

CCC BOYS ADVISED NOT TO LEAVE FOR UNCERTAIN FUTURE

Special Investigator For Director Fechner Is Visitor At Camp Rand—Health Of Men Good.

CAMP RAND, March 3.—(Sp.)—Employment conditions in the east and middle west are uncertain and CCC enrollees who are not sure of steady work will do well to remain with the corps. M. J. Bowen, special investigator for Director Robert Fechner, told members of this company at a special assembly called in his honor when he visited this camp the latter part of last week. Enrollment terms for all men will expire April 1, and those who do not re-enroll will be returned to their places of enrollment for discharge during March.

Health of the men in the corps has been better than for men of corresponding ages and similar walks of civil life. Bowen pointed out. The death rate per 1,000 enrollees per year has been 2.87. Among unselected men of a similar age group, according to the American Experience Table of Mortality, deaths average approximately 8.97 per thousand or about 5.3 deaths per 1,000 per year greater than are experienced in the Civilian Conservation Corps.

Projects listed. Among work projects completed by CCC men, through June 30, 1935, are the following: New telephone lines, 36,029 miles; telephone lines maintained, 64,511 miles; fighting forest fires, 1,929,928 days; new firebreaks, 41,440 miles; roadsides and trails clean up, fire prevention, 26,601 miles; fire hazards reduced, 1,217,478 acres; forest stand improvements, 1,972,303 acres; new truck trails, 54,630 miles; truck trails maintained, 116,849 miles; trees planted (forestation), 340,941,400; rodent control, 13,015,419 acres; tree and plant disease control, 4,168,217 acres; insect pest control, 4,780,148 acres; erosion control check dams, 1,321,689; reservoirs, 7,245; impounding and large diversion dams, 1,283.

The consolidated statement of obligations from Emergency Conservation Work funds for regular Civilian Conservation Corps camps, through June 30, 1935, include: Pay of members, \$249,890,877; shelter, \$44,269,410; clothing \$100,229,966; subsistence \$99,401,537; supplies, materials, etc., \$109,367,296. The total obligations of Emergency Conservation Work, through June 30, 1935, were approximately \$851,009,459.

Reports to Fechner. Mr. Bowen sends a report directly to Mr. Fechner on the condition of each camp he visits. "We are particularly interested to see that the men have plenty of wholesome food, are supplied with plenty of comfortable clothing and have adequate shelter," he states. "These things are fundamental and without them the educational and welfare activities cannot be successful and work projects will lag behind."

Guy W. Johnson, forest service safety engineer from Portland, visited Camp Rand Friday and made a check of buildings, equipment and work projects with the aim of eliminating hazards. He was accompanied by Don Cameron, Siskiyou forest construction superintendent, from Grants Pass.

Major George R. Owens, Medford district commander, also visited Camp Rand Friday and inspected the camp.

FRANK VAN DYKE NEW PRESIDENT ASHLAND C OF C

ASHLAND, March 3.—(Sp.)—Frank J. VanDyke, young and aggressive city attorney, was unanimously elected president of the Ashland chapter of commerce at a meeting of a new board of directors Monday.

Other new officers, all named without dissenting votes, are C. M. J. Miller, vice-president, Hal McNair, treasurer, and Gordon MacCracken, incumbent, secretary.

Mr. VanDyke succeeds Sam B. McNair, who was elected to finish the term of C. W. Foutseller, resigned. Foutseller became president last summer when Dr. B. G. Barkwith left the city.

A plea for cooperation in advancing the retail trade of the city and in stimulating pride in Ashland advantage was made by the new president following his election. VanDyke's election met with the approval of many chamber members who had attempted to persuade him to accept the position before. His prominence in other city affairs, plus his ability as a public speaker, cause his friends to feel he is well qualified for the job. Among other civic accomplishments, he is known as the founder of the Active club, Ashland's only service organization, and was its first president.

The directors went on record as favoring cooperation with Houshing in regard to closing the Unapqua river to net fishing, feeling the river is not particularly valuable commercially and that its value to sportsmen should be protected.

Secretary Gordon MacCracken was authorized to write a letter of condolence to Mrs. H. O. Probbin, Medford, whose husband, a former secretary of the Ashland chamber, passed away.

Court-Martialed

Col. Joseph L. McMullen, whose home is at Palo Alto, Cal., is pictured as he arrived to face an army court martial at Washington for allegedly "offending good military order." He was charged with receiving two round-trip tickets from the capital to San Francisco for giving legal advice to a civilian interested in army contracts.—(Associated Press Photo.)

COUNCIL TO PASS ON GAS MEASURE AT MEET TONIGHT

A lengthy ordinance covering everything pertaining to gas is scheduled for a second and third reading before the council at its regular semi-monthly meeting in city hall tonight. The session will convene at 7:30 in council chambers on the top floor.

The ordinance was given its first reading by Frank P. Farrell, city attorney, at the meeting two weeks ago. At the suggestion of Mayor George W. Porter, the required second and third readings were deferred to give persons interested an opportunity to express their views.

The ordinance is intended to regulate the sale, installation, maintenance and repair of gas appliances and the installation, maintenance and repair of house piping.

It provides also for the issuance of permits, collection of fees and licensing of persons engaged in the gas business or any part thereof.

