PROPAGANDA SEEN AS WAR IMPETUS BY PEACE TALKER

(Continued from Page One.) and children by German soldiers. That, McKaig stated, was one of the principal reasons America was drawn into the war, and that now it had been proved nothing more than propaganda.

"Making the world safe for democracy was another phantasmal joke," the speaker declared. "At present, 68 percent of the democracies at the time of the World War are now dictatorships under fascism or communism. And as for the 'war to end war' theme that was shouted at America, it is a known fact that nations hate each other more now than ever before."

Criticizes Churches Mildly blasting the churches and clergy of America, he stated that "We could have been kept out of war if the churches and preachers had turned thumbs down on it." However, he explained, clergymen all over America are today aligned solidly against America entering into another war on foreign soil.

He told how Senators Norris and LaFollette were "crucified" in the press and from the speaker's platform because they voted against America's entering the war and of how he, himself, was chased out of several towns where he was scheduled to address Granges on peace. McKaig fiercely attacked the huge steel and munitions manufacturers, asserting that because they had lent the Allies almost a billion dollars, they favored America entering the war so that they would be assured of receiving back their loans.

3-Part Program Three principal steps in the program to keep America out of a foreign war were pointed out by McKaig. They were: (1) In case the question arises whether or not America goes to war, the people should vote against it; (2) let the government take the profits out of war and the preparation for war and nationalize the munitions industry; (3) Strengthen the neutrality laws.

Paul E. Elliott, executive secretary of the Pacific Northwest Institute of International Relations, which is to hold a conference on the Reed college campus in Portland July 5-15, explained the organization of the Emergency Peace Campaign and the "No Foreign War Crusade." He said that \$1,000,000 was needed to carry out the program, about equal to the amount being spent by the government every eight hours for war preparations.

The Rev. James Hamilton introduced the speakers and thanked the Boy Scouts, schools and churches for their cooperation in helping to bring the two men to Medford and for their cooperation in the crusade. The Rev. Mr. Hamilton is local chairman for the campaign and pastor of the First Christian church.

RIDING ON A PASS

The appeal of the "pass" is the lure of "something for nothing." We wonder if we realize when "riding on a pass" that some one or group is paying our transportation? When by some means we have succeeded in buying some item of merchandise for less than its actual value, or in other words have gotten "something for nothing" do we ever stop to think that some one or a number of other people will have to pay MORE THAN THEY SHOULD for this or some other item in order to replace the loss which has been your gain. Intriguing as this lure may be, our reason forces us to realize that the "law of compensation" is always working. That in order to receive we are compelled to give. Just suppose we all rode on a pass. Who would pay the expense account? During our many years of business in Medford we have never believed in "riding on a pass" or that we could either get or give "something for nothing!" Our Policy has always been ONE PRICE TO ALL, and that price a FAIR PRICE!
