## Miss Weisner and Harold Bunce Wed

Surprising many of their friends here is the news of the wedding of Miss Frances Weisner and Harold Bunce. The ceremony was performed at Reno, Nev., Tuesday, according to word received by friends here. All arrangements were kept secret by the young couple, but efforts for a complete surprise were not entirely successful.

Both bride and groom are well known here, having been associated with the California Oregon Power company for several years. Their wedding is of much interest to a large circle of friends.

The couple plan a two weeks' trip in the south, after which they will return to be at home at 25 South Orange street.

DeMolays to Be Hosts Tomorrow  
Members of Medford chapter, Order of DeMolay, will entertain with an informal dance, "korduroy krawl," tomorrow evening at 9 o'clock, in the chapter rooms in the Masonic temple. The affair is the first of the social season.

General Chairman Alford Handley states that informal dress is to predominate and that anything other than cotton dresses and corduroy trousers will be looked upon with disfavor by the committees in charge.

Assting Handley are Dale Roberts, William Meyers, Donald Herried and Bruce Hammond. All Masons, members of the Mother's club, majority DeMolays, members of the advisory council and friends are extended a cordial invitation.

# Comment of the Day's News

By FRANK JENKINS  
EN ROUTE to Strawberry Flats, or somewhere thereabouts. Going hunting. Might as well. Customers all gone hunting. Maybe can beat some of them out of the brush and get a chance to talk to them that way. Couldn't find 'em in town, anyway.

THE reason for this exodus from the town is the hunting moon. The hunting moon, you know, is that magic season when the deer tire of their summer haunts in the high hills and begin to move downward to the lower and warmer valleys.

At this enchanted season the lucky hunter can sit beside a trail and look 'em as they pass instead of wearing down the soles of his shoes tramping the canyons for them.

(At least, that is the theory. But in many years of earnest endeavor this scribe has never yet caught the deer hurrying for winter quarters so intently as to leave them inattentive to their own best interests at the moment, so that they may be plucked at will from ambush. Still, anything MIGHT happen.)

THEY tell tall tales about this Strawberry Flats country in the good old golden days when there was more game than the hunters could kill.

The flats are a series of not-too-wide openings, flanked by timbered hills, and the idea is for the hunter to conceal himself at the edge of the timber and wait for the right one to come along. Even before the second quart is opened around the campfire, they'll tell you that in those good old days there were often as high as a half dozen deer down and being skinned out along the open flats while still the hurrying throng continued to pass and the hunters continued to shoot.

Tales like that are worth investigating. (It takes the first storms of approaching winter to cause the deer to hit the road. And while the weather at the moment is giving a first class imitation of the Fourth of July, the hope is fostered by the calendar that it might suddenly change. Buttreating this delusion is the fact that somebody's corns ached hopefully yesterday. Hence this excursion.)

NEARING Strawberry Flats, after several hours of dry and dusty travel. If it ever intends to storm again, it is giving a marvelous exhibition of nonchalant concealment of its intention.

Still, there are those aching corns. You can't afford to ignore portents like that.

Anyway, we're off for the races. HIST and a couple of shushes! Deer ahead in the gathering dusk! Frantic motions from the front seat to pass up that d—n gun and make it snappy. Suspense so thick you could still it with a wooden spoon.

Shucks! Just a band of does out for an evening stroll. Not a buck in the lot.

Darn this feminist movement. Especially in the deer season.

STRAWBERRY FLATS just ahead. What is the glow that stretches on and on? A forest fire? Alas, no! ("Hell, no!" is the way Sharkey actually put it, but this is a family newspaper, and Sharkey's speech must be censored.) The glow is the campfires of other hunters.

The secret of Strawberry Flats is out. Somebody must have talked in his sleep. And there isn't a cloud in the sky. For all the weather man is putting out, the deer may stay all winter.

So more tomorrow. Too full of gloom now to go on.

"Articles of confederation and perpetual union" creating the United States were signed in 1776.

## Electric Contact Results In Death

HOOD RIVER, Oct. 23.—(AP)—A shock, apparently resulting from the contact of an extension cord with a wet floor, and a fall which followed, led to the death yesterday of H. K. Davenport, prominent fruit grower. His widow found him dead in his apple washing plant when she sought him after he had failed to come home. He apparently had been washing out a tank and it was presumed the extension cord he was using for illumination touched the wet floor, causing him to fall against a furnace and fracture his skull. He was 52 years old.
