

DAM WILL ERASE FRONTIER TOWN; RESORT TO RISE

SHERIDAN, S.D. — (UP) — Sixty-one years ago Judge Granville B. Bennett tossed his saddlebags on the floor of a log cabin here, peered around the room, and told the assembled frontiersmen that the first district court in the Black Hills was convened.

Next year, though, Judge Bennett's courtroom will be under 30 feet of water—and so will the rest of Sheridan.

Once it was the county seat of Pennington county; once it was the location of the United States land office; once it was the headquarters for South Dakota miners; and once it was the town where men came simply to spend money. It was a true boom town.

But now the Rapid City-Hill City Isaak Walton league and the Harney national forest have made all necessary arrangements, and Sheridan is going to be flooded.

A dam site to flood the entire valley has been located in the national forest. The forest service will build the dam. Arrangements are being made to buy the land which will be flooded, and more than 180 acres have already been purchased. Options have been obtained on the majority of the unpurchased land.

The lake created by the dam will fill the entire valley, covering nearly 400 acres to an average depth of 60 feet. It will be fitted with Spring creek, Horse creek and other small streams, draining a territory of 150 square miles.

The Isaak Walton league plans to develop a resort around the lake. Present plans call for construction of a lodge, leasing summer home sites, and installing facilities for all kinds of water sports.

QUICK FREEZING FAILS TO STEM VIGOR OF GERMS

By Howard W. Blakeslee (AP Science Editor)

NEW YORK—Some new quick-freezing experiments with germs at Rockefeller Institute show that the intense cold of interstellar space is probably not one of the barriers against germs reaching the earth from elsewhere in the universe.

No scientist now thinks bacteria comes from space. But it has been discussed seriously.

At Rockefeller Institute Thomas B. Turner, M.D., froze disease organisms in solid carbon dioxide. The cold was more than 100 below zero.

Syphilis germs were kept at that temperature a year. When thawed out, they were just as virulent as ever. The viruses of human flu and yellow fever endured six months of this intense cold. Afterward they were still as lively as before.

Apparently the quick-freezing had something to do with this preservation of life. For in less intense cold these and other organisms were mostly destroyed.

Dr. Turner's experiments are made in search for an improved method of preserving disease organisms for scientific experiments. Under natural conditions they usually die when removed from their "hosts," the tissues which they attack.

BOMBER MAY FOREGO FIGHTING THIS YEAR

NEW YORK, July 1.—(AP)—Promoter Mike Jacobs today said he was open minded concerning a heavyweight championship match in September between Joe Louis and Max Baer.

Commenting on reports from Chicago, quoting Julian Black, co-manager of the negro heavyweight champion, that Louis needed a rest and wanted to forego the September match, Promoter Jacobs said:

"I'm open minded on it. Louis has been working quite hard and I would not blame him for not wanting to fight again this year. However, after he rests a month, he may get restless and desire to take Baer on for a title fight."

11-POUND SON ARRIVES FOR 'MAN MOUNTAIN'

LOS ANGELES, July 1.—(AP)—Man Mountain Dean was 317 pounds of proud father today.

A telegram informed the bearded hillbilly wrestler that his wife had presented him with an 11-pound son yesterday on his 47th birthday.

The birth took place on the Dean farm at Norcross, Ga., which Man Mountain left some weeks ago to play a part in a Joe E. Brown movie and resume his mat career.

Closing time for Too Late to Clarity Ads is 1:30 p. m.

Women Reduce This Safe Way
