

In musician's slang a trombone is a "slushpump," an accordion is a "box of teeth," a band leader is a "front man," and a woman vocalist is a "canary."

Dr. W. H. Echols, professor of education at Oklahoma A. and M. college, picks out his lecture notes on a typewriter he has used for 24 years.

The first soil survey of an Oklahoma county was finished in 1906.

PLAN PROTECTION FOR MEN SEEKING RETURN TO LABOR

(Continued from Page One.) The T-state labor deadlock, rejected the proposal. Regional leaders of the committee for industrial organization at Cincinnati, Ohio, sent an appeal today to each of the General City C.I.O. organizations to send a delegation of 50 to 100 members to Columbus tomorrow to protest to Gov. D. D. Dewey against the use of National Guardsmen to reopen steel plants in northern Ohio.

WAR BIRD'S NEST. This is a glimpse inside the Boeing Aircraft company's new assembly plant in Seattle. In the foreground is the biggest of all the "flying fortresses" soon to make its first flight.

the city—announced by C.I.O. leaders following the lifting of martial law at 7 a. m. today—apparently failed to materialize, according to Police Supervisor Capt. William A. Clark. 6,000 Inmate City Murray Kush, a strike leader, said, however, that 6,000 miners had reached the city. Two bombings rocked the port-cant section of Canton, Ohio. The first blast, said police, ripped out a section of the front of the Wheeling and Lake Erie railroad, leading into the plant of the Republic Steel corporation. It was the third railroad bombing in the vicinity since the strike started.

William Webster, Republic employe, reported to police that a blast tore off a section of the front of his home and damaged furniture and windows in nearby homes. Two bombings occurred at Warren, Ohio. One, police reported, was near Republic's open hearth plant. Major R. S. Ursprung, National Guard official at Warren, said an apparent attempt was made to bomb an automobile carrying state troopers. He said an explosion occurred just ahead of the car in the middle of the highway.

"An Old Trick" Meanwhile, non-strikers and company officials mapped re-opening plans at conferences in the strike-affected cities. John Owens, Ohio C.I.O. leader and director of the steel strike in Ohio, said of the blasts: "That's an old trick practiced by strike-breaking agencies in industrial strife from the beginning of time. It always is a strange thing that these happenings which terrify people and convince them of the necessity of having police protection result in no conviction of strikers."

Owens sent word along the scattered picket lines ordering strikers to hold their ground and refuse to return. Non-striking employes struggled through several gates of the Youngstown Sheet and Tube company plants to reconduct equipment. In Columbus, Ohio, Adjutant General Emil Marx said National Guard observers informed him 2,000 men had entered the sheet and tube plants there are three here. "We are going to continue striking," Owens said. He said his strategy announced last week of sending strikers into the plants with non-strikers and then starting a sit-down strike "does not hold now."

"We are advising our people not to go into the mills," he said. Nearly 10 million tons of limestone would be needed to neutralize the acidity of all the Oklahoma soil which needs lime treatment. Soil surveys have been completed in 26 Oklahoma counties and soil maps have been published for 13 counties. The average soil which is more than slightly acid should be given two tons of finely-ground limestone per acre. Boys' 4-H club work interested more farm and ranch boys in Texas in 1936 than since the World war. Closing time for Foo Late to Classics Ads is 1:30 p. m.

THE STORY OF COFFEE

Fact No. 9 There are various methods of preparing the green coffee for shipment to roasting plants. The general practice throughout the world is to handpick the fruit, although in some countries the cherries are allowed to become fully ripe on the tree and fall to the ground. The coffee is freed as much as possible of sticks, leaves, etc., and is then conveyed to the preparation grounds. Various preparation processes are on the larger plantations; the plantation including concrete grounds, large fermentation tanks, washing vats, mills, warehouses, stables and even machine shops. In Mexico this place is known as the Beneficio; in Brazil, the Cafezal. The first preparation is to remove the fruit pulp which is an outside layer of the coffee cherry. Next, the parchment cover of the bean, then the silver skin next to the green coffee bean under the parchment cover. The preparation in the various stages is done by various methods.

