FRESH FOODS

Winter Health

NEARLY every health authority emphasizes the importance of the proper diet for the winter months. Some go so far as to say that many of the winter ills are directly traceable to the lack of certain food vitamins.

One of the best sources of these vitamins is in breakfast cereals. Freshness, however is very essential.—The cereals should not be too old nor should they have been stored where exposed to moisture.

That is why we feature the cereals that have been milled nearest to Medford.—They are in transit less than 24 hours and are immediately stored in our dry, well heated stores where the damp winter moisture cannot affect them. Stocks are renewed weekly—it isn't possible to get fresher cereals than Sperry's from your Groceries. They are milled in Portland and because of big volume the stock is renewed often.

Cereals like all foods are freshest where sold fastest.

Super Meat Markets

Quality Controlled Meats

MINCE MEAT

NEARLY every day someone comments on the goodness of the Mince Pies served at our fountains. Occasionally we are asked for our recipe.

Frankly our recipe hasn't much to do with the goodness of the pies.—It's just a case of using good mince meat. You can have the same good pies if you will but use the same kind of mince meat.

There is a large range of quality in mince meats. Some can be bought for less than the cost of any good ingredient used in the making while other grades range in price up to where you are paying a fancy price for the name of the maker.

We tested more than 30 different mince meats and finally selected a good old fashioned New England brand which we believe to be the best value.

It's the kind we use in our own pies.—It can be bought at either meat market.
