

### GOOD RECORD SET FOR FIRE DAMAGE ON ROGUE FOREST

Only 68 Blazes Reported in Comparison With Average of 94 — But 14 Caused by Man—Loss Is Small

One of the most favorable fire records in its history was established this year on the Rogue River National forest, statistics at headquarters here today showed.

Sixty-eight fires were reported and extinguished this season in comparison with an average of 94, the records disclosed. Of the 68 fires only two burned over areas in excess of 10 acres and no merchantable timber was lost. One hundred and fourteen acres within the Rogue protective area, a large portion of which was grassland, were burned over, but damage was negligible.

Of the 68 fires, 54 were caused by lightning. Only 14, or about 20 per cent, were man-caused, the records show. This represents a decrease of 12 per cent in the number of man-caused fires over last year's figures.

Service Is Grateful. "This showing is very gratifying to the forest service," said H. C. Obye, assistant supervisor of the Rogue river national forest. "It is an indication of the public's appreciation of the value of the forests to the community and the nation. In addition to the greater caution shown by the public, other factors contributing to the splendid record were the comparatively short fire season, generally favorable weather conditions and the season-long training program carried on with the members of our protective organization. In our protective program the CCC played a very important part."

### Western Auto Has Fall Festival Of Motoring Specials

Coming at a time when motorists are equipping their cars for winter driving, the fall festival of values, now in progress at the Western Auto Supply company, is a most timely event, declares Charles Pritchett, local manager of the firm. He states that scores of reduced prices presented in this event mean greater savings for car owners on accessories, tires, batteries and oil.

"One of the outstanding features of the Fall Festival of Values is the special sale prices now in effect on powerful Western Giant and Wizard batteries. Of unsurpassed quality, these batteries are built to meet the increased drain of winter service and extra electrical accessories," the Western Auto manager asserts. "Automobiles have always enjoyed full value for their money when buying these batteries, and now the special reduced prices make Western Giants and Wizards unprecedented values during this event."

"Economical motorists will also appreciate the extra savings on Western Giant tires being offered during the Fall Festival of Values," Pritchett continues, "for it is a most opportune time to replace old, worn tires with new, safe-treaded ones at an even greater saving than Western Auto's regular low prices afford."

"Of scientific design to give greater traction, longer tread wear and extra blowout protection, Western Giant tires set high standards of quality. Each tire sold is accompanied by a long all road hazard guarantee that is backed by service at all our more than 170 stores in the west. These high standards of quality and long time guarantees have made Western Giants favorites with hundreds of thousands of western motorists, and their reputation for greater value has spread until today there are more than a million of our tires giving daily satisfaction in every sort of service."

"The current sale event is also an ideal time for automobile owners to change to a winter grade of motor oil, for special low prices will prevail as long as the event is effective. Included in this event are high grade lubricating oils especially refined to our high standards of quality."

"Economical motorists who investigate our Fall Festival of Values will not only appreciate the extra savings on tires, batteries and oil, but also those that prevail on many other automobile accessories and supplies."

### EUGENE MAY UTILIZE BONNEVILLE POWER

EUGENE, Oct. 15.—(P)—If Bonneville transmission lines are extended into this area, Eugene will consider the possibility of making connections for its own system. J. W. McArthur, superintendent of the power utilities, said today.

He will confer with J. D. Ross, Bonneville administrator, at an early date.

NEW YORK, Oct. 15.—(P)—The society of the Daughters of Preachers buzzed today with vehement protests to a woman novelist's assertion that "ministers, generally speaking, are unfit" to be fathers.

### WHY UDGA TABLETS CURB EXCESS ACID DISTRESS OF STOMACH ULCERS

If your stomach pain is accompanied by GAS, heartburn, belching, bloating, burning, INDIGESTION, nausea, etc., don't take baking soda, dangerous drugs or half-way measures, but follow the advice of the thousands of former acid-stomach sufferers who recommend UDGA Tablets to help neutralize excess stomach acids. UDGA Tablets, based on a physician's successful prescription, work so fast to bring relief from excess acid stomach distress. Week's treatment supply only \$1.00. Get UDGA and relief or get your money back. Recommended by

WESTERN THRIFT STORES and all good drug stores.

