WORK IS RESUMED ON ROAD AROUND CRATER LAKE RIM

Two Gangs Working On Five Miles of Clearing, Grading East-Side Loop — Map More Contracts

CRATER LAKE (Sp) — Further reconstruction of the 35-mile rim road around Crater Lake has begun for the 1937 season with the establishment of two construction camps working on approximately five miles of clearing and grading from Kerr Notch to Vidua Falls on the east side of the lake. Plans are underway for three new contracts which may be awarded during the current season if federal allotments are forthcoming.

The Sam Orino contracting company of Bonneville, Wash., is grading two miles of rim road from Kerr Notch on a new route high on the eastern slopes of Dutton ridge. The project entails approximately 70 percent heavy rock work and will not be completed until the end of the 1938 season. The Dunn & Baker company of Klamath Falls is grading 2.9 miles from the end of the Orino

Albany Auxiliary Chorus

Playing a large part in advertising the state American Legion and Auxiliary unit conventions to be held in Albany, August 12, 13 and 14, is the Albany American Legion Auxiliary chorus. The chorus has filled several engagements throughout the county and adjacent counties. Front row, left to right, Mrs. Gleda Spor, Mrs. E. B. Williamson, Mrs. Edwin Fortmiller, Mrs. Forest Campbell. Back row, left to right, Mrs. Stanley Bayliss, soprano soloist, Mrs. W. H. Kurtz, Mrs. E. P. Edwards, Mrs. Hazel Ewing, Mrs. Wallace C. Eakin, Mrs. Lyle Bain, violinist, and Mrs. Marshall M. Woodworth, accompanist. Not in the picture, Mrs. Ralph Coleman. Lorance Dossett is director.

Job to Vidua Falls. Over 50 percent of rock work is involved. The contract is expected to be completed this year. To rush the work through, a new 2 1/2 cubic-yard power shovel has been acquired. In addition to a one-yard shovel already in use.

To Employ 300
Each camp expects to employ 100 men when in complete operation. Employees are hired through the federal reemployment agency in Klamath Falls where applications must be made.

Invitations to bid on the rock surfacing of four miles of rim road from Cloudcap to Kerr Notch on the east side of the lake have been issued. Bids must be filed by July 14. This job includes 3300 cubic yards of unclassified excavation, 10,000 tons of heavy base course surfacing, 7500 tons of crusher run top course, 200 lineal feet of curbstone, 800 feet of log guard rails and 400 tons of boulders for landscaping. If new allotments are not made available for the hard surfacing of the rim road from north entrance to Cloud-

Plan Auxiliary Conclave

Here are the ladies responsible for all arrangements pertaining to the Auxiliary Legion convention, to be held in Albany, Oregon, August 12, 13, 14. Reading left to right, seated, Mrs. Dorothy Bacon, unit president; Mrs. Lenore Talbot, general chairman; Mrs. Wilfred Mandley, chairman of housing; Mrs. G. Glen Holmes, chairman of the convention tea. Back row, Mrs. Conradina Fromm, treasurer; Mrs. Julia Fortmiller, chairman La Varieties show; Mrs. Paul Dawson, secretary of the commission.

The section of road now being graded by the Orino and Dunn and Baker companies is about 700 feet higher than the old route from Vidua Falls to Lost Creek. It opens a new scenic area of the park and will provide motorists with a more revealing view of the surrounding country. It will pass through Sun Notch about 1000 feet back from the crater rim before dropping down to Vidua Falls.

Landscaping Planned
Observation points, attractively landscaped and providing space for a large number of cars, are conveniently located around the route and will be used in conjunction with conducted rim motor caravans. Special attention is paid in the construction of the road to preserve all landscape features, holding damage to natural features to a minimum. The rim road cannot be observed from any section of the crater edge, no unsightly earth cuts being visible. Attention to this phase is paid by Francis G. Lange, resident landscape architect of the national park service, branch of plans and design.

The engineering problems of rim road construction are under the supervision of the federal bureau of public roads in cooperation with the national park service. W. R. Struble, resident engineer stationed at Crater Lake, is in immediate charge of activities, assisted by a staff of engineers.

Heads Host Unit

Mrs. William H. Bacon, president of the American Legion auxiliary unit at Albany, who is giving much time and effort in making plans and arranging for the auxiliary's part in entertaining the state convention here next August.

Convention Head

Z. E. Merrill (above), general chairman of the 1937 Oregon American Legion convention, to be held in Albany, August 12, 13, 14, has been very active in Legion work during the past ten years in Albany. He was chosen for the general chairmanship because of his leadership and executive ability in handling details connected with such a large undertaking as preparing a program for a state Legion convention.

Merrill was commander of the Albany Legion post for two successive years, and was commander of district No. 3 for one year. He was elected a delegate to the national Legion convention on four occasions, and attended three of them. Legionnaires of Oregon will find the Albany convention well organized

EDWARD A. WARD HEADS OSTEOPATHIC SOCIETY

CHICAGO, July 8.—(AP)—Dr. Edward A. Ward of Saginaw, Mich., was elected president of the American Osteopathic association at its 41st convention today.

Dr. Arthur E. Allen, Minneapolis, was chosen president-elect.

The association was told habitually poor posture may cause sterility in both men and women.

- so does Coffee!

We take the tip — protect AIRWAY's freshness in the bean till the moment you buy it!

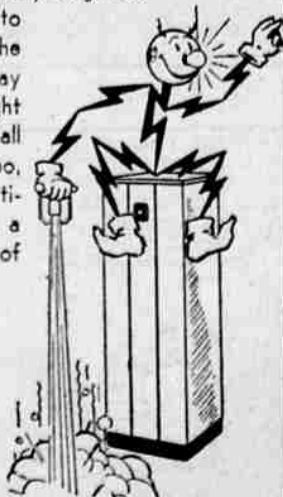

"No More Hot Water Battles—

it's CONTINUOUS now!"

Who's going to have the hot water can be a real bone of contention in any otherwise happy household—particularly in the morning. The loser in the daily argument is likely to develop a grouch that lasts all day long, too.

But once an automatic electric water heater comes into the house, hot water battles are over. There's all the hot water that everyone wants, at any time of the day or night. No one gets blamed for forgetting to light the heater, because the heater takes care of that all by itself. And it's such an inexpensive convenience, too, that there's no need of anyone putting up with antiquated and inadequate water heaters. A few cents a day supplies the average family with an abundance of hot water.

The California Oregon Power Company

Fresh? You bet it is! AIRWAY coffee...in the bean...is rushed straight from the roasting oven to your grocer, and ground to order while you wait!

That's why it's always so good, so downright delicious! That's why AIRWAY has made such a tremendous hit with coffee drinkers who demand quality. For AIRWAY is high-grade coffee...blended from choice mountain-grown varieties, perfectly roasted, and packed in a practical paper bag that's an out-and-out money saver!

Naturally, we think AIRWAY Coffee is just about the freshest, finest blend that anyone's grocery money can buy! But we leave it to you! Try a pound of AIRWAY today. Brew it the way you like best. See if you aren't pleased with its whole-bean freshness...its satisfying flavor...its frank economy! Honestly, here's a coffee value you shouldn't miss. Every pound guaranteed to give you complete satisfaction...or every penny of the purchase price returns to your purse!
