

REMARKABLE GAIN MADE IN AIRMAIL; 1935 PEAK YEAR

A remarkable growth in the use of airmail in the past nine years is shown in a tabulation received today from Washington, D. C., by Postmaster Frank DeSouza.

From 1,065,498 pounds in 1927 the total airmail carried annually jumped to 13,276,023 pounds in 1935. Each month of 1935, beginning with May, showed transportation of a greater amount of airmail than the entire year 1927.

For the full year 1935 the total of 13,276,023 pounds of airmail were almost double the 7,411,004 pounds for the previous year the table reveals.

Starting with 1,065,498 pounds in 1927, the airmail increased steadily each year until it reached 9,102,376 pounds in 1931. It slumped to 7,393,257 pounds in 1932 and still further to 7,362,180 in 1933.

In 1934 there was a slight increase to 7,411,004. Then came the remarkable gain to 13,276,023 pounds in 1935, by far the highest year to date.

In 1927, 1928, 1929, 1930 and 1931 October or December was the peak month. March was the highest month in 1932 and August in 1933. December led again in both 1934 and 1935, indicating that the airmail was being used again for Christmas deliveries.

GOOD GARDENING

Don't forget the fence rows in your garden. The so-called vine group of vegetables—including cucumbers, squashes and muskmelons—do well trained to a wire fence or on wire netting so the vines can be carried up out of the way of other crops. All of this group require plenty of soil fertility; in addition to a shovelful of manure or its substitute in each hill, a small quantity of commercial fertilizer may be worked into the soil after the vines begin to spread out. Beginners should try only squash and cucumber. The season for planting both runs from early March in the deep south to early June in the far north.

MENINGITIS CURB DECLARED FOUND BY ARMY MEDICS

KANSAS CITY, March 11.—(P)—Development of a toxin he said successfully controlled an epidemic of cerebro-spinal meningitis in Ashkion county, Mo., a year ago was described here today by Capt. Dwight M. Kuhns of the U. S. Army medical corps at Ft. Leavenworth, Kans.

Speaking before a medico-military symposium sponsored by the Kansas City Southwest Clinical Society, Captain Kuhns told of the work he and associates were doing to control the disease with meningococcus solute toxin.

In developing the toxin Captain Kuhns said he obtained cultures from victims of meningitis and developed them in a brother medium. The living bacteria were then filtered into this medium, he related, and the filtrate was used as a testing and immunizing substance.

Effect of the toxin, he said, was shown in the Atchison county epidemic that centered in a Tarkio CCC camp last spring and summer. No further meningitis cases appeared in the camp, the captain said, after encephalitis were given skin tests and immunized with the toxin. The disease continued to appear outside the camp, he pointed out.

“Captain Kuhns said it was so successful in the CCC camp that Tarkio school officials asked that pupils be given the same treatment. No further cases appeared in the school, he reported.

FAMILY DISPUTES EASED BY BUREAU OFFERING ADVICE

TOLEDO (UP)—Three years ago A. D. Grigsby began giving weekly lectures on marriage, at night school in the University of Toledo.

Today, Grigsby sits at the desk of his new “Marriage and Family Counseling Bureau.” It’s a full-time job, now the culmination of the growing popularity of his courses, given in the university’s basement chemistry lecture room.

The bureau’s outlook is promising. For on the first day, three perplexed persons brought marital problems to him for advice. Grigsby, affable, roly-poly and bald, indignantly refuses the suggestion that he is a match-making bureau. One gets advice, no husbands and wives in his office, he says.

The bureau, he says, is operated like a legal or medical office. The client reveals his problem, and attempts to untangle the knot.

Grigsby’s father was a “marrying parson” and that’s the source of the whole affair. Some of the thousands of unions his father formed didn’t endure, and that worried the parson.

“I frequently had used to say to me, ‘Son I wonder what’s wrong with all these people?’ Grigsby explained, “I couldn’t answer him then, but I resolved to find out.

“Three years ago I started the marriage class at night school. Now, there are hundreds of people who are having trouble before, during and after marriage. I decided, after studying the question for a number of years, that I was in a position to help them. So I opened up the bureau.”

EARNING, SPENDING SLATED FOR STUDY

PORTLAND, Ore., March 11.—(P)—Where Oregon’s money comes from and where it goes will be shown in a price index study being made by the Oregon state planning board, Chairman Ormond B. Bean announced today.

Prices received for Oregon agricultural and industrial products from 1919 to 1935 will be listed, along with an index of manufactured commodities brought into the state.

Deficiency of manufacturing in Oregon is indicated in studies already made, Bean said. He said the completed study will show lack of parity between the price level of agricultural products and semi-manufactured products with other manufactured goods.

The problem of transportation costs also will be considered.

MORE CCC MEN LEAVE FOR JOBS ON OUTSIDE

WASHINGTON, March 11.—(P)—Robert Fechner, director of the Civilian Conservation Corps, announced today nearly twice as many members of the corps left during January to accept private employment as in that month a year ago.

A total of 13,959 compared with 7931.

This brought the number of CCC men, who have obtained private jobs to 283,241 out of about 1,500,000, who have been members for varying periods.

Fruit Pack Sets Record In Eugene

EUGENE, Ore., March 11.—(P)—The 1935 pack of the Eugene Fruit Growers’ Co-operative association was the greatest on record, a summary of activities showed today.

Gross sales were \$1,427,073, a considerable increase over the previous year. The record pack was 10,876 tons of fruits and vegetables. The number of members Dec. 1, 1935, was listed at 2064.

