## Shelley-Rogers Wedding Rites Held Sunday

On Sunday, July 10 at 8 o'clock in the morning at a pretty wedding held in the First Baptist church in this city. Miss Velma I. Shelley, daughter of Mrs. J. E. Randles of 830 West Twelfth street, became the bride of Mr. Lucius O. Rogers, son of Mr. and Mrs. Oliver Rogers of 519 Crater Lake avenue. The Rev. Wolford A. Dawes officiated with the ring service.

The bride was lovely in a gown of white lace over taffeta with matching accessories and an orchid corsage.

Miss Verna Shelley, sister of the bride, was bridesmaid and was becomingly gowned in a dress of blue chiffon and wore a corsage of gardenias.

Mr. Martin B. Webb Jr., acted as best man for Mr. Rogers.

Following the early morning ceremony, Mr. and Mrs. Rogers departed for Grants Pass where they were breakfast guests of the bride's father at his home on the Redwood highway. Leaving immediately after the breakfast, the couple went by motor for a wedding trip north, their destination to be Vancouver, B. C.

Guests at the wedding included Mr. and Mrs. J. E. Randles, Mr. and Mrs. Oliver Rogers, the groom's sister, Miss Dorothy Rogers, and the Misses Martha and Kathryn Shelley, sisters of the bride.

Both Mr. and Mrs. Rogers are graduates of Medford high school where

they were popular members of the school set. Mr. Rogers later graduated from the Henthill Deuel school in Seattle. He is now associated with Shell Oil company in this city.

The couple will be at home to their many friends in Medford in about a week.

## LeClerc Write Of Interesting Honolulu Sojourn

Very interesting missives recently received from Mr. and Mrs. Howard LeClerc relate events of their Honolulu sojourn. The couple left their Medford home last month for a cruise on the Lurline.

Upon arriving in the islands they were met at the boat by Dan Watson and Cliff Lord, both former Medford residents, and presented with the traditional flowered lei.

The couple were house guests for several days of the Watsons but are now located in an attractive beach house of their own. They have been invited to many pleasant social affairs and participate in the daily surf swimming, golf and other sports offered.

Mrs. LeClerc wrote of the recent rain storm which was the most severe since 1905. She said that over an inch of rain fell in one hour. Later in the day, she and Mr. LeClerc journeyed out to a golf course for a game only to find it completely submerged.

The vacationists wrote of visiting Punahou, the oldest private school on the islands. It was founded by the early missionaries. At this school a hedge surrounds an area of three blocks of school grounds and is of blooming cerise, an exquisite flower which blooms only once a year and only at night. This is one of the most popular visiting places for tourists and cars are usually parked three deep to view the hedge.

One evening Mrs. LeClerc attended a Zonta club dinner which was an enjoyable affair.

The LeClerc seem to be very much impressed with the beauties of the tropical city and are contacting many former Medford people there. They recently spent a day visiting with F. K. (Bud) Deuel of this city, who arrived in Honolulu last week. Mr. Deuel was to have returned to Medford next week but may sojourn there for several weeks more. The LeClerc will remain there for several months.

Word has not yet been received here regarding the winner of the contest in Stockton held there Saturday.

## The Professor's right—always something's new

THE BARKER before the sideshow curtain cries "Something new—something different." But you don't need to go to the circus to find many things which fit that description—and often where you least expect them.

People often think of a seasoned institution like the Standard Oil Company of California as something complete—as unchanging as a pyramid. Actually it is always "something new, something different"—something being rebuilt every day.

Someone invents a way of loading tankers at sea and a pipeline—once the pride of the Company—must be abandoned for a newer, shorter, more economical line. An improvement in methods of making gasoline is devised and refineries must be made over completely.

These are simple, obvious, frequently duplicated examples of the internal re-creation which must go on all the time in this Company—with its management as both architects and craftsmen.

Because no function of Standard Oil ever stops changing, the problems of management are often tremendous, requiring intimate and expert knowledge. In Standard Oil, every officer, every director, every executive is an oil man. These twin facts definitely make the contributions of management greater than in many institutions of corresponding scope.
