George, Cardinal Mundelein of Chicago, started another international furor when he termed German Propaganda Minister Goebbels "crooked," and called Chancellor Hitler "an alien Austrian paperhanger." STEEL TOILERS FACED BY PERSONNEL TESTS IN ORDER TO GET JOB

McKEESPORT, Pa. (UP)—When the steel mills hired men in the old days, the employment manager walked to the gate where applicants were assembled, gave them a hurried "once-over" and then pointed out the ones he wanted.

"You, you and you," he shouted. The new employee reported to the timekeeper and went to work.

Times have changed.

A. B. Holmes, employment superintendent of the National Tube Works, has interviewed more than 8,000 job-seekers in the past seven years.

"The company knows all about every man hired now," he said. "The employment office records the applicant's birth, age, weight, height, color of eyes and hair, his parents' names, social status, education and past experience.

"Physical examinations play an important part. The job-seeker must undergo a physical examination by the company doctor to determine his fitness for steel mill work."

Every Monday afternoon at 3 o'clock, Holmes receives applications. The applicant who stands around the employment office on any day but Monday hasn't a chance. And the best way to go about getting a job in the steel mills which this spring are riding a prosperity wave is to "tell the truth about yourself, but don't brag," Holmes advised.

"The applicant should come in and talk in a friendly manner," he said. "This is better than trying to put something over on the fellow who has been examining applicants a long time.

"It's up to the applicant to sell himself, but some overdo the part."

HELIUM SALE TO GERMANY URGED

WASHINGTON, May 27.—(AP)—Hugo Eckener, Germany's foremost dirigible expert, said today that regardless of what caused the Hindenburg disaster, "we must change over to the use of safe helium."

He urged the senate military committee to approve legislation which would make America's helium supply available to Germany for commercial aircraft purposes.

The German dirigible expert denied earlier testimony before the committee that the German type of dirigible could not operate commercially using helium, because of its reduced lifting power.

He agreed that at present prices helium could not be used economically, but said if production were increased, he believed the cost would fall nearly to the price of hydrogen.
