# THURMAN INJURED WHEN CAR UPSSETS CRATER HIGHWAY

Jack Leslie Thurman, employe of the Medford Domestic Laundry, received extremely painful injuries and a shock when his 1937 Chevrolet sedan turned over on the Crater Lake highway near Shady Cove shortly before 7 o'clock Friday evening.

According to the attending physician, Thurman is confined to his home on the Paper farm near Rogue Lake on the Sams Valley trail with lacerations of both hands, a bad cut on the forehead, and probable concussion of the brain. His condition was not thought to be serious, the physician stated.

State police who investigated the accident said that according to a report by Norman Abel of Eagle Point, an eyewitness, the Thurman machine was traveling north on the Crater Lake highway about a mile south of Brady Cove at a high rate of speed. The car, Abel told state police, suddenly left the road at the right and followed the shoulder for about 60 feet, then ran into the bank and continued for about 150 feet. It hit a bump, Abel reported, rolled over on its nose, and bounced 25 feet out into the center of the highway and stopped, facing in the opposite direction.

Thurman was interviewed at his home following the accident, and was unable to tell state police what happened, although he said he thought the steering apparatus must have gone wrong. A state police officer administered first aid to the injured man at his home, and then called the Medford physician.

The new Chevrolet was a total wreck, state police said; only the tires being intact. It was towed to the Chevrolet garage here.

# REPORT IN WEEK ON DEAD INFANT

It will probably be mid-week before a report can be made on the examination of the body of the newborn baby found in an Ashland Community hospital room last Monday afternoon. It was stated yesterday by Assistant District Attorney George W. Neilson after his return from Portland.

Mr. Neilson took the body to Portland for examination by Dr. Frank Menne, noted pathologist and pathologist of the University of Oregon medical school. He quoted Dr. Menne as saying it would require three or four days more to complete the examination. The advanced state of decomposition impedes a rapid examination, Mr. Neilson said. It was estimated by an Ashland doctor that the baby had been dead three or four months when the body was discovered.

Investigating authorities stated yesterday they had received no word about the expected return of Miss Irene Simons, the nurse in whose room hospital executives said the body was found. Miss Simons left June 1 on a vacation to the mid-west.

# The Housewife "Research Professor of Economy"

SHE'S not a Ph.D. or an LL.D. She hasn't a diploma or a cap and gown. Her research is not done in the laboratory or the library. As a matter of fact, her findings are made, usually, in the street car, in the subway, in the suburban commuter's train.

She reads the advertisements in this paper with care and consideration. They form her research data. By means of them she makes her purchases so that she well deserves the title of "Research Professor of Economy." She discovers item after item, as the year rolls on, combining high quality with low.

It is clear to you at once that you . . . and all who make and keep a home . . . have the same opportunity. With the help of newspaper advertising you, too, can graduate from the school of indiscriminate buying into the faculty of fastidious purchases!
