

NAZIS REBUILDING GERMAN CENTERS; RAZE LANDMARKS

Historic Section Of 'Old Berlin' Levelled—Munich Gets Big Opera House—Hamburg Slums Cleared.

BERLIN (UP)—Hitler, Goering, Goebbels and other German ministers for some time have been busy ceremoniously opening new public buildings in all parts of Germany. In their speeches they invariably stress that the "Third Reich" is going to have "a new face."

Building trade has recovered from the slump affecting it during the depression years. Barracks and public buildings are being constructed by the hundreds throughout the Reich. In every corner of the country there are numerous buildings, like "House of Aviators," "House of Mechanics," "House of Peasants," "House of the People," "House of Merchants," "House of Jurists," "House of Physicians," "House of the Youth." These and similar buildings all serve administrative purposes.

This, however, represents only a small fraction of the large scale building program going on in Berlin, Hamburg, Munich and other towns.

"Old Berlin" Fades
In the capital, a great part of the oldest and most historical section of "Old Berlin," between the Imperial Castle and the City Hall, has been demolished. Centuries old houses disappeared, and the Berliners no longer can trace the many famous spots as vividly described in old chronicles. The ancient Berlin had to give way to the new head office of the largest German savings bank and to the new gigantic Reichbank building.

Another old part of Berlin, adjoining the section just pulled down, will be broken up within the next few weeks. Among the buildings affected is the famous "Palais Ephraim," one of the most beautiful houses of the age of Frederick the Great. This house, however, is not going to be demolished, but will remain a museum of cultural life in the 18th century.

Also the traditional Wilhelmstrasse changed. Goering broke with the "Frederician style" in which most government offices were built in Wilhelmstrasse during the last two centuries. His new air ministry presents itself in up-to-date style. With more than 2,500 rooms, this youngest government department is by far the largest of all ministries.

Residential Areas Go
Workmen are also busy in the outskirts of Berlin. Many quiet parts have ceased to be purely residential districts.

At the same time, most of the theaters have been modernized and enlarged, as well as some of the museums.

The Olympic Games scheduled for next summer, also involve a building program of their own. The Grunewald, favorite picnic center, was "attacked" by wood-cutters.

In the northern part of Berlin, Nazi architects rebuilt the "Lebknecht Haus," up to January, 1933, the headquarters of the Communist party, changing its name to "Horst Weesel Haus."

Slum Clearance Lags
In the poorer districts of Berlin, however, slum clearance has not played as prominent a part with Nazi town planners as in other German cities, especially in Hamburg.
Between 1925 and 1927 Germany's largest blocks of offices—the "Bau-Haus" and the "Chile-Haus"—were built in Hamburg after demolishing a part of the "Gaengeviertel." Another large section of the slums, known as "Gaengeviertel," however, remained unchanged. Nazis plan to raze it. Hamburg thus is due to gain greatly because the "Gaengeviertel" undoubtedly contained Germany's most deplorable slums. The whole section for more than three centuries had been not only the home of the poorest, but also the most notorious

hiding place of the underworld. Alongside the river Alster in Hamburg's representative street, the Harvestehuderweg, the rich Hanseatic merchants during the prosperity of Germany's overseas trade in the last century had their luxurious private houses built. During the second and third decades of this century, however, their riches dwindled and almost every estate was "for sale" or "to let." These houses have now almost entirely disappeared.

Nazi officials had the houses rebuilt and are now using them for administrative purposes.

Munich Gains Beauty
Another big center of the Nazis' building program is Munich. The famous "Brown House" has long proved too small for accommodating the party's headquarters. Recently Hitler opened the new party headquarters situated in Koenigsplatz.

Although this new center of party politics has just been completed, it has been announced that another administration building would be built at once.
The Bavarian capital, known as the "City of Beer and Art," further adds to its fame by building a second opera house. According to a high Nazi official, Munich's new opera will be the largest and most splendid one in the world.

Munich already possesses the country's largest museum, the famous "Deutsches Museum." A larger one still, a "Museum of National-Socialist Weltanschauung" will now be built in Munich.

MILE-DEEP HOLE SUNK FOR GOLD AT NOTED MINE

DEADWOOD, S. D.—(UP)—Gold is luring men deeper into the ground as this famous mining region, home of the fabulous Homestake mine, continues to expand.

New mills are being built. New properties are opening and new companies are organizing. Gold production is increasing. In 1934 the value of gold mined in South Dakota was \$10,980,838 and mining experts are agreed that this will be surpassed when 1935 figures are available.

The Homestake is leading the drive for mineral wealth, with its new Ross shaft that eventually will sink a mile into the ore-bearing earth. Above ground a new hydro-electric plant and assay office have been erected.

Gold has revived the ghost town of Rockford where three mills are being built and two mines are expected to be producing ore soon.

Two miles from here new interests have acquired the Capitol Hill mine where a new ore vein recently was discovered. Ten miles away the Maitland mine successfully has worked out a treatment of blue ores and is now employing 70 men.
Other minerals are also abating in the mining boom.
Columbite is being shipped from Pringle and the Keystone is producing feldspar, they reported.
This area is also aiding in the production of flares, fireworks, batteries and medicines with its output of spodumene from the Beta mine at Keystone. It's content of lithium ore is said to be the largest in the world.
Bentonite is attracting capital to the edge of the Black Hills where a new mill has been built and two others are under construction.

