

# PLACE NEW LOCKS ON COURT HOUSE

Changing of locks on the doors of all offices of the county court house has started and when completed there will be a complete new key set-up throughout and new master keys to entrance doors.

The move has been contemplated for some time by the county court and was taken as a precautionary measure.

The Lord only knows how many keys to the courthouse are out. County Clerk George R. Carter said today "The county court has been figuring on doing this for some time as a good business proposition."

Under the new order keys will be distributed only to accredited officials and employees.

## McMINNVILLE YOUTH GOING TO WEST POINT

McMINNVILLE, June 24.—(AP)—Glarence Lewis Elder received word of his certification to attend the United States military academy at West Point, as the nominee of Senator Frederick Stetler.

He was ordered to report July 1. Elder was originally named second alternate, the principal and first alternate failing to pass physical examinations.

## CRICKET POISON KILLS EIGHT HEAD OF CATTLE

BAKER, June 24.—(AP)—Ten pounds of poison, carelessly thrown from a truck used in a cricket poisoning project at Newbridge killed at least eight head of cattle Wednesday. Owners were riding today, looking for the bodies of others believed to have been killed.

Two of the animals were found inside the town of Newbridge and the others nearby. There were no crickets in the vicinity where the poison was thrown out.

## BANK ADVERTISEMENT WINS NATIONAL HONOR

PORTLAND, June 24.—(AP)—An advertising campaign for a local bank featuring Oregon industries won the Josephine Snapp award for the outstanding advertising achievement by an American woman in 1936 for Mary E. Pentland of Portland.

The presentation was made in New York by Senator Arthur Capper for the Advertising Federation of America.

## NEW PRODUCT AIDS ROOTS

Merk & Co., Inc., the largest manufacturers of chemicals in the United States have recently discovered a product which they call "Harmodin 'A'". They honestly admit that they do not know how it works but they have proven that it does promote root growth on plants and cuttings. The treated cuttings normally mature earlier and hence are likely to flower sooner.

Harmodin 'A' treatment will greatly lessen cutting losses from plant diseases as black rot of geranium and similar troublesome problems, according to the manufacturers. It is economical, safe, and easy to use. A small package is sufficient to treat from 150 to 600 or more cuttings, depending upon the required situation. Insulin 10 c. U. 40 is \$1.15. # HEAVY STICKING AID TO HUBBELL

By Associated Press

Carl Hubbell is back on the winning track, recovered from the mysterious non-winning malady that set in the day the Dodgers broke his two season winning streak of 24 straight.

The manner in which Bill Terry's Giants went about providing for Hub's ninth victory of the season, his 8-4 conquest of the Chicago Cubs yesterday, was equally heartening to the man whose club is locked in a bitter three-way struggle for mastery of the National league.

Yesterday's performance, in which the Terrymen landed on four of the Cubs' best pitchers, was gratifying to Terry and a warning to the Cubs, out in front by one game, and the Cardinals, tied for second with the Giants in the won and lost column.

# Comment on the Day's News

By FRANK JENKINS

THE San Francisco Chronicle says that most people who think are expecting inflation and most of those who don't think are HOPING for it. That rates as a smart crack, out it has a lot of truth behind it.

PEOPLE who think expect inflation because they see the government of the United States spending year

after year more money than it takes in. The inevitable result of that situation through centuries of history has been inflation.

Intelligent people know that what has happened in the past is pretty sure to happen again if the same conditions are present.

PEOPLE who don't think welcome the prospect of inflation, because they associate inflation with rising wages and rising prices and they figure that with wages and prices steadily rising everybody will be well off.

They don't stop to think that with steadily rising prices we merely swap more dollars for LESS THINGS.

AN intelligent and thoughtful citizen said to this writer yesterday:

"Bark in 1933, I was getting \$114 a month. I'm now getting \$175 a month. I ought to be a lot better off. But to save my life I can't make the \$175 go much farther now than the \$114 went back in 1933."

That's what inflation does.

WE ALL have the notion, you know, that OUR OWN incomes should keep on going up but that the cost of the things we BUY with our incomes should stay down.

Unfortunately, it doesn't work that way. What each of us does and what each of us gets contribute to the COST OF PRODUCTION, and as

the cost of production goes up prices rise.

After a while, we discover that our higher incomes buy no more than our lower incomes used to buy. It's REALLY TRUE that the only way to have more in this world is to work more and produce more. Schemes to get around this fundamental truth always seem to go down somewhere.
