such bonds by including the income therefrom in the tax base.

Senator King (D-Utah) expressed concern that Morgenthau's economy proposals might not succeed.

"As long as there are public demands for federal funds," King said, "congress undoubtedly will continue to vote them, because public appropriations are the most powerful vote-getting instrument a congressman has."

Morgenthau had suggested that 1938 expenditures could be brought into line with revenue by a \$700,000,000 cut in appropriations for roads, public works, relief and agriculture.

There was no comment from most agencies handling these funds, but officials of the bureau of roads said definite commitments would prevent as large a cut in road expenditures as Morgenthau proposed, unless congress took action at the special session beginning next week.
