2342 STUDENTS NOW ENROLLED IN PUBLIC SCHOOLS

Figure Reveals Slight Drop From Same Time Last Year; Increase Due When Fruit Harvest Finished

Second-week enrollment figures released today by the city school superintendent's office revealed that 2,342 students were attending classes in Medford's six public institutions. The figure is slightly lower than at the corresponding period last year, but it was stated that an accurate stabilized enrollment total couldn't be determined until completion of the fruit season, releasing many students to return to their schools.

Many Students Working

E. H. Hedrick, superintendent, explained that it would be at least a month before a comprehensive comparative enrollment figure could be produced. He said that older students working in the fruit were encouraged to continue until their jobs were completed, and that a decided rise in enrollment would occur when the fruit harvest was finished.

By schools, the enrollment of this year and last year for the second week is as follows:

Grade schools:	1939	1938
Washington	307	349
Roosevelt	298	310
Jackson	242	289
Lincoln	210	255
Total grade	1055	1200
Senior high	582	620
Junior high	705	714
Grand total	2342	2534

Violent" and resulting in destruction of some roads leading to Saarbruecken from the French positions.

Slow Advance

Advancing French troops which have been feeling their way slowly eastward reported forces from both sides were obliged to fall back at times during both infantry and artillery actions.

Heavy fighting was reported near Hornbach as the French troops pushed eastward in an attempted encircling movement.

Rain Hampered Operations

Along the 100-mile front between the Moselle and Rhine rivers, but military dispatches spoke of "substantial" gains.

British Not In Line

The French government declared officially there were "several hundred thousand" British troops in France. Officials said, however, the British had not yet engaged in action, pointing out that it would take some time to concentrate supplies and dispose the units along the front.

French officials contrasted the appearance of the new troops with what they described as "the handful of heroes" who were thrown into the breach in the early days of the World war, in an effort to stem the German advance from Belgium.

Saarbruecken is located midway on the front not far from the French border.

German reinforcements were reported pouring into the area behind Saarbruecken and opposite the French city of Straubourg in northeastern France.

DOOM OF LWOW SEALED BY LONG AERIAL BOMBING

(Continued from Page One)

when the enemy planes flew over so low I could almost count the rivets in their fuselages.

Hotels of Lwow were crowded, mostly with staff officers. Most cars now being used were to take officers' families to the frontier.

The hotels are serving one-plate meals because of a shortage of supplies. Hard liquor is not permitted anywhere in Poland because it has been turned over to the military for medical use.

Newspapers are limited to one sheet printed on both sides.

Terror In Country

Terror is almost as great in the countryside as in the cities. Observers charged that German planes make constant attacks, not only on lines of fleeing refugees, but also on small villages which have no anti-aircraft protection or long-range guns.

Everywhere I go I hear criticism from the man in the street of the Poles' leadership and examples of alleged lack of preparation. For instance, a woman medical expert from Warsaw told me the first trainload of wounded was sidetracked for a full hour before any of the seriously wounded and dying men received any attention.

The Lwow radio is constantly broadcasting appeals to citizens capable of bearing arms not to leave, as "a definite defense will be made." Nevertheless, refugees have been pouring out of the city in a steady stream since the first bombardment September 1, many of them of military age.

Center Defense At Border

Most of the Polish air force—or what remains of it—has been stationed near the Rumanian frontier in the hope of fighting off German attempts to smash Poland's lifeline railway bringing oil and other supplies from Rumania.

But it is a good bet German files could spot the Polish planes for bomb attacks and, before you read this, that may have happened.

German bombers, ever as I write this, are raining explosives on the oil and alcohol refineries. The table quivers under my hand as the earth trembles. Outside there is the din

of sirens, anti-aircraft batteries and the thunder of bombardment on the edge of the city.

The Germans are using shrapnel bombs. I am told, and also some sort of concussion bombs. One of the latter dropped into a three-story building. The building collapsed as though the mortar had been pulled out from between the bricks.