Under terms of the proposed ordinance, anyone engaged in installing or connecting gas appliances must obtain a certificate of competency, the fee for such certificate to be \$25 a year. Those now so engaged would be considered as filling requirements of competency and issued the certificates upon payment of the fee. The ordinance provides also for various other fees.

There is at present no ordinance covering the gas business, though various phases of it are regulated by provisions in the general building code.

My personal attention given to all watch repairs, factory style workmanship, reasonably priced and thoroughly guaranteed. Jno. W. Johnson.

12,135 ARRESTED BY STATE POLICE DURING PAST YEAR

632 Years In Jail Sentences Meted — Fines Total \$125,951—Many Drivers Found To Lack License.

SALEM, Ore., March 3.—(AP)—The state police reported a total of 12,135 arrests made during 1935 by three divisions which resulted in jail sentences of more than 632 years and fines assessed amounting to \$125,951, the report of Charles H. Pray, superintendent, revealed today.

In addition to warnings and checking the council collected fees amounting to \$36,816. The three main divisions are general law enforcement, traffic law activities and the game division.

Of the 2,395 general law enforcement arrests, the greatest number, 430, were for larceny of \$5 and under, followed closely by arrests for drunkenness and disorderly conduct. Heaviest jail sentences were for burglary, followed by statutory offenses and larceny. Most fines were for sale of liquor, drunkenness and larceny in that order.

In the traffic division, failure to carry operators' licenses led in arrests, followed by lack of motor transportation permits and reckless driving. Driving while intoxicated resulted in 234 arrests, but the proportion to total violations ranked far down the list.

Fines assessed in the traffic division were led by violators of the drunken driving act, for a total of \$19,999. Reckless driving fines followed with \$15,327, while driving without license was third.

Fees collected were largely for license plates and valid foreign licenses. Fishing without licenses accounted for the highest game violations, the report showed, followed by possession of game animals and hunting without licenses. Jail sentences and fines assessed followed in the same order.

PLAN TO BETTER PACIFIC HIGHWAY FACES SETBACK

Unless the 1937 regular federal-aid road appropriation is made a part of the deficiency bill at this session of congress all major highway improvements in Oregon will come to a standstill this fall, according to officials of the Oregon Pacific Highway association.

Results affecting U. S. highway 99 will mean suspension of work on such vital projects as the Siskiyou realignment, Roseburg to Canyonville, Turkey Hill-Rice Hill, Junction City to Eugene, and Salem south projects, it was pointed out.

Letters have been sent to every chamber of commerce on highway 99, the association urging that they urge Oregon's congressional delegation pointing out the seriousness of the state highway plight unless pressure can be brought to include this federal aid appropriation in the regular deficiency measure. Associations and officials of the 11 western states, all of whom will be affected, are joining in asking their congressional delegations for action.

"Oregon, like the rest of the 11 western states has matched federal aid funds dollar for dollar in carrying on highway improvements," said C. A. Ayre, manager of the Oregon Pacific Highway association in his letter to chambers of commerce and county courts. "Now she and her sister states stand to be penalized by the dilatory tactics of eastern and southern states who have failed to keep pace with the federal

RECENT HISTORY HELD AS SIGN OF CHRIST'S COMING

Fred M. Weatherford pastor-evangelist spoke on "Modern History Lifts the Veil From Shadowed Prophecy" at the Church of the Nazarene Sunday night. He said in part:

"In this message I want to get some of the testimony in of those who have prophesied of Christ's second coming. Then I want to touch upon current history as a revealer of prophetic signs.

"God in His Holy Word has given to us many citations of His promises that Christ shall reign over an earthly kingdom. The 11th chapter of the Book of Isaiah is a case in point.

"Again the record says of Him 'He shall be great and shall be called the Son of the Highest, and the Lord God shall give unto Him the throne of His Father David. And He shall reign over the house of Jacob forever, and of His Kingdom there shall be no end.' He has never taken that scepter up to this moment.

"Christ came the first time to hang upon the cross. He is coming the second time in power and great glory to sit upon a throne. At Calvary He disarmed Satan of his death weapon in defense of the saints saying, 'Because I live, ye shall live also.' At His second coming He will shortly and completely overthrow Satan in defense of the saints and forever banish him in the pit.

"Jesus said of Himself when here.

MAIZE TO YIELD ALCOHOL

Luckies are less acid

Excess of Acidity of Other Popular Brands Over Lucky Strike Cigarettes	
BALANCE	0
LUCKY STRIKE	0
BRAND B	100
BRAND C	100
BRAND D	100

STANDARDIZED UNIFORMITY

The simple mechanical details of cigarette manufacture are of surprising importance. Upon them depend the physical properties of the cigarette, such as weight, size, firmness, moisture-holding properties, uniformity of fill—uniformity of product—all of which have a far-reaching effect on the character of its combustion and the constituents of its smoke.

In the manufacture of Lucky Strike Cigarettes all of these properties have been standardized with care for the perfection of A LIGHT SMOKE.

LUCKIES ARE LESS ACID! Recent chemical tests show* that other popular brands have an excess of acidity over Lucky Strike of from 53% to 100%.

*RESULTS VERIFIED BY INDEPENDENT CHEMICAL LABORATORIES AND RESEARCH GROUPS
