

**ITALY TO ENTER
NEW DISCUSSION
OF PEACE TERMS**

(Continued From Page One.)

hanging over his head, Premier Mussolini was even ready to consider withdrawing from such border conquests as his armies have made in Ethiopia; but this was not borne out in the unofficial statement of his spokesman at Geneva, who said:

"Any peace terms, to be acceptable to us, must recognize first our security needs and second our expansionist requirements. That means the actual territory so desperately needed for the expansion of our people."

A Jesuit publication in Rome, Civiltà Cattolica, suggested an Italian mandate over Ethiopia would be a proper solution. There was nothing whatever to substantiate any belief that Civiltà Cattolica was speaking for the head of the church.

Both the Italians at home and the Italians bearing arms in Africa have advised Mussolini that they are ready, if necessary, to "tighten their belt" if sanctions cut off supplies of foodstuffs and materials needed.

Bitter toward England
There is an unconcealed and increasing hostility in Italy toward England.

That the menace of the war spreading to Europe was far more dangerous than the actual fighting to date in Ethiopia was indicated in an official announcement in Rome today that only one Italian officer and four Italian enlisted men had "died in combat" in Ethiopia. The death list was exclusive of native soldiers fighting for Italy.

Emperor Haile Selassie has repeatedly stated the casualties among the soldiers to date have been negligible, and there have been no conflicts at arms of any significance.

But the maintenance in the Mediterranean of England's grand fleet despite Italian objections affords a definite cause for alarm among the nations at Geneva which are committed to united action against Italy but which, in the final analysis, must look to England and France to swing the big stick, if the time to swing it should come.

Emperor Haile Selassie now has all his armies raised to their full war strength. He indicated it at Addis Ababa today when he turned down the application of thousands of his subjects for war service. He explained that his armies already were overmanned. When the volunteers heard this, many wept.
