

GOLD HILL FARM PRODUCE CANNED IN OWN FACTORY

C. C. Harding Will Put Up 10,000 Cans This Year for Trade—Business Developed Within 3 Years

GOLD HILL, Sept. 13.—(Sp.)—Gold Hill has a real canner. The enterprise is located three miles from the city at the C. C. Harding ranch on the highway west of town. The cannery puts up produce in regulation commercial tins under the Rogus River brand, and Mr. Harding is developing a good market for the produce.

A little over two years ago Mr. and Mrs. Harding and son moved to the place they are now working, located just west of the Chas. Gray place. The acreage was then undeveloped. They started in raising vegetables and fruits and canning their own produce. That year they put up 2,500 cans, bringing it to 4,000 cans. And this year they plan to put up around 10,000 cans—all raised on their own place which consists of five acres of real land in the Gold Hill irrigation district.

They have processed 2,500 cans of Golden Bantam corn, whole kernel, and it tastes just like roasting ears from the garden. They have also put up 1,000 cans of beans, about 500 of peas, and there will be about four to five thousand of tomatoes.

The Hardings do all their work by hand, and handle the produce as it ripens, and in taking it in small quantities it is packed at its best, which is not always true of canneries working in wholesale lots.

Mr. Harding is getting fruit started on his ranch also. From 42 young-berry plants this year he picked 43 crates of berries and he has a number of peach trees that will bear next year. These will all be canned.

Mr. Harding is marketing his foods with local grocers, and is a great booster for home industry.

W. G. Howes, who has the five-acre tract adjoining the Harding place, has also done remarkably well with his land in about the same period of time. Hardly a morning goes by but what he brings a load of fresh produce to town for the local grocers.

Both Mr. Howes and Mr. Harding are very interested in the fair to be held here next week and plan exhibits of their products.

PORT ORFORD DOCK TO GET LUMBER BUSINESS

PORT ORFORD, Sept. 13.—(Sp.)—Gilbert E. Gable, president of six companies developing the harbor of Port Orford and engaged in milling and other wide-scale operations, today announced that the new dock recently built here will handle the output of 19 sawmills. The mills are all in Curry county in the region between Langlois and Gold Beach. They have a daily capacity of from 10,000 to 40,000 feet each.

Mr. Gable announced that arrangements had been completed for financing the lumber movement from the time the lumber is delivered to the dock here.

SIXTEEN INJURED IN BUS, AUTO COLLISION

PORTLAND, Sept. 13.—(P)—Sixteen persons were injured, seven so badly as to require hospitalization, when a motor bus and a private automobile crashed on a street here last night.

All windows in the bus were shattered and the front end was demolished. The driver of the other car was Bob C. Edmunds, 15, one of the injured. Witnesses told police he failed to stop at a through street.

EQUALIZATION BOARD COMPLETES FINDINGS

The county board of equalization, composed of the assessor, county clerk and county judge, completed consideration of applications for cuts in assessed valuation on property in the county, and the report is now being prepared by the county clerk.

Assessor Coleman said a number of the protests had been granted, principally on land where it was shown the valuation was too high.

ARTISTIC GARBAGE CAN BOASTS MIRROR IN TOP

CHICAGO, Sept. 13.—(UP)—The park commissioner's search for an artistic refuse can was answered today from York, Eng., by a seeker for the \$100 prize who suggested mirrors be placed on the top of each "litter basket" to encourage tidiness.

Rapid Growth Amazing. SAINT JOHN, N. B.—(UP)—Saint John customs house officials have an unidentified plant that is growing so fast that they don't know what to do with it. The plant sprouted beside a cactus plant in a pot on the window sill, but it grew so fast it had to be transplanted to a pot of its own. Today it towers 11 feet above the floor.

F. W. Berthelt, Medford's Taxidermist and furrier, will open shop 49 So. Central, Sept. 14th.

Meteorological Report

September 13, 1935

GOLD HILL SCHOOL ENROLLMENT 222

GOLD HILL, Sept. 12.—(Sp.)—Gold Hill school bells called 222 pupils to their studies this year, when school officially opened here Monday, September 9.

Enrollment this year shows a decrease of nine pupils, with the total registration being 222 students this year, compared with 231 who enrolled the first week last year.

It is expected that the number will be a little larger as the season progresses, as several families are unsettled, due to work in the fruit harvest. However, it will probably not exceed last year's registration figures, as the 1934 fall enrollment took a big jump over previous years: an increase of 24 being shown the first week, which is a substantial gain for a district this size.

No definite day next week has been set for the start of the sawmill of the Medford Corporation (Owen-Oregon company), Manager James H. Owen said today. He said it depended largely on the amount of logs in the mill-pond, now arriving at the rate of two trains daily. Crows have been selected for all departments. It will probably be a week after the starting day before the mill reaches full capacity.

HIT ROOT BORERS NOW WITH 'P.D.B.' IS AGENTS ADVICE

Peach, prune and apricot growers who wish to protect their trees from injury by root borers should apply paradichlorobenzene (PDB) now according to C. B. Cordy, assistant county agent.

These insects burrow around under the bark at the base of the tree. In severe cases they may girdle and kill the tree. Their presence is indicated by lumps of gum at the base of the tree. Excellent control can be obtained by the use of paradichlorobenzene provided the soil is dry when it is applied and remains dry for at least ten days. These conditions require that the application be made soon.

The soil surface at the base of the tree should be leveled off without disturbing the soil beneath the surface. Large masses of gum on the trunk should be removed. The PDB should be carefully spread in a narrow circle around the base of the tree about two inches from the trunk. Fine dirt should be mounded up over it and tightly packed.

Three fourths to one ounce is sufficient to treat a tree six years of age or older. Younger trees should have one half ounce. It is well to tear down the mounds a month or six weeks after application to prevent any possible injury, especially on young trees. Further information can be obtained from the county agent's office.

VETERAN RELIEVED OF CONSTIPATION BY NATURAL FOOD

Kellogg's ALL-BRAN Corrects His Condition

Here is an interesting, unsolicited letter: "I have used Kellogg's ALL-BRAN for about 4 years, and find it a wonderful relief for constipation." While in Government Service in the P. I., I contracted constipation in 1898-99.

"I consider your ALL-BRAN in terms of millions, instead of the cost of a box of pills, for it surely has saved me. I eat ALL-BRAN every morning."—F. L. Wylie, Visalia, Calif.

Research shows Kellogg's All-Bran supplies gentle "bulk" to aid regular habits. All-Bran is also rich in vitamin B, and iron.

All-Bran is a delicious laxative food... far better than patent medicines. Two tablespoons daily are usually sufficient. If not relieved this way, see your doctor.
