

BOTANISTS FIND RARE PLANT ON MOUNT ASHLAND

BIO APPLIGATE, Aug. 12.—(Spl.) Coming to Mt. Ashland in search of a rare plant, Horkella, member of the strawberry family, David D. Keck of the botany department of Stanford university, Palo Alto, found an abundance of the plants when he visited the peak a few days ago. The plant does not have berries, and grows only in the Ashland peak zone. Mr. Keck's success in getting the plant makes the third time it has been collected, the first being in 1880 by a Mr. Henderson of Mt. Ashland, and again in 1910. He was accompanied by Mr. and Mrs. G. Gustafson of Sweden, students at Stanford.

Another group collecting unusual specimens from the mountain tops included Preston E. Hotz of Sonoma, Cal., and Bernard B. Colley of Palo Alto, both of the U. S. geological survey, who were searching for chromite deposits in the Anderson Butte vicinity. They also visited Dutchman's peak, where they collected numerous rocks, being accompanied there by Francis Wilk of Washington, D. C. Robert Dowell, lookout at Dutchman, reports 19 visitors there Sunday. Other visitors at Anderson Butte Sunday were Sydney Erisogow, Jr. of Central Point, James C. McDowell of Talent and A. W. and Pearl Stevens of Medford.

Additional guests of All J. Sandoe at Mt. Ashland from far sections of the nation were Lena Luthie of Detroit, Kans., and Harold Stacey of Wakefield, Kans., who were accompanied by Lloyd and Ruth Wooten and Dorris Stella of Talent; Mr. and Mrs. J. E. Spangler and daughter Kathleen of Seattle, who were with Mr. and Mrs. Wm. Hammett of Medford; D. L. Heston of Powell, Wyo.; Ada Ross of Chicago, Mrs. H. D. Lemken of Peoria, Ill., and Nora Ross of Decatur, Ill. Mt. Ashland had 72 visitors Sunday, with a total of 174 since July 29. Amelia Hayes of Topeka, Cal., accompanied by Mr. and Mrs. W. P. Brooks and Beverly Brooks of Medford, also visited Mt. Ashland Sunday.

Dinner guests of Herbert Pennings at Wagner Butte on several occasions were Charles Dunford, Maldon LeRoy and Lee Jody of Little Applegate, Mrs. Irene Harris and daughter Marjory and son Wayne and Joe Buel of Yreka and Bob Thorn of San Diego. Those enjoying a picnic with Bob Ottoman at Wagner Gap guard station Sunday were Prentice Petty, Wm. Myers, Jeanette Trill, Ruth LeClerc and Betty Wilfley of Medford. Additional guests were Mr. and Mrs. Clem Childers and Dr. E. Giffin of Medford, Carl Anderson of Long Beach and Don Lowe of Ashland.

Visitors of John Harr at Perk's Pasture were Mr. and Mrs. George Shaffer of Ashland and Mr. and Mrs. George Buckley of Ruch. Robert Webb is spending several days at the lookout, instructing the newer men in their work. Miss Florence Clifford of Jacksonville was among visitors at Tallowbox Sunday, where John Byrne is stationed.

CORN DRYING MAY BOOST INDUSTRY ON OREGON FARMS

CORVALLIS, — (Spl.) Field corn drying in Oregon has now been worked out on a practical basis so that excess moisture may be removed from either ear corn or shelled corn before storage, according to a research report by F. E. Price and Ivan Branton, agricultural engineers, which has just been published in bulletin form by the Oregon experiment station. Oregon's corn production is inadequate to supply the demands for livestock and poultry feed in the state, the authors point out. Imports from other states or foreign countries now approximate 1,000 carloads annually. Although good yields have been produced in various sections of Oregon, particularly in Malheur county in the east and Willamette valley in the west, high moisture content, followed by humid winters has served to retard development of the industry.

What corn has been produced in Oregon has largely been used on the farms producing it, or sold locally, as less than one percent of the corn inspected in Portland was from Oregon counties. At present, approximately 93 percent of the corn grown in Oregon is produced in the region

west of the Cascade mountains. Humid winter weather, rather than excessive moisture at harvest time, is the chief hindrance to corn storage in Oregon, the O.E.C. men found. In the middle west, corn is nearly as damp at harvest time, but colder winter weather makes crib storage possible. Various types of ear corn driers are discussed in the bulletin, including both natural and forced draft driers. The Oregon experiment station ear corn drier has forced draft and will handle approximately three tons of dry shelled corn per day.

Valuable Paintings Stolen In England

LONDON, Aug. 12.—(P)—A painting value at \$50,000 by Sir Joshua Reynolds was stolen from a politician-peer's country estate in England's second big art robbery within four months, it was disclosed today. Thieves early Wednesday broke into the Sussex home of the Earl of Winton. They took Reynolds' oil painting of Edward, first earl of Winton, by removing it from its frame. They also stole a miniature oil painting described as "extremely valuable," and a quantity of jewelry.

Priests Drown
MICHIGAN CITY, Ind., Aug. 12.—(UP)—Two Catholic priests, the Rev. Norman Richards, 35, Cleveland, and Roland Emoyot, 35, Chicago, drowned in Lake Michigan today. The Rev. Richards became exhausted while swimming and his companion attempted to rescue him.
