## MINISTERS OBJECT TO LIQUOR FUNDS BUILDING CAPITOL

Valley Association, Meeting in Grants Pass, Votes to Inform Governor of Objection and Amazement

Rogue River Valley Ministers' association met last Monday morning and afternoon, including a fellowship dinner, in the Grants Pass Baptist church. The Rev. James Morgan of the Ashland Christian church addressed the ministers in the morning on "What Christ Thinks of Us."

Rev. Dr. John Haman of the Grants Pass Presbyterian church presided at the dinner fellowship program. Rev. R. S. Peterson invited the association to meet November 25 in the Medford Presbyterian church.

On motion by Dr. Haman of Grants Pass and seconded by the Rev. Mr. Cohen of the Grants Pass Methodist church, it was decided that the association express to Governor Martin its amazement at the state legislature that proceeds from the liquor business should be used for the erection of the new capitol building, this information to be transmitted to the governor in a signed statement by the president and secretary of the association, the Rev. D. E. Nourse of the Ashland Congregational church and G. F. Keble of the Zion Lutheran church, Medford, and that this action be published in the local newspapers.

Principal business of the meeting, for which representatives of the Josephine and Jackson County Sunday School associations had been specially invited, was consideration of forming a co-operative organization of the churches of the Rogue River valley for spiritual advancement. Discussion of this subject was led by Rev. R. S. Peterson. The association took action for appointment of a commission to study the subject and draw up a plan for organization of a Rogue River valley council of churches, and report back to the association. The chair appointed as clerical members on this commission, Rev. R. S. Peterson, C. E. B. Dunham and J. B. Cohen. These three to select three laymen to act with them on this commission from nominees by the Ashland, Medford and Grants Pass Ministers' associations.

The association also decided that protests should be made against liquor advertisements over KMEM and other radio stations in the state.

## THOUSANDS FLEE HOMES IN EARLY MORNING SCARE

(Continued From Page One.)

is reckoned, but to the earth, thousands of years ago but a geological second.

"Since the great glacier that once covered all this region retreated, there have been many upsurges. Just north of here along the New York-New Jersey state line, there has been a rise of 100 feet; around Albany the surface is now about 400 feet higher; and at Quebec it is 1000 feet."

Other earthquake experts throughout the east agreed with Dr. Beeda's analysis of the disturbances that awakened, among others, President Roosevelt at his Hyde Park, N. Y., home, almost in the center of the affected zone.

The quake shook the hospital home of the Dionne quintuplets enough to waken the nurses and send them hurrying to the famous babies, but all was quiet in the five cots. The youngsters slept soundly.

At Niagara Falls, the sharp shock felt around the countryside caused a close inspection to be made of the falls, but there apparently was no damage.

Inspectors found cracks extending from the 10th to the 13th floors in the limestone walls of the two-year-old federal building at Boston, but had not determined definitely whether the earthquake caused them. A

further examination was planned. Woman Hysterical

Mrs. John Patterson of Corvallis, N. Y., required medical attention because of fright. She thought the rattling doors was burglars.

A 15-foot hole was torn in the wall of a brick structure occupied by an electrical supply house at Cortland, N. Y., when the tremors shook loose a rack of heavy pipe that fell against the wall.

Thousands of persons fled from their homes, many of them in night clothes, as they feared a temblor such as wrought havoc at Helena, Mont.

The quake apparently centered in Canada, a short distance north of Lake Ontario. It caused the most excitement in populous upstate New York, where from Albany to Buffalo sturdy buildings were swayed.

Wide Area Shaken

Swinging mirrors and clattering dishes were reported from the Bay of Fundy to Lake Michigan, from Canada's capital to the District of Columbia.

As far south as Washington, Larrabee Sinclair, transportation assistant to Secretary Roper, was thrown from his bed.

The tremors—there were two major ones scant minutes apart—completed a triangle of earthquakes on the continent.

Two men were killed in Helena yesterday by shocks which rocked a 500-mile area in western United States and Canada. Far south in Honduras, quakes added to the horror of floods.

Seismologists expressed the belief that the widespread disturbances were merely coincidental.

Dr. L. C. Conant, director of the Cornell university seismological station, said the first shock reached Ithaca, N. Y., at 1:04:34 a. m. (E. S. T.), and the main shock hit at 1:06, lasting 30 seconds.

Worst in History

"It was the worst earthquake we

have ever had here," he said. "It was much worse than the one in 1925."

The populace agreed with him. Frank Orrell of the Dominion meteorological bureau in Toronto, Ont., described the quake as the worst he had ever felt there.

"North of the St. Lawrence river," he said, "there is a fault in the structure of the earth and that seems to be the most likely spot for it to be centered."

Dr. Conant and the Rev. Joseph J. Lynch, head of the physics department at Fordham university, agreed that the St. Lawrence fault was a likely offender.

17 States Feel Shock

The states which reported feeling the tremors were: Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Ohio, West Virginia, Indiana, Michigan, Illinois and Wisconsin.

The District of Columbia and the province of New Brunswick Ontario and Quebec were affected.

Telephone service was broken in central Ottawa and Hamilton, Ont., and between Rome and other cities in New York.

An occasional cracked wall, a few bricks tumbled from chimneys and some broken china apparently completed the damage.

But easterners have never become accustomed to earthquakes, and nerves suffered more than inanimate objects.

## ECCLESIA CHOIR IN CONCERT PROVIDES RARE MUSIC TREAT

The Ecclesia choir of southern California which appeared in concert at the First Presbyterian church Wednesday night was greeted by a large and appreciative audience. The program was composed of early cathedral music arranged for mixed chorus. The 21 members of the chorus were costumed in flowing robes typical of the middle ages. The music was of that delightful quality seldom heard—pure in melody, well-constructed as to form and quaint in harmony.

If America is to be a musical nation, it is impossible to over-estimate the importance of group work of every kind and this organization under its leader, Elton Menno Roth, is bringing to the people enjoyment and culture through their programs.

While in town they were entertained in various homes. Their schedule included concerts at the S. O. Normal, Roseburg and the University of Oregon where they sing Sunday at the school of music.

By Mrs. E. E. Gore

of police headquarters, the car forced them to the curb and two men with revolvers stepped out. "Give us another chance," Samonsky and Israel begged, "we'll stay out of Brownsville." The detectives looked up the relieved pair on vagrancy charges. Behind bars, they said, "we're safe from being knocked off now."
