inner tube repaired. His wife, as well as Gordon and Newton Gocher of Granite Pass, remained in the machine, which was headed toward this city.

Brown, also headed this way, was passing an oncoming car, and had dimmed his lights. Before he could switch them on bright again, he told police, he perceived the parked Sharp auto, rammed it from behind, knocking the Sharp sedan into the ditch on the right side of the highway, his own car going into the ditch on the opposite side, facing the other way.

Ted R. Flury, 215 Columbus avenue, Medford, stopped his Dodge car to render assistance when he saw the two wrecked machines. Accompanied by his wife, and Mr. and Mrs. Arthur Dobbys of Glendale, Oregon, he left his machine parked, and walked to the wrecked cars.

While the car was parked there, a fourth machine, driven by R. D. Mahar and also coming toward Medford, hit the Flury machine in the rear, knocking it into the right hand ditch, the Mahar car coming to a stop in the center of the road.

It was 4:30 a. m. before the highway was completely cleared of the wreckage.

None of those involved were seriously injured. State police said that the weather was clear, the pavement dry, and that there was no frost.

confidence in any engagement into which the government of Germany may in the future enter."

Baldwin said Franco-German suspicions have "rendered havoc to Europe during the centuries." He said Europe's hopes for peace have been "blighted time after time, sometimes blighted by the French missing an opportunity for accepting an offer, and sometimes by Germany taking some act resulting in the breaking up of a treaty."

Defense Fund Asked

Baldwin asked that parliament approve the British government's program for building up British defenses.

"Our preparations," he said, "are preparations in case needs should arise."

"Neither the government nor the British people will ever be intimidated by threats from whatever quarter they come."

The prime minister declared that Great Britain's design was "to keep calm, to keep our heads and to continue to try and bring France and Germany together in friendship with ourselves."

Eden stated the British position should be clarified, declaring: "It is clearly desirable to do this, because no one can fail to realize the stabilizing force of clear sighted and united British influence in the affairs of Europe at this juncture."
