

LINDBERGH IS TERMED 'RUFFIAN SPY' IN TALK BY SOVIET COMMISSAR

MOSCOW, Nov. 7.—(AP)—Vyacheslav Molotov, chairman of the Council of People's Commissars, last night called Col. Charles A. Lindbergh a "ruffian spy."

He referred casually to the American as a celebration of the 21st anniversary of the Bolshevik revolution, changing capitalist countries presently were sending spies to the U. S. S. R.

This was the second Soviet attack on Colonel Lindbergh within a month. On October 10, a statement signed by 11 Russian airmen accused him of minimizing Soviet air strength to give British Prime Minister Chamberlain arguments for making the Munich peace instead of defending Czechoslovakia.

The statement, published in Pravda, communist party organ, called Lindbergh a "stupid liar, a lackey and a flatterer of German fascists."

It grew out of unverified reports published in two London newspapers that Colonel Lindbergh, who recently inspected the aviation industries of Russia and Germany, had belittled Soviet air prowess.

The newspapers were the Communist "Daily Worker" and the Leftist "The Week." Colonel Lindbergh has remained silent on the reports and Soviet attacks.

4-H CORN SHOW SET NOVEMBER 17-19 IN LOBBY OF U. S. BANK

The second annual Jackson county 4-H club corn show sponsored by the Medford branch of the United States National bank will be held in the lobby of the bank November 17, 18 and 19. Corn entries from boys of Brownboro, Little Butte, Central Point, Table Rock, Applegate and Oak Grove will be on exhibit. Considerable corn improvement work is being done by the Jackson county boys in cooperation with the bank. Several hybrid varieties, as well as leading varieties of other localities were tried out this year, using local strains of Minnesota No. 19 and Early Alberta as checks. Further work with varieties, fertilizers and cultivation practices is being planned for next year, according to C. D. Conrad, county club agent. Corn is an important farm crop in Jackson county for providing local feed for livestock and poultry and fits well into most rotation practices as a method of weed control and through root cultivation. Characteristics being looked for in varieties suitable for the local climatic conditions are early maturity, even maturity, high yield, and ability to withstand dry weather conditions.
