**Plenty of HOT WATER ANY TIME**  
when there's an **AUTOMATIC Electric WATER HEATER** in your home!

There are many people who do not realize the inconvenience of being without a constant supply of hot water always ready at the turn of a faucet, because they have never experienced the advantages of continuous hot water; they can not possibly realize that the long hours of hard work and the dangers of health experienced daily are unnecessary. Give them the advantages, for a single month, of automatic electric hot water and they would never willingly go back to the old uncertainty and inconvenience, particularly when they have found how inexpensive automatic electric hot water service really is under the very low special water heating rates.

Think of a supply of hot water that never fails... constant both day and night... all the hot water you need or want, for every purpose. A hot bath to pep you up for the day's work, or a soothing bath at night to induce restful sleep. Plenty of hot water for dishes three times a day. Plenty for daily washing... plenty for windows and woodwork. The luxury that has become a necessity... that is continuous hot water. Why not telephone today and learn how easy and inexpensive it can be to install an automatic hot water heater in your home.
