization bill.

Comment on the Day's News

By FRANK JENKINS A STRAW IN THE WIND: Voters of the first congressional district of Rhode Island elect a REPUBLICAN to fill a vacant seat in the national house of representatives formerly held by a DEMOCRAT.

THIS paragraph from an Associated Press dispatch tells the story: "With Roosevelt policies directly at issue, Charles F. Risk, a former judge, was swept to victory by a margin of more than 10,000 votes over Democratic State Treasurer Antonio Prince. Risk had campaigned on a platform of 'Repeal the Roosevelt administration.'"

FROM Washington, center of all politics, comes this statement from Senator Hastings, chairman of the REPUBLICAN senatorial campaign committee: "The election in Rhode Island shows that when the American people find that American principles and American liberties are in danger, they stand ready to crush those who are responsible for putting them in a dangerous position."

THAT is partisan political comment, designed to influence voters. It isn't literally true. A more accurate statement would run something like this: "When the American people have been promised things that are impossible for ANYBODY to perform, they are pretty sure to go sour on the promiser when they find they have been misled."

THE New Deal, and the politicians engineering it, promised everybody everything—riches without work, security without thrift, prosperity by the simple process of passing a law.

These promises are impossible of fulfillment because they run contrary to human nature. People are beginning to find that out.

That, in this writer's judgment, is the lesson of the Rhode Island congressional election.

SOME things are fundamental. Water, for example, won't run uphill of its own accord. Daylight follows darkness. When you drop a rock off the roof of your house, it falls DOWN, not up.

Everybody, by EXPERIENCE, knows these things to be true.

THERE are other things that are equally true. Here are some of them:

Flight 'o Time

Medford and Jackson County history from the files of the Mail Tribune 10 and 20 Years Ago.

TEN YEARS AGO TODAY August 14, 1925 (It was Friday) The breeze of last night blew all the smoke from forest fires away and the air is clear, and the foothills visible once more.

G. A. Pogg, a fruit picker, was fined \$15 on his plea of guilty in Judge Taylor's court yesterday to a charge of unlawfully crossing a horse and buggy on the Pacific highway. State traffic officer, J. J. McMahon, was the complaining officer.

The Crater Lake highway in the national park was gone over with a scraper and is in fine condition for travel.

A fire near Imnaha in the Prospect district is still beyond control, and rapidly making its way into green timber.

Governor Pierce will be guest of Jackson county grangers at meeting to be held at Rogue River tomorrow.

There is no trace of James Wilcox, Ellsworth Kelly, and James Murray who escaped from the state prison at Salem in a break that cost the life of "Oregon" Jones.

Twenty Years Ago Today August 14, 1915 (It was Saturday) German drive on eastern front to cut Russian army in two continued, with Russian fighting desperately between retreats.

John Austin Hooper, Polson prison life term, held in the Josephine county jail at Grants Pass for robbery of bank of Rogue River, ties up the sheriff and escapes.

Forest fire rages on Foots creek. The seventh company will occupy the entire second floor of the Amy & Pottenger building on Main street as an armory.

The Elks Temple will be dedicated September 23, with many updates Elks in attendance.

Owing to the county fair being held the first week in September, the opening of the public schools has been postponed until September 13.

SUNNY SPRINGS Straight Whiskey at a LOW PRICE \$1.15 60c PINT
