

FISHING IS POOR IN FOREST AREA, SURVEY REVEALS

The following sports bulletin was issued today by Rogue River national forest headquarters: "Fishing within the national forest is now generally poor, with fair results being obtained in a few places. The huckleberry crop is not yet quite at its best for the season in most places and berries will not be very plentiful at any time this year. Continued clear atmosphere, green undercover, and good road conditions make camping, swimming and touring ideal throughout the forest."

"In the upper Rogue river, fair catches are being made by a few fishermen with flies, gray hackle and brown flies being the most popular. Campgrounds at Muir, Foster and Natural Bridge camps in this district have recently been improved with the installation of rustic tables and stoves."

"Fishing is poor in the Blue Canyon area and the smaller streams in the south fork of Rogue river area but is fair in the middle and south forks of the river and in the Seven Lakes basin. In Fourmile lake and the Sky lakes group it continues to be good. It is fair in the Applegate river but not good in its small tributaries because of low water."

"At Lake of the Woods the west side road is now closed to travel because of construction work being carried on from the north end to a point beyond the Boy Scout camp. It is open from the south about one-half way up the lake. Those having summer homes more than half-way north on the west side will not be able to reach them by automobile this week-end. The road will be opened at the earliest possible date."

DEMAND RESPECT OF ALL RIGHTS IN FAR EAST CRISIS

(Continued from Page One.) injury to any American interest was considered in informed circles to mean that this government apparently had no intention of withdrawing from the Orient.

Informed persons said they believed the United States was looking upon the Far Eastern crisis as an incident which it would not permit to change the long range plans of this country in international affairs.

On the basis of this opinion it was assumed by observers that the United States believed withdrawal of its interests from the Far East would weaken its position as an advocate of world-wide peace.

By maintaining its position in the Far East, these observers said, the United States could continue to urge its plea for non-intervention in the internal affairs of other nations, advocacy of peaceful negotiations in international disputes and other salient points of the American peace policy recently reasserted by Secretary Hull.

May Bring Climax Some observers thought a blockade by Japan would bring to an immediate head the question of whether President Roosevelt must invoke the neutrality law. This law, which embargoes shipments of munitions to belligerents, must be invoked when the president decides war exists. The question raised by observers was whether a blockade might be considered legal evidence that a war—still undeclared by Japan or China—is actually in progress.

Pioneer Woman Dies OREGON CITY, Aug. 27.—(AP)—Funeral services will be held Sunday for Mrs. Caroline Bruns, 89, pioneer resident of Clackamas county and the first queen mother of the Sandy Pioneer association. Mrs. Bruns, who came to the district in 1873, died at the home of her son, Edward Bruns, of Sandy.

WEEK-LONG RAINS CAUSE FLOODS IN EASTERN SECTORS

(Continued from Page One.)

damage in central and southern New York state and in northern Pennsylvania, swollen rivers continued to rise in threatening floods in North Carolina, while railroads and highways were seriously damaged by inundations as far west as Colorado. The New York and Pennsylvania flood fears eased during the day under clearing skies, but not until the storm's rainfall had reached 5.83 inches at Corning, N. Y., the heaviest precipitation since the all-time record mark of 7.90 during the 1935 flood in the same area.

Nebraska Passed By In the midst of this virtually nationwide rainfall, Nebraska continued to experience a devastating drought which brought 300 county officials together to plead for state and federal aid. Although crops of corn and soybeans would be good in the eastern third of the state, in other sections the dried stalks were being cut for fodder. Infantile paralysis outbreaks worried health officials who hoped for cooler weather to aid in checking them.

New York state residents of sections ruined by 1935 floods feared a repetition of that devastation. Roads were inundated, power lines were disrupted, families were evacuated from threatened homes, and livestock was endangered in the area, extending from Watkins Glen 100 miles south toward Wellsville, Pa., and west as far as Painted Post.

Pennsylvania Deluged Every section of Pennsylvania reported a heavy downfall, although cloudbursts did most damage in the northern tier counties along the New York state border. Wellsville was hit hardest, with water running eighteen inches deep in Main street. Heaviest rainfalls during the 24-hour period ending at 7:30 a. m. E.S.T. were reported in Pensacola, Fla., 2.68 inches, Washington, 1.52 inches, and Raleigh, N.C., 1.18 inches. Airplane traffic, halted temporarily last night by rain and fog at Newark airport, N. J., was resumed today. Oppressive humidities and higher than average temperatures prevailed generally in other sections of the country.

OREGONIANS DEPART WAR TORN SHANGHAI

WASHINGTON, Aug. 27.—(AP)—Approximately 100 Americans left Shanghai aboard the liner President McKinley, some disembarking at Hongkong, others continuing on toward Manila.

Those remaining in Hongkong included Mr. and Mrs. Robert Henningsen and son, Robert Jr., and daughters Joan and Margaret, all of Portland, Ore., and Mrs. E. W. Pedersen of Roseburg, Ore. Those en route to Manila included Marthore Henningsen of Gearhart, Ore., and Ralph Scherer and Mrs. Mary Rebarber Scherer and son, Alfred Rebarber, all of Klamath Falls, Ore.

HUCKLEBERRY CROP IS NOT PLENTIFUL

The huckleberry crop is not yet quite at its best for the season in most places and berries will not be plentiful at any time this year, Rogue River national forest headquarters stated today. "The berries at Huckleberry mountain are not yet at their best. In the vicinity of Lake of the Woods they are very scarce and in the Butte Falls district they may be found in limited quantities near the south fork of Rogue river, Parker Meadows, and Gypsy Springs," headquarters reported.

FLOOD CONTROL BILL SIGNED BY PRESIDENT

HYDE PARK, N. Y., Aug. 27.—(AP)—President Roosevelt started his three weeks' stay at the summer White House here today by signing the 1937 flood control bill authorizing \$34,177,000 of new projects.

In a separate statement the president criticized a provision for a pollution survey of the Ohio river by the war department, saying this was a public health service matter. He said he was asking the war and treasury departments to appoint a committee of three to conduct the survey—an Army engineer, a health service representative and a non-government expert on pollution problems.

Mt. Kamet, in the Himalaya mountains, is the highest summit ever climbed by man.

Fair Will Pay \$10 To Biggest Family

SALEM, Aug. 27.—(UP)—It is unlikely that Papa Dionne will bring his family to Oregon for the state fair, so it looks probable that an Oregon family will take the \$10 prize which will be offered the largest family to attend the fair Sunday, September 12, "Big Family" day. A prize will also be given the family comprising father, mother and at least two children, who come the greatest distance.
