SPRING INFLUX DRAIN ON ALASKIAN RELIEF

JUNEAU, Alaska.—(AP)—Spring has brought Alaska an influx of destitute persons from the states seeking their fortunes.
"The number on relief in the territory is decidedly increased by these arrivals, but there seems no way to stop them," said J. G. Rivers, member of the Alaska welfare board.

SAWMILL IS MADE INTO PULP PLANT

BOGALUSA, La.—(AP)—The Great Southern Lumber company's sawmill, once rated greatest in the world, has out its last log, but Bogalusa has no fear of becoming a ghost town. The vast supply of virgin pine from which the mill averaged more than 700,000 feet of lumber a day for years is all gone now but where it stood are 300,000 acres of planted pines. These pines not suitable for lumber, are ideal for pulp and paper making.

MEEK, SILENT DIZZY NURSES AILING ARM IN CUB DUGOUT

NEW YORK, May 19.—(AP)—A surprisingly meek and silent Dizzy Dean is awaiting the first test of his ailing arm and no one, not even Manager Charley Grimm, knows when the Cubs' costly hurler will return to action. Although it hurts, "Banjo Charley" is following the doctor's orders to the letter.
"Dean has been told to do no more pitching for a couple more weeks, and he may not go then if he doesn't look all right when I begin to let him throw a few days before the deadline," said Grimm yesterday.
A loud and steady talker in his visits here with the St. Louis Cardinals, Dean sits quietly in one corner of the Cub dugout.
Once he would comment on anything from the bat boy to the league president. Now Dizzy says, "Anything Grimm says is okay with me. My arm feels pretty good and I'm ready to go in there and pitch the minute Grimm says the word."

VANITY BLAMED FOR BALD PATES

ST. LOUIS.—(UP)—Vanity is responsible to a great extent for the number of baldheaded men in civilized countries, according to a thesis submitted to the Washington school of medicine.
If men would adopt the type of hair grooming affected by savages they would not lose their hair, the thesis contended. The best style—from a preservation viewpoint—is one resembling an inverted soup-bowl, "hill-billy" effect, and yet the natural pattern of growth.
The worst style, for both men and women, is the pompadour.
William H. Carr, a barber, submitted the report to the school after nine years of study of thousands of heads of hair.
Carr said the common method of parting the hair and then brushing parts of it back either at an angle or in pompadour fashion forces the hair on the top and front of the head to lie in reverse, creating irritation. Nature then cuts off the blood supply and the hair falls out. Women are affected the same way, but when a woman's hairline recedes to the point where her forehead appears too high, she pulls the hair forward, dipping it to hide the exposure. Unknowingly, she discontinues the violation of nature.

CANADA RUSHES HIGHWAY WORK

OTTAWA.—(UP)—With an eye to the promotion of Canada's ever-increasing tourist trade, amounting to millions of dollars annually, work is being rushed to completion on an important western link in the scenic highway that is soon to span the country from coast to coast.
The link in question, known as the "Big Bend" highway, follows the great northern bend of the Columbia river, skirting the north spur of the Selkirk range and connecting the towns of Golden and Revelstoke in British Columbia. This is the last section to be completed in the western portion of the trans-Canada highway.
The only other substantial stretch awaiting completion will connect northern Ontario with Manitoba via the north shore of Lake Superior. It is little realized outside of Canada that it is not yet possible to drive a car from east to west without making a detour south of Lakes Huron and Superior through the United States. However, work on this area is also in progress.
When completed, the highway will stretch from Halifax on the Atlantic to Vancouver on the Pacific, a distance of 3,500 miles, following always the most picturesque route practicable.

FLAX PEST COMBATED

SALMON (UP)—Oregon experiment station has discovered that the most practical control for the flax worm is a planting program whereby the flax crop follows a cultivated crop. Entomologists said the worst damage is found when a flax crop follows a legume crop.
Edward Wahley and William Coffe, two of the signers of the death warrant of Charles I in 1649, escaped to Massachusetts at the Restoration.
