

MARKET OUTLOOK FOR ROGUE PEARS HELD FAVORABLE

Trade Generally Is in Optimistic Mood Over 1937 Prospects, Says Maurice Spatz After Trip East

A favorable national market for Rogue valley pears was foreseen today by Maurice Spatz upon his return from a month's business and observation tour of major consuming centers.

The Medford orchardist and packer said he found the trade generally in good humor. All whom he consulted were especially well pleased with this year's deal, he stated. Some profit was made not only on the fruit, but also on vegetables and the general sentiment for this year was optimistic, he related.

The trade was highly gratified over the handling of Rogue valley pears this year, the fruit arriving at consuming centers in excellent condition, a factor that bolstered retail sales, Mr. Spatz said. The ripening and general handling of the Booc in particular were commended.

"It is of great benefit to us to have the trade in good humor and a receptive and cooperative mood, especially in view of a probable increased production this year," Mr. Spatz asserted. "In all the cities I visited there was a feeling of optimism over the prospects of marketing a larger crop this year."

Mr. Spatz visited in Chicago, Washington, Philadelphia, New York, Boston, Detroit and Cleveland. He said he established excellent market contacts in all these centers for the Crystal Springs Packing company, operated by Spatz Brothers. His marketing arrangements, details of which he said he would announce later, were broad in scope, including both domestic and foreign outlets.

Results obtained this year by the advertising program of the Oregon-Washington Pear bureau were "very evident and certainly effective," Mr. Spatz asserted. He said that he went over this year's program with Roy Webster, the bureau's representative in New York, and that it merits the full support of all growers and shippers in the valley.

Industry Humming. Despite labor difficulties, economic conditions in general were described as good by Mr. Spatz. He said he made observations in several industrial centers and found factories running night and day, with much plant expansion in evidence.

Mr. Spatz related that he called upon Senator Charles L. McNary and Representative Walter M. Pierce in Washington and discussed with them the west coast fruit industry and the labor situation.

Remodeling and rearrangement of facilities to attain greater efficiency are now being carried out at the Crystal Springs packing house, recently acquired by Spatz Brothers. Some new equipment also will be installed.

The plans will handle both pears and apples, Mr. Spatz said. He stated that while on his trip he made special efforts to establish FOB selling connections and added that he was "very successful along this line."

ROBERT BRAGG, 76, PASSES IN TALENT

Robert O. Bragg, a resident of Jackson county for the past 24 years and for the last year and a half residing in Talent, passed away unexpectedly at his residence there early this morning, at the age of 76. Death was reported by the attending physician as an acute heart attack. Mr. Bragg arose early and was feeling in usual health and after breakfast went out on the porch where he was suddenly attacked with heart failure.

He was born in St. Charles county, Missouri, October 2, 1860. He leaves besides his wife, Corie J. Bragg, two sons, Fay M. Bragg of Silverton, Ore., and Robert O. Jr., of Talent. Also one grandchild, Colin Baxton Bragg of Silverton.

Funeral arrangements will be announced by Conger funeral parlors upon the arrival of the son from Silverton.

E. P. WATER PLANT READY BY JUNE 1

The Eagle Point water system, constructed under a \$73,000 PWA grant is 90 per cent completed, and will be in operation by June 1, according to County Engineer Paul B. Rynning. Mains are now being laid and pressure tests made.

Water is to be secured from the Medford water system, on a gallonage basis charge. A master meter has been installed.

The Eagle Point water system includes a reservoir, providing 100 pounds pressure, and fire hydrants. A main pipe, three-quarters of a mile long, from the main pipe line of the Medford system has been laid to the town limits.

According to County Engineer Rynning, the system will be the most complete of any small town in southern Oregon.

KING GEORGE KIN TO MOST RULERS LEFT IN EUROPE

Descended From Old German House of Hanover Through Both Father and Mother—Also a Windsor

LONDON, May 12.—(AP)—King George VI, third sovereign of the House of Windsor, can claim blood relationship with nearly every reigning monarch in Europe.

