# MISSING MOMENTS

When your partner lays down her hand and you see that trumps are missing, there's going to be something missing in your score.

WHEN there's something missing in the flavor of your coffee, it won't fulfill its contract in the cup.

Perhaps you have been drinking such coffee in your home. Perhaps your family is complaining about it. And you really can't blame them—for nothing can take the place of flavor in coffee.

If the coffee you are using appears in the cup with something missing in flavor, it's because something was overlooked in the blend, roast, grind and pack of that coffee. Since no coffee-making technique can supply the missing flavor, the thing to do is change to Hills Bros. Coffee. It is a never-changing BLEND of the finest coffees grown. This blend is roasted by an exclusive process—CONTROLLED ROASTING—that insures uniform flavor in every pound. This rich, matchless flavor is completely protected by Hills Bros.' VACUUM PACK. And the GRIND of Hills Bros. Coffee gives perfect results in any coffee-making utensil.

It takes mild ripe tobacco to make a good cigarette.

During the year ending June 30, 1900, the Government collected from cigarette taxes \$3,969,191

For the year ending June 30, 1934, the same taxes were \$350,299,442 an increase of 8725%—a lot of money.

Cigarettes give a lot of pleasure to a lot of people.

More cigarettes are smoked today because more people know about them—they are better advertised. But the main reason for the increase is that they are made better—made of better tobaccos; then again the tobaccos are blended—a blend of Domestic and Turkish tobaccos. Chesterfield is made of mild, ripe tobaccos. Everything that science knows about is used in making it a milder and better-tasting cigarette. We believe you will enjoy them.
