### INSTALL MACHINE TO HELP IN WAR ON TUBERCULOSIS

Purchase of a pneumothorax machine, one of the most modern inventions to aid the constant battle against tuberculosis, was reported yesterday by the Jackson County Public Health association. The machine, which is located at the Alex Sparrow Memorial clinic in the county court house, will also be available to other physicians of the city. Dr. C. J. Drummond, county health officer, stated.

The machine is the first to be brought into Medford, although it has been in use in some sections for almost 15 years. Prior to that time its benefits were practically unknown. Purchase of the machine by the health association is just one of many projects carried on by the organization in its vigilant battle against tuberculosis, for which the annual Christmas Seal sale is now under way.