THREE SISTERS SLATED FOR PRIMITIVE REGION
EUGENE, Ore., Jan. 31.—(AP)—P. A. Thompson, supervisor of the Willamette national forest, said it is probable the federal government will approve a proposal to maintain the Three Sisters mountain area in its primitive state. Such a ruling would bar all development from the 190,000 acre tract.

STRATO PICTURES SHOW CURVATURE ON WIDE HORIZON

Rivers Appear As Delicate Tracery From 72,395 Feet Up—Farms and Fields Like Checkerboard

WASHINGTON, D. C.—(Sp) — Striking pictures from high in the stratosphere, showing the earth's actual curvature on the horizon more clearly than ever before, and revealing how the world looks from the greatest height at which photographs ever have been made, have just been developed from films exposed during the recent stratosphere flight of the National Geographic society—army air corps balloon Explorer II.

The photographs were shown for the first time in connection with ceremonies at which Captain Albert W. Stevens, commander of the balloon, and Captain Cyril A. Anderson, its pilot, received Hubbard gold medals, highest award of the National Geographic society, in Washington, D. C.

Presented by Gen. Pershing
The flyers were given the awards "for distinguished achievement in scientific research." The medals were presented to them by General John J. Pershing, general of the armies of the United States and a life trustee of the National Geographic society. General Pershing was introduced by Dr. Gilbert Grosvenor, president of the society.

The photographs were taken by Captain Stevens while the Explorer II was at its "ceiling," 72,395 feet above South Dakota, a new world altitude record. He showed them during a lecture describing the flight following the presentation of the medals.

The picture showing the lateral curvature of the earth includes a stretch of the horizon 220 miles in length. This represents more than three degrees of a circle—nearly 1-100th of the total circumference of the earth. The curve of the horizon is easily noticeable when the picture is projected on a screen—photographic evidence that the world is round. When the edge of a ruler is laid along the horizon line the curvature is seen more plainly visible.

Infra-Red Light Pierces Haze
In taking this picture the camera

used by Captain Stevens "saw" a distance of approximately 300 miles, far beyond the range of the human eye. The horizon showing in the photograph is estimated to have been at that distance from the camera. The photograph was taken by infra-red light which is capable of piercing distant haze. All of the other colors of sunlight are shut out of the camera by a red filter in making this kind of long-distance photograph.

The picture shows a vast stretch of western South Dakota, covering more than 33,000 square miles. The Black Hills, from which the flight started and which have an area of about 6,000 square miles, appear as a large dark area at one side of the picture 160 miles in the background. The picture was taken from a position above Bemisville, S. D.

The horizon line in the photograph is represented by a stratum of haze estimated to lie about 10,000 feet above the earth. This stratum, of haze, however, conforms closely to the sea level surface of the earth and its curvature reflects accurately the curvature of the earth itself.

Rivers Like Delicate Tracery
Both still and motion pictures taken directly downward from the stratosphere balloon while it was at its ceiling of 72,395 feet, the highest-altitude pictures of the earth ever taken, also were shown by Captain Stevens. They reveal the earth as a huge plain marked with tiny checkerboard-like farms and fields. Cutting into the level, smooth farm lands are regions of erosion, with innumerable small stream courses, arroyos and creek beds, forming intricate patterns of "delicate tracery like frost on a window pane. Road-like lines appear as thin, knife-like lines. Towns are practically invisible.

4 DIE, MANY HURT WHEN FAST TRAIN GOES OFF BRIDGE
(Continued From Page One.)
Tracks just as it reached the end of the bridge at Clement's station, directly across the river from Sanbury. Witnesses told of hearing a blast and of seeing a blinding glare as the train pulled onto the span, leading to reports the boiler had exploded. No definite cause could be learned in the first investigation, however.
Dr. J. K. Fisher, Sanbury physician and one of the first to reach the scene, told of hearing "the passengers screaming."

PREVENT DANGERS OF CONSTIPATION*

"Bulk" in ALL-BRAN Is Gentle in Action

Common constipation is largely due to insufficient "bulk" in meals. You fail to get your normal exercise. Millions of people have found that Kellogg's ALL-BRAN supplies soft "bulk" with satisfactory results.

Tests in nutrition laboratories demonstrate that the "bulk" in ALL-BRAN can be used with the utmost confidence. Naturally, those few individuals with diseased or highly sensitive intestines should not take "bulk" in any form—either in leafy vegetables or in bran.

Unlike cathartics, ALL-BRAN is natural in its action—nor does this food lose its effectiveness with continued use. Within the body, it absorbs moisture and cleanses the intestines, promoting normal and healthful elimination.

Two tablespoonfuls of this delicious cereal, served with milk or cream, are usually sufficient. Enjoy it also in cooked dishes.

Help your family keep well. Serve ALL-BRAN regularly for regularity. Sold by all grocers. Made by Kellogg in Battle Creek.

MONDAY'S ORDERS

Our Own Family's Whiskey!

Personally supervised by me and the boys

Most likely it's got around to you by now how me and the boys are putting up our own Family's whiskey in regular bottles for sale—and how I've put into this Family's Recipe of ours everything I learned from my dad about distilling, and all I got out of my own 40 odds of experience in making whiskey mild and tasty. Yes sir—this here is just exactly what we old-time distillers enjoy ourselves!
