Simple Home Treatment For Varicose Veins

Swollen veins may become dangerous and sometimes break. Sufferers are advised to get an original bottle of Emerald Oil at Jarmain's, Inc., or any pharmacist and start to reduce the veins and bunches at once. A small bottle will last a long time, because it is very concentrated and a little goes a long way. Apply at night and morning with a soft brush or the finger tips as directed until the swelling is reduced.
So effective is Emerald Oil that it is highly useful in reducing troublesome simple swellings due to strain and hastens their disappearance.

SALINAS STRIKERS STUMP OFFICIALS

SALINAS, Calif., Oct. 8.—(UP)—Lettuce strike pickets returned to Salinas streets today in the guise of newspaper vendors, a procedure which stumped police in their efforts to enforce a new city ordinance banning picketing.
While Chief of Police George Griffen was poring through city ordinance books, seeking some law to check the new demonstration, 20 men and women paraded through main streets carrying bundles of newspapers and shouting "Extras" and quoting from supposed headlines in the papers.
One of the typical cries appeared to be, "Read all about it; grower shippers unfair; force general strike." Scores of persons rushed up to buy the newspapers, believing they were legitimate extras. They proved to be old editions of various papers.
The new wrinkle in picketing when the strikers introduced presumably the first effort of the strikers to test the city ordinance, which they hold is illegal.

SUMMER KEEPING LATE DATE HERE

Medford folk who have found themselves uncomfortably warm during the past few days, with much shedding of coats and wiping of brows, are justified in their actions, according to weather bureau statistics. Yesterday's high of 95 degrees has only been equaled for the month of October during 1932 and 1933, when the harvest month also produced readings of 95. This is tops for the month since weather records began in 1911.
The low humidity prevailing this month, while not termed unusual by bureau officials, is of sufficient duration to constitute a distinct fire hazard. Yesterday's low of 13 per cent is considerably below normal and is indicative of the condition existing throughout western Oregon during the past several days.
No immediate change in weather is seen by bureau statisticians, although lower temperatures are forecast for tomorrow.
