

PORT ORFORDITES ARE ENTHUSIASTIC BY RAILROAD PERMIT

Decision of ICC Culmination of Long Effort After Adverse Report by Engineer — Gable Grateful

PORT ORFORD, Ore., March 25.—(U)—Port Orford's several hundred residents went about their work with a new optimism today as a result of the interstate commerce commission's decision to permit construction of the proposed Gold Coast rail line.

The decision, announced in Washington, culminated long months of doubt which followed an engineer's adverse report.

Gilbert E. Gable, mayor of Curry county's only incorporated town and head of the five corporations active in developing this area, said: "My first reaction on receiving news that our Gold Coast railway was approved by the I. C. C. was one of gratitude for the support, loyalty and faith shown by citizens of this section in bringing the decision about."

Many to Prosper
"It will mean that thousands of people will have happy and prosperous environments in this part of the state."

Gable, who is president of the rail company, also said: "I am assured by the United States engineers, that they will be in a position to recommend an immediate survey of the harbor and the building of a \$3,000,000 breakerway jetty to protect the part of the harbor we are now using for commercial purposes."

The Gold Coast Railroad company presented its application to the interstate commerce commission December 15, 1934. An I. C. C. examiner on July 28, 1935, disapproved plans for the \$4,150,000 line, on the grounds there was insufficient public demand. On August 2, 1935, Senator Charles McNary (R., Ore.) wired from Washington an appeal from the disapproval was being filed. Several months later, December 11, 1935, State Public Utilities Commissioner Frank McCulloch, following a hearing here, recommended to the I. C. C. that the construction permit be granted.

Taps Vast Resources
A survey of records made during the controversy showed the 90-mile line from Port Orford to the Southern Pacific line at Leland, north of Grants Pass, would tap 282,000 acres and 12,000,000,000 feet of stumps. Gable, in his application, cited large undeveloped deposits of chrome, cop-

OREGON FARMERS MAY PARTICIPATE IN SOIL PROGRAM

State Agriculture Director Home From Conservation Meeting Outlines Federal Benefits Offered in Plan

By CLAYTON V. BERNHARD (Associated Press Staff Writer.)

SALEM, March 25.—(AP)—Federal soil conservation benefits may be participated in by 36,734 farmers in Oregon representing a total cultivated acreage of 17,302,127, Solon T. White, director of agriculture, told the Associated Press today.

White just returned from the conservation meeting of 11 western states held at Salt Lake City and outlined the program as it might affect Oregon. Benefits of from \$1 an acre for soil building crops to \$10 an acre for soil conserving crops planted by farmers will be paid under varying conditions, White declared.

Unit in Each State
The western division, which includes Oregon, will be in charge of George E. Farrell at Washington, D. C., who has been assigned to the 13 states in this district. Each state, however, will have an organization of its own of five members, mostly farmers, who will operate in conjunction with the state college extension service.

The state groups to have charge of the program will likewise name county committees, White declared. The manner of selection of these groups will be outlined later by Farrell.

It states desire to continue the federal benefits under the far-reaching program, they must enact legislation within the next two years to make state laws conform to the federal program. The federal act provides for benefits for two years only, for which \$470,000,000 has been appropriated for 1936.

Flax Pays More
Oregon will receive additional benefits for flax planting, White pointed out. The flax crop, considered a soil depleting one, will carry in addition a sum of 20 cents per bushel of average yield on acreage planted of flax seed in each county.

The matter of selection of soil conservation and soil building crops depends largely upon what and how acreage had been used before, the agricultural director continued. It is hard to point out just what crops would be under the various classifications, he commented.

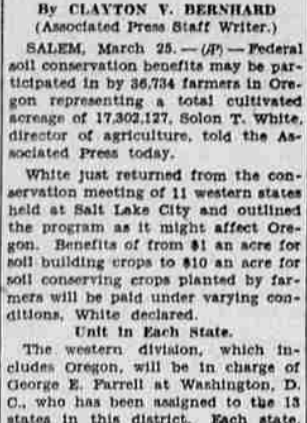

The amount of payments to be made farmers will be left to the determination of the county committees. It will be based upon how much is planted over and above what was being done now. Payments will be divided between landlords and tenants where share crops were the basis for rental.

No payments, White emphasized, will be made to farmers until after actual evidence of fulfillment of the grant is given. No advance contracts will be made. The farmers' base acreage for any crops is the amount of land normally planted to a certain crop or crops.

80 Percent to Participate.

The extent of the silt deposited can be estimated from this pile shoveled up from only a small area. (Associated Press Photo)

80 percent of the farmers will participate. Payments may vary slightly depending upon the response, but in no event will the variance be more than 10 percent either way.

