"I say deliberately to the laboring men and women of America that Father Coughlin's explanation of our economic maladies is at least 50 per cent wrong, and that his monetary remedies are at least 90 per cent wrong.

"If the latter were enacted into law they would prove disastrous to the great majority of the American people, particularly to the wage earners."

Besides declaring that charges of communism against the president are "ugly, cowardly and flagrant calumnies," he denied that such New Dealers as Felix Frankfurter, Rexford G. Tugwell, Sidney Hillman and David Dubinsky were communists.

JAPAN THWARTS GADGETS ON FUJI

TOKYO.—(UP)—Majestic Mount Fuji has escaped another effort at modernization and climbers who want to get to the top will have to continue doing it on foot. A proposal for a cable-car route to the summit has been rejected.

The Home office, opposing the project, declared that such a railroad would mar the beauty of the mountain and have an adverse effect on Japan's national health.

The reasoning behind the second idea was that a railway would induce laziness and deprive many climbers

of the healthful exercise necessitated by the climb.

One report was that a series of anonymous threats had been made to bomb a railway if one were built. The newspaper Jiji understood the reported threats influenced the home office decision to some extent.

Raji, noted for its perfect formation, is 12,467 feet in height. Nearly 100,000 persons climb it annually.
