selling in industrial tipped over the stock market today after heavy forenoon buying of rails and utilities had touched off one of the sharpest upwings of the recent recovery.
 Purchasing orders from all parts of the country and abroad piled up overnight in brokerage offices and, for 53 minutes after the opening, the ticker tape was as much as 7 minutes behind. Blocks of 1,000 to 10,000 shares changed hands on the resumption of the upturn with gains ranging from 1 to more than 3 points. The new stock exchange "flash" system was again put into use for a while to bring instantaneous quotations of leaders to boardrooms. Transfers were around 2,700,000 shares.

WOMAN ARRESTED ON THEFT COUNT
 Mrs. Aldis Lindsey, 53, a housekeeper who has worked in several Medford homes, was being held in county jail this afternoon on a charge of larceny. She was to be arraigned in justice court either late today or tomorrow morning.
 City police arrested the woman last night after having her paged from a local theatre, and after Mrs. L. F. Buckingham of 236 South Central avenue reported that she had discovered two diamond rings, miscellaneous other jewelry and several articles of clothing were missing from her home. Police said they recovered the stolen articles from the Floyd Hart residence, where Mrs. Lindsey was employed as a housekeeper.
 Mrs. Buckingham, who signed the complaint charging Mrs. Lindsey

Pleads Innocent On Drunk Flying Count
 SANTA ANA, Calif., July 7.—(AP)—Sidney DeForest Holland, 40, mechanic and aviator, arrested Sunday after residents complained of a stunt flying airplane, pleaded innocent today to felony charges of drunk flying.
 It was the first prosecution on record in Orange county for the offense, which on conviction carries a one to five-year penitentiary term.

NOW Christmas Trees work the year 'round

THEY SET the river on fire—actually—the day in 1804 when they brought in the first American oil gusher. A boring in a salt well on the land of a Kentuckian named Lemuel Stockton suddenly became a geyser of oil which spewed thousands of barrels of crude into the Cumberland River. Something—perhaps lightning—set the oil afire and the river burned for forty miles—a river of flame.

But gushers aren't being done any more. At the first sign of production a Christmas Tree is clapped on a well. This is a complicated system of pipes and valves—called a Christmas Tree because of its general shape and many branches—designed to control pressure.

Not only does this control prevent waste and danger of fire, but it conserves the natural forces which lift oil from the depths to the surface of the earth. Nature's mighty hand is thereby induced to exert over a long period energy which otherwise would be exhausted in one prodigal outburst.

The longer a well can be induced to retain its natural flow, the longer the period before it must be put "on the pump," the less the production cost of crude and the less the price at which gasoline can be provided to the motorist.
