

ARMS LIMIT AND ECONOMIC PEACE HELD WORLD NEED

WASHINGTON, Oct. 4.—(AP)—The state department watched today for reaction from abroad to Undersecretary Sumner Welles' declaration arms limitation and world economic reconstruction are needed for international stability.

In a broadcast address, Welles said last night these were "the great underlying needs of today, the solution of which becomes daily more necessary."

Together with arms limitation and economic peace, Welles said, there should be "a world-wide agreement to cease for all time attacks on civilian populations by air-bombing and by sea."

The undersecretary of state gave no hint whether this statement was in considering taking the initiative in calling conferences on these subjects.

He said, however, that "today, perhaps more than at any time during the past two decades, there is presented the opportunity for the establishment by the nations of the world of a new world order based upon justice and upon law."

He added peace could come only from observance of the pledged word, from non-intervention in the internal affairs of other countries, from the settlement of disputes and the revision of treaties by peaceful negotiation, and from respect for the just rights of others.

"If on such a basis as this," he said, "there should now be brought to pass the solution of all of those tragic controversies which still fester in Europe and in the far east, and thereby make less probable the outbreak of new controversies in the future, the agony of spirit which countless men and women have suffered during these past few years will not have been in vain."

Welles, who spoke on the Washington Evening Star radio forum, also gave the story of President Roosevelt's appeals for peace during the German-Czechoslovakian crisis.

GERMANY VISIONS PROSPERITY, WITH WAR SCARE ENDED

BERLIN, Oct. 4.—(AP)—Hopes are high among Berlin political and economic theorists the world may look forward to an upsurge of prosperity now the war scare has dwindled.

The war the Munich four-power accord on peace restored confidence among European nations.

Germany will profit from the industries and raw materials received by absorption of Czechoslovakia.

The nation already has begun to link the newly acquired industries with the German four-year plan for economic independence.

Other nations, too, can benefit, the Germans say. They believe the way is open to settlement of questions among colonies, world monies and international indebtedness.

Germany's first task is working out ways to diminish unemployment and put the Sudetenland industries, mining, porcelain, shoes, munitions, to work.

The full machinery in the approximately 20,000 square miles of territory likely will get under way soon after final determination of the new boundaries.

One prospect is some sort of German-Czechoslovak trade affiliation. German trade experts express a desire to start soon financial negotiations with Czechoslovakia, particularly on the conversion of Czechoslovak money in Sudetenland into German currency.

COMMANDER RUSS FAR EAST ARMY CAN'T BE LOCATED

MOSCOW, Oct. 4.—(AP)—The whereabouts of Marshal Vasily K. Blucher, commander-in-chief of the far eastern army, is mystifying foreign circles here.

Reports are circulating in Moscow according to which he is variously reported transferred, demoted and even arrested. There has been no official confirmation of any of these reports.

There is one definite fact at the bottom of the rumors, however, and that is that Blucher's name has not been mentioned in the Soviet press for several weeks, although much has been printed about the far eastern army.

Even at the recent Khabarovsk conference of political commissars, who fighters who participated in the Changkufeng "nest pocket" war were praised, Blucher's name was not mentioned even though he was supposed to have been in command of the army which opposed the Japanese.

Meanwhile, Pravda and Izvestia, organs of the Communist party and the Soviet government respectively, both repudiated reports said to be circulating abroad Soviet Russia had concluded the Munich four-power accord.

They said Soviet ambassadors in London and Paris actually were not consulted by the British and French governments and Russia had no part in the agreement, which Pravda described as "a capitulation, not an agreement."