MEXICANS SEIZE MORMON LANDS

JUAREZ, Mex., March 11.—(P)—Mexican agrarians armed with rifles today seized several hundred acres of Juarez valley land belonging to members of the Latter Day Saints colony of northern Chihuahua.

Juarez officials said the land had been “allotted” to the invaders by Raul Dominguez, chief of the agrarian section of the Chihuahua state government. Dominguez accompanied the invaders on their expeditions of seizure.

Red and black flags, bearing the inscription “Down with foreigners,” were carried by the invaders.

The land seized was owned by A. L. Pierce, bishop of the Church of Jesus Christ of Latter Day Saints, his son, M. A. Pierce, and his brother C. D. Pierce.

JACKSONVILLE SCHOOL PREPARES FOR OPERA 'THE SUNBONNET GIRL'

TWO COUNTY WARDS SUFFOCATE IN FIRE

JACKSONVILLE, March 11.—(SpL)—This week the Glee clubs of the Jacksonville high school are touching up their operetta, “The Sunbonnet Girl,” which will be given at a performance only, March 18 at the Jacksonville high school gymnasium.

The stage has been remodeled and a new velvet front curtain and a painted back drop added. The setting, which represents an outdoor garden in any county home, has been planned and constructed by Morris Bryno and Elliot Rhoten, high school students. The scene fills the entire stage, no wings being used. Paper flowers and shrubbery adorn the setting, making the garden scene of “The Sunbonnet Girl” most impressive. May Jenkins and Frances Clark had charge of getting the flowers made.

A new feature for the operetta

WAYNE STEAD IN CCC MAIN OFFICE

EXPECT FULL RECOVERY CROSSING CRASH VICTIM

SALEM, March 11.—(P)—The state highway commission at its meeting in Portland Thursday and Friday of this week will set dates for hearings on highway route changes in Roseburg and McMinnville, R. H. Baldock, state highway engineer, declared.

Hearing notices must be issued 80 days before they can be held, which will bring the dates about the latter part of April. These highway changes will be considered after the hearing testimony has been taken.

BROADEN SCOPE TOWNSEND QUIZ

WASHINGTON, March 11.—(P)—Without a dissenting vote, the house today adopted a resolution broadening the scope and authority of its special bi-partisan committee named to investigate the Townsend and other old age pension movements.

The resolution offered by Chairman Bell (D-Mo.) of the investigating committee made special reference to the McGroarty bill, which embodies the Townsend plan for a two percent transaction tax to pay \$200 monthly pensions to all persons over sixty.

It also authorizes the committee to print its findings and report to the speaker in the event the house is not in session when the investigation is completed.

Why You Should Never Cut a Corn

If you are troubled with corns or callouses, do not run the risk of blood poisoning by paring them. Statistics show that many infections have occurred from this seemingly innocent practice of paring corns.

Simply go to your druggist and get some Icos-Mint, rub a little on any painful corn or callous. The pain promptly disappears and in a short time the corn or callous will loosen and lift off easily—root and all—leaving the surrounding skin in a healthy normal condition.

Thus, together with the fact that Icos-Mint quickly eases such troubles as sore, tired aching, puffed or burning feet and makes them cool, easy and comfortable, it is probably the reason for the hearty endorsement given it by druggists.

To rid one's feet of every hard corn, soft corn, corn between the toes or painful callouses in such a pleasant and safe way, makes it seem the height of folly for anyone to pare a corn and people are warned to stop it.

MODERN STONE HOME STARTED FOR NAUMES

Work was under way today on a new modern home at 1003 South Oakdale avenue for J. P. Naumes of 315 South Central avenue. Upon its completion it will be occupied by Mr. Naumes as his home.

Situated about a block south of the Medford high school, the house will be constructed of stone. It will be a story and a half high, with a partial basement for a central heating plant. It will have six rooms, according to plans submitted to the city building inspection department.

Mr. Naumes' son, Joe W. Naumes, will supervise construction with Frank T. Applegate as foreman.

My personal attention given to all watch repairs, factory style workmanship, reasonably priced and thoroughly guaranteed. Jno W Johnson

Far above other low priced cars in all but cost!

TERRAPLANE

Yes, different from other low priced cars — and far ahead of the rest — in style and everything else that counts! Can we prove this? Just look at a few facts about Terraplane.

Wheelbase, over-all length, inside leg room, head room, shoulder room — unmatched by any low priced car. Untrouched by some costing \$125 and \$145 more.

“Extras” At No Extra Cost

Of all low priced cars only Terraplane gives you — at no extra cost — a rear opening baggage compartment with more room than the average trunk model, with spare tire lying flat inside.

Power — the same story. Terraplane is ahead of other cars in its price class by as much as 18 horsepower. And no vibration at any speed! Terraplanes with 125,000, 150,000 miles and more to their credit show you what that smoothness means in long life.

23.95 Miles per Gallon

Interested in economy? Here is Terraplane's latest — 23.95 officially certified miles per gallon over 352 miles

of mountain roads, with three passengers and baggage, in the recent Los Angeles-Yosemite Economy Run.

More... Terraplane is the only leading low priced car with body all of steel and seamless steel roof. And no other car in its whole price range has Duo-Automatic Hydraulic Brakes (patent applied for) . . . Radial Safety Control (patent applied for) . . . True-Line Steering . . . or The Electric Hand, optional at small extra cost.

The most amazing car in the low price field — this 1936 Terraplane. And right down with the lowest in cost for the model and features you want. Come in and see for yourself.