ATTENTION CHERRY GROWERS Account of the heavy tonnage of black cherries available here this year, growers are of the opinion there will still be a local cash demand sufficient to take care of the tonnage. Though we wish this to be true, we are afraid this will not be the case particularly so, if decent prices are expected. This same applies to the nearby San Francisco and Oakland markets. We Are Now Packing Black Cherries for Eastern shipment and also filling orders for Honolulu and Central American markets as far South as Panama Canal Zone. We have sold a quantity and we are now paying .07c per pound net to growers for a limited tonnage. Bing Cherries Must Be Picked While Red Bing cherries however, must be picked and brought in while red, not black if we are to have good keeping fruit which will help us to deliver these cherries to these distant markets. We are afraid some growers are going to wait too long before they pick letting these cherries get too ripe and then we will have to pass them up for packing purposes. We Are Packing Bings at Med. Ice & Storage We are now set up and packing Bings at Medford Ice and Storage Co. and we are fully equipped to pack a large quantity. We urge you to bring samples of your Bings in to us and let us advise you whether or not they are ready to pick. AMERICAN FRUITGROWERS, Inc. Sales Office End of North Central. Phone 1265

EX-REVENUE AGENTS HELPING TAXPAYERS IS SOLONS' PLAIN

WASHINGTON, June 25.—(AP)—Chairman Doughton (D. N. C.) of the congressional tax committee said today resignation of internal revenue agents to handle private tax cases was "almost a scandal." Senator La Follette (Prog.-Wis.), calling the turnover of bureau employes "one of the real problems in the struggle of the government to collect its taxes," asked for the list yesterday. Present statutes, Rep. Cooper (D. Tenn.) said, forbid individuals to practice tax law before the treasury within two years after they have given up departmental jobs. But they still can use the knowledge they have gained with the treasury, he added, and let a partner handle actual dealings with the department. Investigation of tax dodging will resume Tuesday. Explanations will be given of individual cases in which the treasury contends taxes have been reduced through personal holding companies. Helvering named nearly 60 persons yesterday, contending they had used that method. He did not charge it was illegal. The senate sent to the White House late yesterday a bill extending "nuisance" taxes and three-cent letter postage for two years. The levies cover a variety of articles, such as gasoline, sporting goods, firearms and automobiles and accessories.

PORTLAND UTILITIES ACCUSED BY PIERCE

WASHINGTON, June 25.—(AP)—Representative Walter M. Pierce, La Grande, Ore., accused Portland's private utilities today of attempting "to cover up" facts about municipal power costs. In a statement inserted in the congressional record, Pierce compared Portland rates with municipal rates at Tacoma, Wash., and then advocated widespread distribution to public bodies and co-operatives of Bonneville dam power, soon to be produced on the Columbia river near the Rose City. Pierce described Portland as "utility ridden" and said leaders in asserting that its citizens do not want public power, failed to give the facts on comparative changes.

YOUNG PRESBYTERIANS AT FIR POINT MEETING

Eight young people of the First Presbyterian church here are among those attending the annual Presbyterian Young People's conference at Fir Point near Glendale, which opened June 23 and will continue to June 30. Medford youth in attendance are Emma Jane Brewer, Edith Hodgkins, Geraldine Loomis, Ruth Thompson, Cleo Ellenburg, Bernice Baker, Lauren Skew, Jeannette Field. Several others planned to join them this week-end. A total enrollment of 60 is reported for the conference. A faculty of ten is headed by Rev. Forrest C. Traville, dean, Mrs. E. P. McFarland of Phoenix is among instructors and leaders for the conference.

COMPLEXION CLEARED

Have used three bottles of your Old Cherokee... surely has helped me... I feel like a different person... I have cleared my complexion up and removed those nasty spots which come under the eyes when the weather is slow. MRS. W. D. KELLEY, 3611 S. E. Lincoln St., Portland, Ore.

"SPECIAL OFFER"

FIRST FLYING BOAT MAKES FAST TIME IN SPANNING CONTINENT

NEW YORK, June 25.—(AP)—Richard Archbold, research associate of the American Museum of Natural History, dropped down on the waters of Pushing bay at 12:45:30 (E.S.T.) today with a 17-ton flying boat to inaugurate something new in transcontinental travel. With five other men he had flown non-stop from San Diego, Calif., in 17 hours and 3 1/2 minutes. He found no occasion to land on a lake or river en route and described the trip as "practically Perfect."

