ment of cabins in a straight line or around a rectangle has been purposefully avoided. So also has been the customary arrangement of placing the garage next to the apartment with both facing the same way.
Solid Construction.
From a single recessed entrance door will lead from the side to each apartment of the duplex unit. The floors will be on concrete, with a border simulating tile. Walls will be of six-inch hollow tile, with an exterior stucco finish and an interior finish of cement sprayed with a cement paint. Materials were carefully selected, it was emphasized, to prevent the absorption of moisture.

In addition to the thick walls and six-inch concrete floors, solidity is provided by a footing of concrete 15 inches deep. Insulation also was carefully planned to make each apartment soundproof and to repel the cold of winter and the heat of summer.

Each apartment will comprise a spacious bedroom, complete bathroom with shower stall and an ample clothes closet. The garage, forming a contiguous part of the apartment, will be at the rear, with a direct entrance to the cabin.

The apartments are to be completely and luxuriously furnished, the furnishings to include a bed, studio couch, rug, occasional chairs, floor and table lamps and a circulating gas heater designed to eliminate fumes.

To Landscape Area.
The whole area is to be landscaped and heavily arubbed with rose bushes and English ivy, it was said. A plot is to be set aside for the recreation of guests and such games as croquet may be played. The recreational area is to be lighted in such a way that the guests will not be fatigued by glare.

The filling station will carry out the modernistic architectural design. It will have a canopy with a 20-inch overhang and rounded corners. The filling station area will be flooded with mercury vapor or sodium lights, said to be the first of their kind in the Medford district. A large block-letter Texaco sign atop the canopy will be lighted by the converging beams from four spotlights.

The large frame house already on the property will be modernized in keeping with the general architectural scheme and used as a residence by the owners. The whole property was purchased from Sylvester Case. It has a frontage of 200 feet along the Pacific highway and 300 feet along Barnett road.

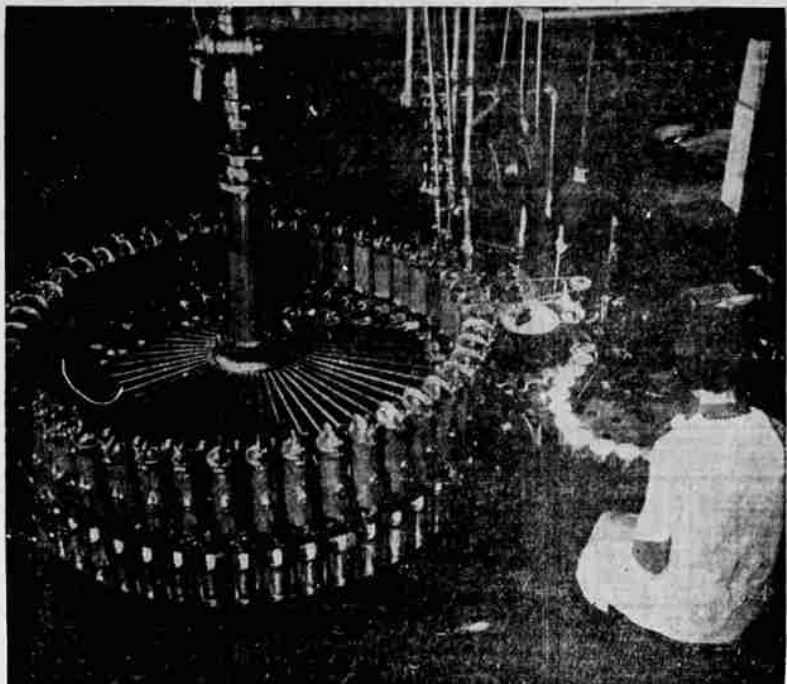

George Holmes of Eagle Point is supervising contractor. Owners of the development are Dr. A. J. Loeffler and W. F. Barrett. Associated with them as manager of the filling station is Guy A. Cowher of Tyrone, Pa.

A novel story lies behind the project. It was related by Mr. Barrett as follows:

Dr. Loeffler was a prominent physician in Detroit, staff surgeon at two of the city's large hospitals. Some time ago Dr. Loeffler came to Oregon to visit relatives in Florence. On the way out and back he stayed occasionally at tourist camps and was impressed by their shortcomings in conveniences and modernity. While here he became favorably impressed with the west coast's congenial climate, majestic grandeur and outdoor recreational facilities.

After returning to Detroit he dwelled upon the desirable attributes of life here and the possibilities of cutting loose from his profession to establish a modern tourist center. Project Evolved.
Dr. Loeffler consulted Mr. Barrett, a friend of long standing and an executive with the Chrysler corporation. Together they evolved the plan that has materialized into the present project.
Dr. Loeffler got in contact with Mr. Cowher, a mutual friend who then

One Step in Production of Borden's Milk

FILLER, where ingenious filling nipple allows milk to flow into can through small hole in bottom of can while air rushes out. A jet of steam spurts across filler hole, solder bar and solder iron drop just one drop of solder over filling hole and cans are conveyed to

was Pontiac agent in Tyrone, Pa. The two of them came out here last June and after making a survey up and down the coast chose Medford as the best place to live and the most opportune locality to conduct a modern tourist camp successful.

Dr. Loeffler brought his wife and three children out here and with Mr. Barrett they are living in the large residence on the property they bought. The children are attending Medford schools, Robert, 16, being a senior and Grace, 15, a sophomore at the high school. Mary Ellen, 10, is attending Lincoln school.

New Ashland Camp.
ASHLAND, Nov. 5.—(Sp.)—William Hubbard of Los Angeles has completed negotiations for the purchase of the Emil Peil property on Siskiyou boulevard between the Community hospital and the old greenhouse. He plans to erect a modern home and eight duplex apartments for the tourist trade.

The property is 138 feet wide and about 200 feet deep. It was estimated that about \$5,000 will be invested in the residence and \$15,000 in the cabin layout.
Mr. Hubbard has rented the Mickle residence at 570 Fairview, according to W. W. Robinson, who handled the real estate transaction. Before returning to Los Angeles for a brief visit, Mr. Hubbard contacted local contractors and supply dealers on the project.
Mr. Hubbard formerly resided in

Jacksonville

JACKSONVILLE, Nov. 5.—(Sp.)—A large number of Girl Scouts attended church in a body Sunday. Reverend Mallory preached an appropriate sermon. Their leader, Miss Alice Hoefs, was unable to accompany them, as she went to Klamath Falls to visit her brother, Elmer Hoefs, who was seriously injured in a shooting recently and is in the Hillside hospital there. He will be confined for at least 90 days.
