Why Laxatives Fail In Stubborn Constipation
Twelve to 20 hours is too long to wait when relief from constipation is so important. It is so important that you should know the difference between a laxative and a cathartic. A laxative is a medicine that acts on the stomach and bowels, and a cathartic is a medicine that acts on the bowels only.

Craterian Stars Comes to Rialto

When Jean Muir, starring with Warren Hull and Beverly Roberts in "Her Husband's Secretary," found that her husband took dictation from his secretary (who thought it was her place to make a home for the boss in the office), she begins a battle that brings about some strange situations. The picture comes to the Rialto theater for tomorrow and Thursday only. Youth, rapid-fire romance and hilarious comedy highlight "Too Many Wives," which plays as the top feature on the same bill with "Her Husband's Secretary." The film marks the first grown-up part for Anne Shirley and the first major role for John Morley, new discovery playing opposite.

Rotary Club Told of Mining Work in Latin America

D. Ford McCormick, mining engineer at the Sterling mine near this city, entertained the members of the Medford Rotary club today with reminiscences of his experiences in Central America. The speaker, with a background of 27 years as a mining engineer, gave a vivid description of his activities with a mining concern operating in Costa Rica and other tropical countries for the Rotarians assembled at the Hotel Medford for the weekly club meeting. Primitive facilities and native labor made McCormick's task a difficult one in foreign lands, while he pointed out, present day mining operations are expedited through the use of airplanes. In Costa Rica McCormick said he employed native and Japanese labor with most of the initial work accomplished by Spaniards. Improved methods of transportation and communication are rapidly facilitating the development of properties in foreign countries by American mining companies, he said. In most countries, the miners are virtually pioneers, according to Mr. McCormick. First they seek precious metals and gems such as gold and diamonds after which the mining activities are centered on other metals and stones. Interesting facts concerning the natives were outlined in the conclusion of McCormick's informal talk. An effort to perfect a centrifugal machine for handling free gold which will substantially reduce the use of water and power is being made at the Sterling mine near Medford, he told the Rotarians. The Rev. E. S. Bartlam, Joe Marshall and President George Henselman gave brief reports of the recent district Rotary meeting at Spokane as a preliminary feature of the meeting today. Complimentary copies of the Coronation of the Christian Science Monitor were distributed to the Rotarians through the courtesy of Miss Jeuneuse Butler.