Whether he broke any records for his time of aircraft remained to be determined by officials of the National Aeronautic association, who checked him in. The machine, a consolidated boat powered with two Pratt & Whitney 1000 horsepower motors, left San Diego at 7:31 p.m. (E.S.T.) yesterday. Archbold said he planned to have an "early lunch" in New York, but the formalities of getting ashore and exchanging greetings delayed his trip to the table. Archbold came to New York to confer with museum officials and to have new instruments put in his plane prior to his departure. In about two months, for New Guinea to do research work. He will fly via the Hawaiian Islands, Midway Island and Guam on the route of Pan-American Airways clipper ships.

A serious problem of the poultry industry is the lack of proper feathering of broilers in many of the heavy breeds. It is as necessary to provide salt for animals when they are on pasture as it is when they are in winter quarters. Approximately 13,500 wolves, coyotes and bobcats are destroyed in Texas annually by state and federal agencies. Poultry experts believe there will be a scarcity of eggs on the fall market with a resulting rise in price. Oklahoma soil requires a half-million tons of limestone a year to replace the lime lost by leaching. A certain grade of sulphur has been found an efficient dip for goat lice.

Howard District 4-H Club Girls Hear Delegates

HOWARD, June 25.—(Spl.)—The three 4-H girls' clubs of the district met at the Frank Croucher home June 24, with their mothers and leaders, to hear reports of the Corvallis summer school delegates. Neva Croucher and Betty Hardy, the two delegates present, led the group in singing and gave splendid reports. Fern Carter was not able to be present. Betty Hardy won the first prize in short story-telling at Corvallis and played an accordion solo at the radio revue. Neva Croucher and Betty Hardy were selected to sing a duet at the radio talent show. Mrs. Croucher served refreshments to the 20 guests present in honor of Neva's birthday, then the girls finished the afternoon with games. The distinctive paper used in making United States currency costs the government 87 cents a pound. It is estimated 1,743,236 pounds will be used in 1937. Prof. R. C. Buley of Indiana university's history department each spring gives a 3-cent reward to the student who sees the first Robin. Surgeons removing the appendix of Herbert Ferguson, 56, Linton, Ind., coal miner, found a stone in it an inch and a half in circumference. Mildew on roses can be prevented by keeping the plants thoroughly sprayed or dusted. Will Evans of Goodwater, Ala., owns a pig with eight feet.

An Open Letter to Business Men By Fred M. Weatherford

My Dear Fellow Citizens: SINCE the founding of our nation and the adoption of the Constitution three institutions have served the motivating source of our national development; namely, the church, the school and the seat of government. The church, for moral discipline and the spiritual saving of life; the school for intellectual culture and the seat of government for the orderly development of society. It is now proven before our eyes, that without moral and spiritual stability, there can be no orderly function or adequate discipline in society. SOCIETY is changing to the role of social chaos. It can not be questioned that the greatest contribution to this condition is the forgetting of God in private and public life. "The wicked shall be turned into Hell and all the nation shall forget God."

A people can subsist in a program of orderliness with a certain percentage of its citizens disregarding the church, moral restraint and an equitable sense of social consideration. But when this percentage in a city or nation, reaches the point of overwhelming majority then the moral dikes break, and the flood of hell takes its merciless toll of human wreckage. MAN can not sell himself to a selfish social program, in desecrating God's Holy Day and otherwise violate the Divine order stifling the program of the church to a greater or less degree. Such a procedure impinges the power of the church in reaching youth for the building of Christian character. If our independence is to survive, attention must be given to the spiritual well-being of young life in religious instruction. This cannot be done by well-wishing. The hands of the church are tied, to carry on its program apart from the business world. A man can not train a family in domestic sobriety, if he does not set a proper example. A city of moral excellency can not be built unless the citizens display a spirit of moral rectitude, and interest themselves at first range, individually and collectively in giving due recognition to the claims of God; through the church, in building a citizenry that is God-fearing, law-obeying and considerately just, in its claim upon society. adv.

The Housewife "Research Professor of Economy" SHE'S not a Ph.D. or an LL.D. She hasn't a diploma or a cap and gown. Her research is not done in the laboratory or the library. As a matter of fact, her findings are made, usually, in the street car, in the subway, in the suburban commuter's train. She reads the advertisements in this paper with care and consideration. They form her research data. By means of them she makes her purchases so that she well deserves the title of "Research Professor of Economy." She discovers item after item, as the year rolls on, combining high quality with low. It is clear to you at once that you . . . and all who make and keep a home . . . have the same opportunity. With the help of newspaper advertising you, too, can graduate from the school of indiscriminate buying into the faculty of fastidious purchases!
