

### BREW FIRM HERE TO SPEND \$10,000 ON ENLARGEMENT

A \$10,000 addition is to be made to the Southern Oregon Brewing company's plant on North Fir street to take care of expansion in sales, the Mail Tribune learned today.

The added plant will double the company's output of beer and the sales area, which now extends from Salem to Redding, Cal., will be increased, according to Max GeBauer, vice president of the company. The addition will also mean a larger payroll.

To pave the way for the addition it is considered necessary to change the zoning classifications and a public hearing on the company's application for such a change will be held before the planning commission Tuesday night at city hall.

**Own Whole Block**  
With the Gold Seal Creamery the brewing company owns the entire block between Fir, Grape, Third and Fourth streets, these two companies at present being the sole occupants of the property. The block, however, is divided in half between an apartment or class 2 district and a light industrial or class 4 district and the planning commission will be asked to make the entire block come within the latter classification.

Upon reaching a conclusion the planning commission will make its recommendation to the city council which also will meet Tuesday night in regular monthly session.

**Makes Rogue Lager**  
Preliminary work has already been started on the addition which will extend from the rear of the present plant toward Grape street. The addition will be 40 by 45 feet. The new plant is to be completed in 60 days. When the addition is completed the company's aging tanks will have a capacity of 1,600,000 ten-cent glasses of beer, Mr. GeBauer said.

The Southern Oregon Brewing com-

pany manufactures Rogue Lager. The company is relatively new, its product having been placed on the market October 28, 1934. It is the only brewing plant between Sacramento, Cal., and Salem.
