GOOD RUN SALMON IN ROGUE, REPORT

A good run of salmon is now on in Rogue river, according to a state police report. Good catches of trout have also been made between Savage Rapids and the mouth of the Applegate river, with files.

Outlook for trout fishing in the county's streams is not favorable, the recent rains having raised and muddied creeks.

Most lakes have reported good catches the past few days, with bass and spinners as lure. Most of the roads, however, are reported too muddy for comfortable travel.

TREASURY PLANS TO REVEAL NAMES OF TAX EVADERS

(Continued from Page One.)

was dotted with names high in the business and financial world.

The investigating committee will decide whether to make public individual tax cases. When names are disclosed, the individuals are expected to be called for testimony.

The committee, composed of six senators and six representatives, will be appointed as soon as President Roosevelt signs the resolution for the inquiry, approved by the senate yesterday.

Chairman Doughton (D., N.C.) of the house and ways committee was expected to head the investigators. With preparations for the inquiry well under way, the house took up today the proposed extension of three-cent letter postage and "nuisance" taxes which bring in more than \$500,000,000 a year.

The postoffice department has estimated a return to two-cent postage would cut its income by \$80,000,000 or \$90,000,000 in the next fiscal year.

The "nuisance" taxes, which would expire or be reduced on June 30 unless their continuation is ordered, include admission and import taxes and excise taxes on products ranging from gasoline and chewing gum to automobiles and watches.

The "big three" of the treasury's preliminary inquiry into tax dodging—Undersecretary Roswell Magill, Counsel Herman Oliphant, and Revenue Counsel Morrison Shaforth—have been meeting this week to outline testimony before the congressional committee.

URGUE UNCLE SAM, JAPS, OUTLAW WAR

WASHINGTON, June 11.—(AP)—Secretary Roper, saying Japan and the United States "have all to gain through peace and good will," urged today that the two nations "resolve now and forever to outlaw war."

He spoke at a luncheon given by the commerce department's business advisory council for a Japanese economic mission which has been studying conditions in this country for a month.

The commerce secretary, calling attention to the recent Japanese-American agreement restricting cotton imports from Japan, said this accord "is a splendid example of wise procedure."

"The lesson taught," he said, "is to have frequent and frank conferences and never let any temporary differences defeat our abiding objective of solving any and all problems through peaceful means."

SUIT FILED FOR LAND FOR TALENT HIGHWAY CUT-OFF

Viola Pearl Williams and Ira Williams are named defendants in a complaint filed in district court today by the state of Oregon through the highway commission.

The commission seeks to acquire through condemnation proceedings land owned by the defendants for improvement of the Bear Creek-Talent section of the Pacific highway.

The complaint states that to avoid the expense and inconvenience of litigation, the defendants were offered more than the reasonable market value of the land but refused the offer.

Reasonable market value of the land, together with all damages if any, does not exceed \$350, the complaint says.

The highway commission asks that a jury be empaneled to determine the compensation to be paid for the land sought to be condemned and appropriated and that upon payment into the court of the condemnation assessed by the jury a judgment and decree be given to vest title with the state.

The complaint is signed by I. H. Van Winkle, attorney general, J. M. Devers, assistant attorney general and attorney for the commission, and J. W. DeSouza, assistant attorney for the commission.

BAUER NAMED FOR PLANNING BOARD ECONOMIC WORK

PORTLAND, June 11.—(AP)—Ormond R. Bauer, chairman of the state planning board, announced today the appointment by the national resources committee of Dr. Hubert A. Bauer as assistant economic geographer.

Dr. Bauer has been associated with the state planning board for the past year, serving at present as research supervisor of physical resources planning, the second Williamette valley report having been completed under his direction.

Educated in Germany, he has been a resident of the United States for the past 12 years, receiving his doctor of philosophy degree in 1930 while teaching at the University of Washington.

He is serving as consultant editor of a cooperative publication, "Physical and Economic Geography of Oregon," sponsored by the state system of higher education, and is engaged in a study of potential land development in the state through greater control and use of water.

In his new position, he will be assigned to work in this state in connection with the planning board.

SENATE PROPOSES COMMUNITIES PAY MORE FOR RELIEF

(Continued from Page One.)

bold congress that local contributions now range from 13 to 17 per cent of total costs.

Appropriation of \$1,500,000,000, he said, would provide WPA jobs for 1,730,000 persons for the year starting July 1, requiring dismissal of 500,000.

Byrnes, however, contended his amendment would nearly double the money available for relief. "If local governments comply with the 40 per cent requirement,"

"My own belief is that many projects are asked only because other communities are getting them, and when the local governments are asked to put up 40 per cent, their citizens will cause them to hesitate unless they are really necessary."

JOBLESS CENSUS BOARD SELECTED

WASHINGTON, June 11.—(AP)—Vice-president Garner named Senator Byrnes (D., S.C.) today to head a special senate committee to investigate unemployment and relief.

The inquiry was proposed by Senator Hatch (D., N.M.), and was voted yesterday by the senate.

Garner named Hatch to the com-

mitted, along with Senators Clark (D., Mo.), Frazier (R., N.D.), and Davis (R., Pa.).

In TOWN and COUNTRY

4 out of every 5 miles you drive are Stop and Go

IN the crowded city and the open road, too, you can't GO far these days without STOPPING!

The average motorist makes 30 stops every single day!

That's what runs up your daily driving costs. One traffic stop can waste enough gasoline to take your car a third of a mile!

Shell engineers, recognizing the waste of stop and go driving, developed a way to "balance" gasoline.

By completely rearranging its chemical structure, this unique balancing process does to gasoline just what cooking does to some foods—makes it "digestible."

Starting, shifting, accelerating—

always—your engine gets full benefit from Super-Shell's high energy content.

And you get the savings!

"Motor-digestible" is the best way to describe Super-Shell.

The next time you need gasoline, try Super-Shell. There is a Shell dealer in your neighborhood.
