

COUNTY TEACHER INSTITUTE DATES MARCH 25, 26, 27

As has been the custom for a number of years the rural and second class district teachers convene at this time of the year in three groups to consider matters of general interest and to check up on work that is being specially stressed for the year in the schools.

During the entire year an effort has been made to improve the spelling and penmanship and these topics will be the central themes of discussion at the three group meetings to be held on the afternoons of March 25, 26, and 27 at Gold Hill, Eagle Point and Jacksonville respectively.

This year the teachers are to be specially honored with the presence of W. J. Rice, author and publisher of the Rice system of penmanship, widely used in the northwest, who will talk to each group on the subject of special techniques and ways of improvement in this particular subject.

Appearing also on the programs will be John E. Doerr, Jr., Crater Lake National Park naturalist, and J. Carlisle Crouch, chief ranger Crater Lake National park; Miss D. Virginia Hales, dean of women, Southern Oregon Normal school, and Supt. H. P. Jewett, of Central Point schools. Musical numbers of the program will be furnished by the teachers and school talent.

The institutes are in charge of rural school supervisor, Una B. Inch and county school superintendent, C. R. Bowman.

THE WINNER! ASSOCIATED AVIATION ETHYL

There is one all-important reason why 9 out of 10 motorists feel a definite improvement in car performance when they use Associated Aviation Ethyl. Regardless of any other gasoline ever tried before. That reason is:

This is a true aviation fuel in every respect. The basic gasoline is completely different from that of any other Ethyl available to motorists in the West.

Associated Aviation Ethyl is made to U. S. Government airplane specifications for super-responsiveness to throttle and spark. This explains (1) its instant starting with little or no use of the choke—regardless of engine temperature, (2) its rushing response to the throttle in traffic and on the highway, and (3) its smashing power on the hills.

Try Associated Aviation Ethyl in your own car, test it your own way. Be your own judge of its surprising performance and mileage. It is for sale at any Smiling Associated Dealer's.
