KIDNEYS MUST REMOVE EXCESS ACIDS

Help 15 Miles of Kidney Tubes Flush Out Poisonous Waste. If you have an excess of acid waste in your blood, your 15 miles of kidney tubes may be over-worked. These tiny filters and tubes are working day and night to help Nature rid your system of poisonous waste.

When functional kidney disorder permits poisonous matter to remain in the blood, you won't feel well. This may cause nagging headache, rheumatic pains, leg pains, loss of pep and energy, getting up nights, swelling, puffiness under the eyes, headaches and dizziness. If you have trouble with frequent or scanty passages with burning and itching, there may be something wrong with your kidneys or bladder.

Kidneys may need help the same as bowels, so ask your druggist for Deane's Pills, used successfully by millions for over 40 years. They give happy relief and will help the 15 miles of kidney tubes flush out poisonous waste from your blood. Get Deane's Pills.
