LANDON ASSURES AMERICA'S YOUTH FUTURE IS BRIGHT

Candidate Assails Those Who 'Are Trying to Instill False Philosophy'—Administration Accused

TOPEKA, Kas., Sept. 18.—(AP)—Gov. Alf M. Landon assailed today "those who are trying to make youth believe that they have no future under the American system," and told a conference of national young Republican leaders here "the Republican party utterly rejects this philosophy."

The Republican presidential nominee, charging "the present administration apparently believes there is no future for this country," asserted his belief "that America is still on the upgrade, that we can eliminate unemployment, that the government should tighten the rules governing business, but should not attempt to manage business; that, in a word, America will once again be a nation where youth can be confident of its future."

Cites Campaign Issues. The presence of the conferees—young people of other parties also were invited—was interpreted by Landon as "proof that the American youth of this land is not willing to surrender liberty for a phantom security."

Declaring that governmental powers, their extent and method of exercising, constitute a campaign issue, Governor Landon declared that "the question raised by this issue—what powers the government shall have and what powers it shall not have—can be the difference between representative government and organized authority wielded by one man."

"Once that is clearly understood by the voters of this country, I have no doubt as to the results. I know that, in the minds of some people, this issue is not drawn as sharply as it should be, and that other factors confuse the issue."

Landon declared the present campaign "cuts across party lines," and "the issue is the kind of government and the kind of country we are to have in the years to come."

Youth Reassured. "To the young voters among your friends and neighbors," Landon admonished his hearers in the city auditorium and over a National Broadcast network, "I ask you to take this message: Tell them the choice before this country, in this campaign, is not whether there have been abuses in the economic system that need to be corrected. We know that there are such abuses and we propose to do all that is within the constitutional power of government to eliminate them. The issue is not whether the intentions of the present administration are good or bad."

"The real issue, as we see it, is this: The present administration apparently believes that there is no future for this country. It has accepted the idea that we have reached our peak—that ahead of us is a large standing army of unemployed; that in consequence, the government must play a greater and greater part in

managing the details of our daily lives instead of confining itself to the expanding field of regulation in the public interest. "The Republican party, on the other hand, utterly rejects this philosophy." He cited "the horrible suffering and distress of continued unemployment" and declared that to young people who have never been able to find employment "we must prove that our economic system still is capable of giving them work at full pay."

"The other side," he said, "presents alluring arguments that 'our industrial plant is complete—that henceforth we must live on what we have.'"

plishments and harmony. The cooperation and support I have received from members of the council and those holding municipal offices have been gratifying to me.