### Girls Community Club Is Outstanding

Outstanding among the youth organizations of Medford is the Girls Community club, pictured above and located at 229 North Bartlett. The purposes of the club are four-fold: To provide clean, supervised living accommodations for young working girls at a price within their means; to assist women and girls in finding employment; to offer educational classes under trained leaders; to provide a meeting place for youth and civic organizations. The spacious, attractive club room was used during the past year by more than 35 such organizations.

The club house is supervised by Mrs. Florence Laing, resident matron. The club's board of directors is headed by Mrs. Dolph Phipps, and includes the following members: Mrs. William Holloway, Mrs. Aletha Vawter, Miss Margaret Kerr, Mrs. Porter Neff, Mrs. M. M. Morris, Mrs. Lawrence Pennington, Mrs. Don Newbury, Mrs. Mary Brown, Mrs. Henry

Welshaar, Mrs. Louis Humphries and Mrs. Martin Luther. One of the most important of the club's activities is the employment department through which approximately 350 women and girls were placed in part or full time positions during the past year. Classes sponsored by the club have included: Public speaking, drama, etiquette, contract bridge, knitting, music, basketball and badminton. All of these activities have been supervised by experienced volunteer leaders. No charge is made for tuition or activities. Projects of interest for the coming year include a school of domestic science which will be offered free of charge to girls desiring to gain expert training in domestic work. A corps of experienced instructors in the various branches of domestic science have been secured and the course will start about November 1. Girls interested in the course should call the Girls' Community club, 981-

L or Mrs. Dolph Phipps, 301-J-1. The girls' Community club is maintained through funds raised in the annual Community Chest campaign. Closing time for Too Late to Classify Ads is 1:30 p. m.

### Music and Special Diet Aid Egg Factory Output

By Aurelius Kinsey AP Feature Writer CHICAGO—"Good morning folks—It's time to get up—one, two, three, stretch."

Radio setting up exercises start the day for 5,500 leghorn hens producing 4,200 eggs a day in Chicago's downtown, four-story egg factory.

Later in the day they get soothing organ music; and that, says eggmaster H. H. Bond, is the hen's delight—a great egg producer. Scientific egg production in the factory has proved such a success that the managers are adding another battery of 3,000 hens to keep up with orders.

Bond, an Englishman who began "manufacturing" eggs in 1935, says his method enables consumers to get just the color they want in an egg.

"Farm hens run around and eat this and that in addition to their regular feed," he says. "When they eat too much green feed, the egg yolks are dark. Consumers like light-colored yolks, and that is what we get here because we balance the diet."

"We give the hens a regulated mixture of dried milk, meat scraps and green feed. We keep the protein content at 15 percent, compared with 18 or 20 per cent in the average farm diet—because our hens cannot get as much exercise in their cages. Once a week we give them grain impregnated with cod liver oil. This substitutes for the sun our indoor hens do not get."

Life in an egg factory is a snap for the hen—as long as she rolls out a minimum of 15 eggs a month. If she slips, she is headed for the butcher shop. An egg, as soon as it is laid, rolls

into a trough in front of the hen's individual "apartment"—a wire cage 18 inches high, 18 deep and 12 wide. When collected, it is credited to her on her own scoreboard.

The apartments are arranged in tiers 20 feet long and three stories high, accommodating 60 hens to the block. A trough supplies the cages with running water. The hens get their feed by sticking their heads through the front doors and pecking from private bins. Special apparatus cleans beneath each tier with the turn of a crank at the end of the block.

Each floor of the egg factory has its radio loudspeakers. Bond insists the hens not only like their music but it keeps them healthy. "Our records show," he says, "that the hens closest to the loudspeakers lay more consistently and have less sickness than those farther from the music."

### PREFER MARBLE FOR NEW LIBRARY

PORTLAND, Oct. 15.—(P)—White marble, Wilkinson sandstone or limestone will go into the walls of the new state library building in Salem, the state capitol reconstruction commission decided in preparing to call for bids on the material.

White marble, while more expensive, was preferred because of its use in the main capitol building now

under construction. Bids will be asked on all three, however, and an alternative chosen should the cost of the marble prove excessive. As a necessary formal step, the commission voted to accept a federal grant of \$450,000 for the library structure.