Crops listed as soil depleting ones as far as Oregon was concerned, were potatoes, melons, strawberries, flax, small grains and hay.

Soil conserving crops grown in Oregon include winter peas, vetch, clover, alfalfa and grasses. The building crops were similar, depending upon what was used on lands before. In some instances the plowed under phase was emphasized as conserving and soil building.

Director White announced a meeting of the cooperative council in Portland Thursday for the purpose of making a study of the program. Dean William A. Schoenfeld of the Oregon Agricultural college will preside over the group which represents all cooperative organizations in the state.

The farm hands' club, representing all farm groups, will meet with the council later in the day.

NICKERSON WITHDRAWS AS MAYOR CANDIDATE
PORTLAND, Ore., March 24.—(AP)—D. E. Nickerson, who announced his candidacy for mayor of Portland Sunday, said last night "events beyond my control make it necessary for me to withdraw from the race." Nickerson, who is president of the Oregon state federation of labor, did not enlarge on his statement.

BRAZIL DECREES MARTIAL LAW TO BALK RED DRIVE

Executive Decree, Effective for 90 Days, Was Published Last Night, Just 48 Hours Before the Expiration of the Three-Months' State of Siege, Declared During the November Uprising, Characterized by the Administration as Communist.

RIO DE JANEIRO, March 25.—(AP)—President Getulio Vargas, proclaiming the equivalent of a state of war throughout Brazil as a result of "subversive activities," enforced martial law today over this nation of 47,000,000 people.

The executive decree, effective for 90 days, was published last night, just 48 hours before the expiration of the three-months' state of siege, declared during the November uprising, characterized by the administration as communist.

Simultaneously, a number of prominent persons, including a senator, a radical member of the chamber of deputies, a leader of the government opposition and an army captain, were arrested in a swift roundup.

The decree came as a climax to a week of political conferences.

VEGETABLE AND TREE QUARANTINE IMPOSED

SALEM, March 25.—(AP)—Quarantine against importation into the state of vegetables and trees from vegetable weevil and peach mosaic infected areas in other states was ordered by Governor Martin today upon recommendation of the state director of agriculture.

The quarantine order stated the vegetable weevil was prevalent in California, while the peach mosaic was prevalent in parts of Colorado, Utah and Texas.

HOWARD SCHOOL GIRLS ARE BUSY ON 4-H PROJECTS

The Hummingbirds of Howard school held their weekly meeting in the basement Monday. A number of girls had completed their second project in 4-H club work and had some very attractive school bags and floor mats. Those making zipper purses will need a little more time due to more complicated designs in weaving.

During this week the girls will complete the second project, make the third, a pin cushion, and bring them and material for a needle case to the meeting next Monday.

Emma Jeanne McKay will entertain club members at her home from 7 to 9:30 p. m. Thursday. Games, yells and songs were enjoyed Tuesday and two new stitches were learned. Those present were Bertha Carter, Erma McKay, Ida Pratt, Bertha McGonagle, Cora Rodgers, Pauline Miller, Luvene Hilkey, Marcia Rodgers, Donna Pratt, Eloise Peyton, Vivian Lindquist, Ruth Tod, Edith Moon, Fern Carter and Mrs. C. C. Sater.

Every watch repaired here is given the micrometer test. Jno W. Johnson

DR. JENSEN TELLS ROTARY OF CEYLON

Dr. LeRoy C. Jensen entertained the members of the Medford Rotary club with an interesting account of his travels in Ceylon as a feature of Tuesday's luncheon meeting of the Medford Rotary club at the Hotel Medford. The speaker painted a colorful picture of the beautiful island with its picturesque natives, remnants of ancient civilization and luxuriant tropical grandeur.

Ceylon, according to Dr. Jensen, is approximately 300 miles long and 100 miles wide on which the inhabitants live in languid luxury. He told of the early civilization which was wiped out by a deadly scourge of malaria, leaving imposing temples and crumbling cities hidden in vast jungles of tropical wilderness. Some of these ruins, visited by Dr. Jensen, were described. The native roads, foods and wild life were not overlooked in the speaker's interesting address. Lack of sanitation with resultant diseases was cited as the main disadvantage of living in this beautiful land.

To rid one's feet of every hard corn, soft corn, corn between the toes or painful callouses in such a pleasant and safe way, makes it seem the height of folly for anyone to place a corn and people are warned to stop it.

