

# This WAR-MAD WORLD

## Arms Men Are Now Selling a New and More Deadly Poison Gas--- But They're Also Selling New Gas Masks Which Will Combat It

More deadly gas is not the only new and terrible war weapon being manufactured. For instance, Germany is said to have: bullets that penetrate armor plate six inches

thick; rotative guns, with five barrels firing a thousand rounds a minute; stratosphere rockets, radio operated, and charged with high explosive poison gas and germs.

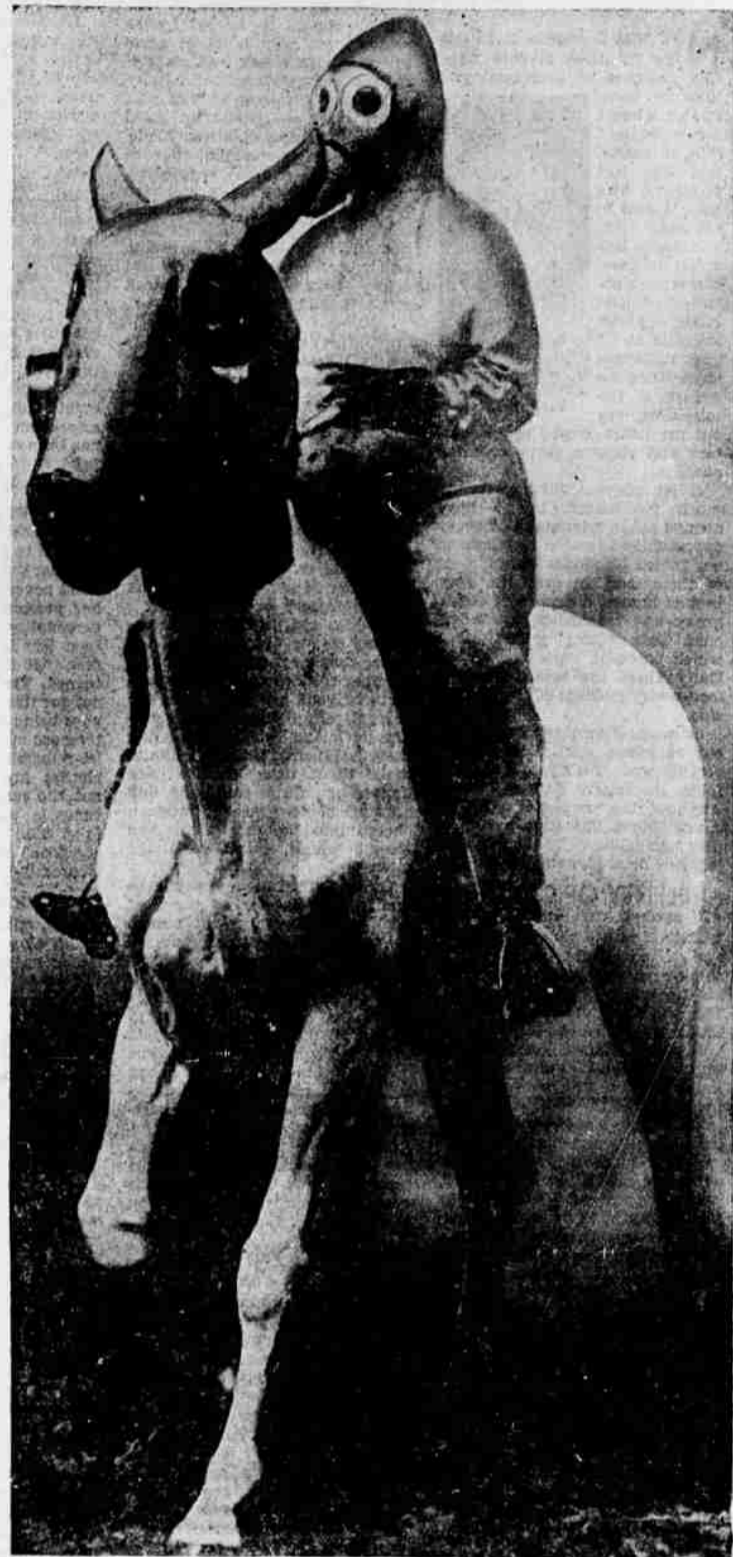

There is also reported "Z" rays, to provide an "invisible wall" against France, and machine guns, weighing only eighteen pounds, and firing 600 rounds a minute. Copyright, 1936

GERMANY'S CAMPAIGN AGAINST POSSIBLE POISON GAS ATTACK is the most gigantic of any nation. Horses and dogs are being accustomed to wearing gas masks.

GAS MASKS are displayed in hat and clothing stores throughout Germany. This is a Leipzig window. The large placard in the window reads: "Protect yourself from poisonous gases. Carry gas masks."

GERMANS TRAIN HORSES AS WELL AS MEN. This horse will have no fear of gas.

### Nations Are Teaching Their Children How to Fight Gas

GAS-MASK DEMONSTRATIONS ARE HELD REGULARLY IN BRITAIN'S SCHOOLS.

GERMANY ALSO TEACHES HER SCHOOL CHILDREN HOW TO WEAR GAS MASKS.

PROTECTION AGAINST GAS, FIRE AND ACID. The manufacturers of this outfit claim it will protect the wearer not only from gas, but fire and death-dealing acids. An oxygen tank is carried underneath on the back.

JAPAN PREPARES TO KEEP HER WIRES OPEN. Japanese switchboard operators in Tokyo department store are equipped with gas masks in event of aerial attack.
