Comment on the Day's News

By FRANK JENKINS
RUSSIA, following the revolution, confiscated private property, and decreed that thereafter ALL property must belong to the state.

RUSSIA, that is to say, first destroyed the institution of private property, but now is REVIVING it by gradual steps.

AT THE revolution, when a new world was being built, Russia decreed that a MAN WAS A MAN, and one man as good as another. So all workers were paid alike.

Now Russia is paying good workers more than poor workers. A recent writer informs us that in present-day Russia factories the average wage at the top is THIRTY TIMES the average wage at the bottom.

THAT is to say, Russia tried out the theory that one man is as good as another and found it wouldn't work, so now she is paying good men more than poor men.

JAMESTOWN colony, as every high school student knows, was founded as a communistic enterprise. Everybody's earnings went into a common pot and everybody 'TOOK OUT EQUALLY from this common pot.

Under this system the colonists were slowly starving to death, so they CHANGED THE SYSTEM and gave to each man a plot of ground of his OWN, to be worked for HIS OWN BENEFIT.

Almost immediately, the lot of the colonists improved and reasonable plenty followed starvation.

HUMAN nature is human nature—always has been and always will be.

When human beings are permitted to KEEP what they earn, they are willing to work and save. When they AREN'T PERMITTED to keep what they earn they WON'T work and save.

All the theorizing in the world won't change that fundamental fact.

if the bill is called up, they will move to lay it on the table.

This parliamentary maneuver is perfect because the motion is not debatable. A vote must be taken on it immediately without any talk whatsoever.

Both sides want to avoid debate for an unquestionably good reason. In Indiana, Winston is for Van Nuys against; in Texas, Sheppard is for, Connally against; in South Carolina, Byrnes is for, Smith against.

A few of Mr. R.'s senatorial supporters are so convinced that tabling offers the best way out, they may develop a severe cold and confine themselves to bed when the vote comes.

Note—Presidential pals at the capitol feel Mr. R. waited too long before dickered for what he could get. His steam is gone. The court has outsmarted him by decisions which make court-packing seem unnecessary (or else Mr. R. won a triumphant victory without packing, depending on the way you look at it).

However, congressional advisers have been unable to make Mr. R. see it that way. They have reason to believe he will go on the air shortly and tell the people that the senate is preventing him from carrying on his program.

post sentries around everything German in the Franco army. Even members of General Franco's staff are not permitted ready access.

But those who have penetrated the sentries have learned several things. Example: German anti-aircraft guns have been proved most efficient.

Hitler is changing his technical personnel frequently on the Spanish front in order to give war training to as many as possible.

That conference of house leaders with the President on the legislative program was significant mostly for what was not said. Court packing was mentioned only casually.

Leaders do not waste time with non-essentials when they lock the door and get down to real business.