The contract with Whitehouse & Church, Portland architects, was approved in final form.

Pedestrian Run Down. SALEM, Oct. 15.—(AP)—Lior, Zinsner of Coburg was arrested here late yesterday after his automobile had run down Archie Wigger, who was crossing a street in the downtown district. Wigger was rushed to a hospital. Zinsner was charged with violating the traffic signals.

Edith Louisa Cavell, the British nurse of World war fame, was shot on October 12, 1915.

LOAD UP WITH PETERS  
**VICTOR**  
SHELLS FOR UPLAND GAME

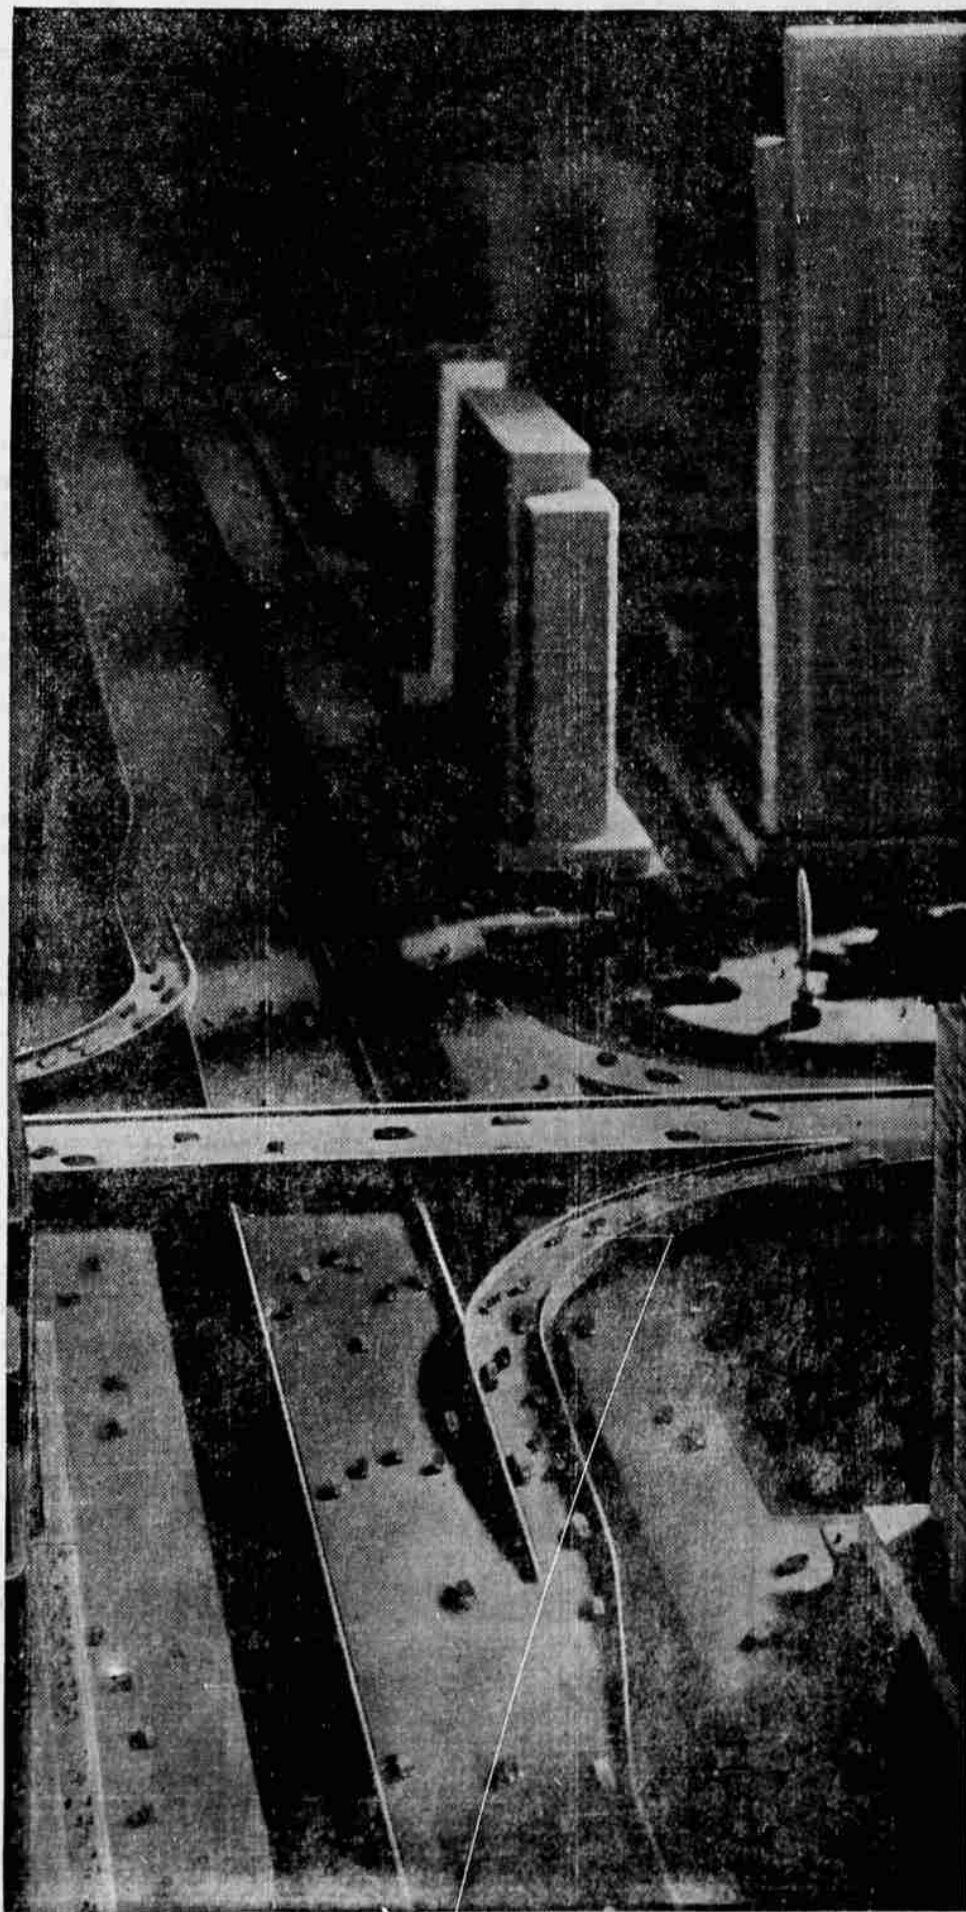

Hard Hitting  
Dependable — Low Priced

HERE'S the load that's designed especially for upland game. It has many of the features of Peters most expensive shells, and is made with the same precise care... yet it's priced low to meet your hunting needs. Ask your dealer about the Victor Shell.

**PETERS**  
DUPONT

Peters Victor—the dark red shell with the knockout wallop.

## In the City of TOMORROW—

you'll cross right under Main Street

predicts NORMAN BEL GEDDES, authority on Future Trends

"You won't have to wait for traffic lights to change when you want to cross Main Street in 1960," says Mr. Geddes. "Conveniently located underpasses will take you right across without a stop."

"Traffic going 10 blocks or more will speed along 50-mile-an-hour Express Streets connected by ramps with a network of Local Streets."

"These local streets will also be free from interference—from building-line to building-line. Open areas beneath buildings will provide parking space... loading platforms for trucks. Pedestrians will use elevated sidewalks—shop and cross streets at the second-story level."

# ...but TODAY, 4 miles in 5 are Stop and Go

NO MATTER WHERE YOU LIVE, you average 30 stops a day... and one stop can waste enough gasoline to drive you 5 city blocks!

That's why stop and go is costly!

While traffic authorities are planning "the City of Tomorrow," Shell engineers have developed a fuel, Super-Shell, to meet today's driving problem TODAY.

They have found a way to rearrange the chemical structure of gasoline... actually to balance it!

Automotive engineers use the term "motor-digestible" to describe Super-Shell, because at all motor speeds it is converted so QUICKLY, so COMPLETELY into power.

The regular use of Super-Shell will save money on your stop and go. There's a Shell dealer near you.

## Wards New Low Priced OVERALLS