AIR LINE WILL ADD THIRD PLANE DAILY

SEATTLE, March 25.—(AP)—Harold Clary, vice-president of the United Air Lines, here from Chicago, announced plans for a third daily round trip schedule between Los Angeles and Seattle, and for additional service between Seattle and Portland. He said the new Los Angeles service will start in 30 days, the Portland service later in the spring.

BOARD HAS RIGHT TO FIRE TEACHERS

PORTLAND, Ore., March 25.—(AP)—Circuit Judge James P. Stapleton dismissed a petition by five citizens, asking that the Rockwood school board be enjoined from discharging Minnie B. Altman and Marian Hamlin, teachers.

The court declared the suit was an apparent effort to have the court overrule an action clearly within the board's discretion.

COOK with Gas! - Trade-in Sale

For Limited Time Only
SAVE Money
LIBERAL ALLOWANCE on your old stove regardless of make, type or condition.
FHA TERMS as low as \$4.00 A MONTH depending on model you select
NO DOWN PAYMENT

Now cook the modern way — preferred by the majority of all home makers in the West — with GAS. Gas is quick — no waiting for anything to "heat up" (especially important at breakfast). Gas is clean, eliminating smoke, soot, ashes and fuel storage. Gas is economical. A gas range is moderate in purchase price, costs practically nothing to maintain, and operates for a few cents a day on PETROLEUM NATURAL GAS at our NEW LOW RATES.

WEDGEWOOD GAS RANGE
The ultimate in kitchen style and beauty, in convenience and modern features! Made in the West for western homes. Come in and see our exhibit. A demonstration will prove the exclusive advantages of gas cookery. Our generous appraisal of your old stove (to apply on regular "Wedgewood" retail prices) means a real saving, a bargain for you. This offer may be withdrawn at any time. Call or phone at once.

WHY YOU SHOULD NEVER CUT A CORN

If you are troubled with corns or callouses, do not run the risk of blood poisoning by paring them. Statistics show that many infections have occurred from this seemingly innocent practice of paring corns.

Simply go to your druggist and get some Ioc-Mint. Rub a little on any painful corn or callous. The pain promptly disappears and in a short time the corn or callous will loosen and lift off easily — root and all — leaving the surrounding skin in a healthy normal condition.

This, together with the fact that Ioc-Mint quickly eases such troubles as sore, tired, aching, puffed or burning feet makes them cool, easy and comfortable. It is probably the reason for the hearty endorsement given it by druggists.

Where the stress of travel fades as if by magic..

* When you break your journey at The Palace Hotel in San Francisco, the stress and bustle of traveling leave you.. almost magically. Quiet, unobtrusive service, and forethought for your every want, make you instantly, completely and restfully at home. And yet — the heart of the city — theatres, shops, commercial centre — is but a block or two, in one direction or another, from your door.

"My wife likes its smartness and all that extra room—but

THIS V-8 ENGINE OPENED MY EYES!"

Engineers have known for years the undisputed advantages of the V-type engine...simplicity, economy, compactness, ruggedness. But until Ford announced the first Ford V-8 in 1932, no one had found a way to bring these advantages to the low-priced field.

SINCE its introduction this engine has been constantly refined and improved—but the basic features of Ford design have remained unchanged through the production of over two million V-8 engines.

This is the engine that powers the beautiful 1936 Ford V-8... This is the 8-cylinder engine which, because it is V-type and compact, gives "all that extra room" that many a woman has wondered about in the Ford V-8 body.

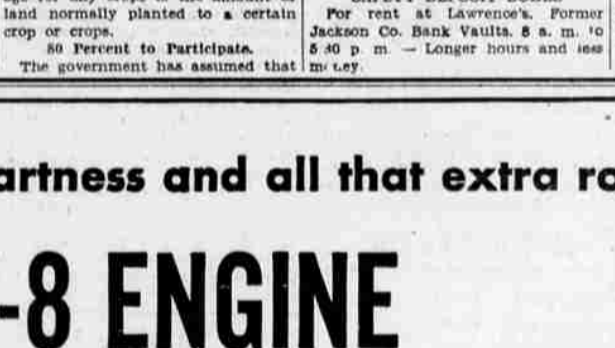

This is the engine which proved sparkling performance and eight cylinder smoothness are economical if you have a V-type engine with a dual-down-draft carburetor that takes the "gas" used by a four and splits it into eight equal charges.

This is the engine you need for quick, sure, cold-weather starting this winter—the engine that's "opened the eyes" of over two million enthusiastic Ford owners. You'll find such an engine in no other car at anywhere near the price of the Ford V-8 for 1936—So why not arrange to drive one today?
