

CENTRAL PT. BOY FOUND GUILTY OF DISTURBING PLAY

Gail St. Andrews, 19, of Central Point, charged with disorderly conduct in a complaint signed by Marshal Hedgepeth of Central Point, was found guilty in justice court yesterday and fined \$10 and costs.

As St. Andrews has spent five days in jail awaiting trial, it was allowed on his fine and all he owes is the costs amounting to \$4.50.

St. Andrews was charged with acting in a violent, riotous and disorderly manner around the Central Point high school building while a group of students were rehearsing an amateur play. He was alleged to have created a hubbub by yelling and attaching a wire from the fender of an auto to the school house steps.

St. Andrews, according to the authorities, was before the court about a year ago for driving his auto on the sidewalks and over flower beds. He was acquitted in that case. The authorities claim St. Andrews is "not a bad boy at heart, but impetuous."

Leland Dwight Babbitt, charged by state police with driving past milepost 318 at a speed of 70 miles an hour, defaulted bail. Babbitt was alleged to have traveled on the Pacific highway in violation of the basic speed and without regard for traffic.

Elma Wyvette Boswell of Central Point was assessed \$1 and costs upon a plea of guilty to driving with improper lights, and J. E. Garrison of this city, a taxi operator, was fined \$1 and costs for non-possession of a chauffeur's license.

cover from processors the \$200,000,000 in impounded taxes returned to manufacturers under the supreme court ruling in the rice millers case. Which, of what combination, of these would be selected finally was not known.

Authoritative quarters said the administration probably would center its attention upon the excise taxes. The recommendations were reported to be prepared for use of congressional committees.

The excise taxes, following closely in form the now invalidated processing taxes, were reported designed to become a permanent levy to serve the "farmers' tariff" to meet the cost of the soil conservation program.

While scores of suggestions concerning the excise tax rates were said to have been discussed, and while the administration was reported to have made no final decision, informed sources said the excises favored would include more commodities than the old processing taxes, and would be levied at considerably lower rates.

Disappearance Of Captain Probed

SAN FRANCISCO, Feb. 11.—(AP)—An army board of inquiry delved today into the strange disappearance of Capt. Edgar S. McClellan from the transport Republic as she neared port yesterday.

The widow, Mrs. Louise DePue McClellan, said she was positive "it was not suicide." The 60-year-old ship commander and veteran in the army transport service "always considered such things completely foolish," she said, and had "everything to live for."

The Italians have been building two cruisers for some time now. All the efforts of other nations failed to develop the facts about them. The British admiralty is supposed to have tried harder than the rest to pierce the ring of fascist steel with which Mussolini surrounds his ship yards.

ness is going to be better.

Both Mr. Morgenthau and Mr. Farley were authorized to hire approximately 5000 more employees.

The point seems to be that while economy is always in the air in Washington, it rarely gets down as far as the taxpayers' pocket. There has been many a slip 'twixt the lip and the budget.

You may have noticed remarkably little reaction in Washington lately to Far Eastern developments. This does not mean a lack of interest. The fact is Russia and Japan seem to be off-setting each other out there in a very satisfactory way, which does not require much Anglo-American reaction. The Russians are restraining the Japanese and vice versa. That situation is likely to continue. As long as it does, the quiet American policy will be to play one against the other, and hope that neither succeeds.

Navy experts believe that the London agreement to swap information about ship building plans really amounts to something. What led up to it was this:

The British admiralty is supposed to have tried harder than the rest to pierce the ring of fascist steel with which Mussolini surrounds his ship yards.

Likewise Germany has proved her ability actually to conceal submarines.

Of course, such successful concealment is impossible in parlia-

THESE FACTS ABOUT BRAN HAVE BEEN PROVED BY TESTS

Supplies Gently Acting "Bulk" to Aid Regular Habits

Now and then, in talking with your friends, the subject of bran has come up. So that real facts might replace unsupported opinions, the Kellogg Company has aided for some years research in leading nutrition laboratories.

Studies made on a group of healthy women showed that two tablespoonsful of bran daily continued to relieve constipation over a period of months. How different from cathartics—where dosage often must be increased.

Another series of tests on men indicated that, with some people, the "bulk" in bran was much more effective than that found in fruits and vegetables.

Further tests showed that Kellogg's All-Bran provided vitamin B and iron as well as "bulk." This "bulk" absorbs moisture, and gently exercises and cleanses the system—the right way to correct constipation.

Serve ALL-BRAN regularly for regularity. Either as a cereal, with milk or cream, or in cooked dishes. It is a natural laxative food. Sold by all grocers. Made by Kellogg in Battle Creek.

Over a period of years, certain basic advances have been made in the selection and treatment of cigarette tobaccos for Lucky Strike Cigarettes.

They include preliminary analyses of the tobacco selected; use of center leaves; the higher heat treatment of tobacco ("Toasting"); consideration of acid-alkaline balance, with consequent definite improvement in flavor; and controlled uniformity in the finished product.

All these combine to produce a superior cigarette—a modern cigarette, a cigarette made of rich, ripe-bodied tobaccos—A Light Smoke.

Recent chemical tests show that other popular brands have an excess of acidity over Lucky Strike of from 53% to 100%.
