

GAINS BY TREATY OUTWEIGH LOSSES IS WALLACE VIEW

Agriculture Secretary Welcomes Constructive Criticism—Would Undo Harm of the Smoot-Hawley Act

CHICAGO, Dec. 11.—(AP)—Secretary of Agriculture Henry A. Wallace offered his "considered judgment" today that American agricultural gains from the Canadian reciprocal trade treaty "so far outweigh the losses that the net advantage to our agriculture as a whole is very much worth while."

He welcomed constructive criticism, in an address prepared for delivery at the 17th annual American Farm Bureau Federation convention, but declared:

"The other kind of attack—the bitter, venomous kind—is not inspired by any desire to help the farmers of this country. I believe that such unbridled assaults are inspired rather by the same interests which have fought every attempt by the farmers to gain economic fair play."

The agreement, he said, "attempts to undo the terrific damage done by the Smoot-Hawley act." Under that tariff act, he said, agricultural exports from the United States to Canada shrank from \$100,000,000 annually to \$46,000,000.

Of American concessions to Canada on agricultural products, he said that "in none of these cases are imports in prospect that will have materially adverse effects upon American producers."

Canadian concessions on meats and meat products duties, he said, will open the way "for our farmers to get back a bigger share of the British pork market."

"The new agreement will permit American pork to go to Canada to replace pork exported from Great Britain, thus in effect permitting increased exports of American pork to Great Britain."

He claimed important benefits to fruit and vegetable growers through Canadian concessions and said there would be substantial gains for United States grain growers.

Growers Will Gain
"Farmers of the United States will

UNQUESTIONABLY GAIN FROM THE INCREASED EXPORTATION OF MANUFACTURED PRODUCTS TO CANADA," HE SAID.

"Suppose that exports of these products are increased by \$300,000,000—a conservative figure in view of our trade with Canada in the past—and that half of this amount, or \$150,000,000, goes into payrolls.

"This would mean definite and substantial gains in the cash income of farmers. Studies have shown that in the past an increase of \$150,000,000 in United States factory payrolls added from four to six million dollars to the income of farmers in each of such states as Illinois, Wisconsin, Minnesota, Nebraska, Missouri, Iowa and Ohio.

"Agriculture's real and continuing problem is not how to stop the little trickle of competing farm imports, but how to move its own great surpluses into export."

Expansion of warehouse and yard facilities at the local plant of the General Petroleum corporation to take care of actual and anticipated increases in sales of the company's products in this area has just been completed, according to T. M. Higgins, district manager for the firm.

Warehouse space has been increased by 70 percent while the yard space is now 100 percent larger than formerly, Higgins says.

"The General Petroleum Corporation has a great deal of confidence in the future of this area," said Higgins. "Public acceptance of Mobilgas and Mobiloil and other of our products is already very gratifying and we anticipate even larger increases in business in the near future."

Kirkpatrick Grows Freak Sunflower

A sunflower with ambition to be a four-leaf clover, is a freak of nature found by Mr. and Mrs. P. J. Kirkpatrick on their place near the Oak Grove school on the Jacksonville highway.

The sunflower, which was left on display at the Mail Tribune office, measures nine inches across the top of the "petals" in a perfect replica on large scale of a four-leaf clover. The illusion being heightened by a coat of green paint applied by Mr. Kirkpatrick.

RULE BY ENGLAND RAPPED BY INDIAN IN ROTARIAN TALK

Under British domination India has enjoyed material advantages but it has paid a high price for the benefits, the Rotary club was told at its meeting-luncheon at the Hotel Medford yesterday by Mohan V. Raj, Bombay lecturer who is touring the west prior to his departure for his homeland where he plans to publish a farm journal in an effort to modernize agricultural methods.

Mr. Raj painted a vivid picture of labor conditions in India under which the "untouchables" work for British interests for two cents a day. He also asserted that out of every railroad dollar earned in India 90 cents goes into English pockets.

The lecturer sketched the social conditions existing in India, the caste system, farm conditions and customs and the unequal distribution of wealth which he said is concentrated in the hands of the rulers. He declared that one maharajah had 300 wives and 600 automobiles.

Clyde Eakin told the club of his visit with the San Francisco Rotary club during his recent visit in California.

The following students are in the cast: Joyce Young, Simon Pappé, Libby Hamilton, Richard Jewett, James Fleischer, Roberta Pankey, Harold Stager, Esther Lathrop, Kenneth Hood, Donald Niedermeier, Janice Nealen and Donald Smith.

Wild Turkeys Are Pest To Farmers

ROSEBURG, Ore., Dec. 11.—(AP)—On the word of farmers of western Douglas county, wild turkeys are becoming a pest. The seven released in the Olalla district two years ago have become 48, they told the state game commission, and food-stealing is becoming too regular. The commission

informed the farmers the birds would be trapped and moved elsewhere.