Descended from the old German house of Hanover through both his father and his mother, George nevertheless is a member of the British House of Windsor.

The House of Hanover generally was held to have been succeeded by that of Saxe-Coburg when Queen Victoria married Prince Albert in 1840. Victoria came to the throne by indirect succession, because her father's elder brothers—sons of George II.—died without leaving issue, and her father, the Duke of Kent, also was dead.

Because the Saxe law—restricting succession to male members of the royal family—does not operate in England, she took precedence over her father's younger brother, the Duke of Cumberland.

The House of Saxe-Coburg was short lived. War with Germany led George V.—father of the monarch enthroned today—to announce the foundation of the new House of Windsor. King Edward VIII, who abdicated, was its second head.

Descent of the crown would pass.

In the event of the death of King George VI. to Princess Elizabeth, heiress-presumptive—unless of course a male heir is born to him and Queen Elizabeth before then.

After Princess Elizabeth the crown would go to her younger sister, Princess Margaret, then to the Duke of Gloucester, as a younger son of George the fifth, the Duke of Kent, and the Duke of Kent's son, Prince Edward.

KIDDIES BEHAVE; CIRCUS TUESDAY

By Gardner Wilson

Medford, this week, will undergo an epidemic of neck and ear scrubbing. The youngsters, who each morning and evening, will so carefully remove all traces of the dirty have an ulterior motive. They are keeping in good graces with their proud parents, and making ready for next Tuesday when they'll all ask: "Just a dollar, dad. You know the circus only comes once a year."

For next Tuesday, with the crack of dawn the Al G. Barnes and Sella Photo Combined Circuses will arrive in Medford for an afternoon and night performance. The exhibition grounds will be located near the Jackson school.

Hundreds upon hundreds of the world's foremost acrobatic stars will be seen on the program. This season, as an added attraction the circus is featuring a serial ballet of 100 girls. This novelty, which is the first of its kind ever to be attempted, uses girls from the Hollywood studios. They were trained by George Cunningham, MGM dance director. Their dances, high in the dome of the great tent, are a sensation not soon forgotten. Another decidedly new offering this season is the Del Rio family. Known

Circus Thrills Soon for Folks Here

Circus sights and circus thrills will be seen in Medford next Tuesday when the Al G. Barnes and Sella Photo Combined Circuses arrives for an afternoon and night performance. The exhibition grounds will be located near the Jackson school.

as Leprahons—don't try to look the word up in your dictionary, for it isn't there—this little family, who hail from Spain, are reputed to be the smallest humans in the world. Paul Del Rio, the youngest, who is 16 years of age is 17 inches tall and weighs but 12 pounds. In all respects he is a perfect doll. His two little sisters, Dolores and Carmen, weigh jointly 45 pounds. Just in case you're

truly is "the daring young woman on the flying trapeze." Miss America hails from Berlin, dances and swirls on a madly awaiting trapeze, high in the dome of the tent, disdaining hand holds. Here is the last gasp in circus. Still others are the famous Christiani troupe from Italy. Lucio Christiani is the only man in the world performing a double somersault from the back of one galloping horse to another. The Flying Artions, Hal Silver, unrivaled genius of the high wire; The Three Polis and Bert Nelson, who this season performs with the largest group of ferocious wild jungle beasts ever assembled in the history of man, and still others.

Five herds of elephants, the largest number ever transported by a circus, 40 camels, which means two laughs a second, and 800 furred and feathered creatures in the menagerie are some of the sights coming to Medford with the Al G. Barnes and Sella Photo Combined Circuses.

If your son of high school age doesn't happen to arrive home in time for supper Tuesday evening, be a little lenient. He may be getting his first look at the 100 Hollywood beauties, likewise reputed to be the largest number and most beautiful girls ever to travel the country in one group.
