Drive right ahead— it's DOLLARS at work

ESPECIALLY WHEN it's a nest-egg, money is one thing which doesn't hatch when sat upon. This does not detract from the praiseworthy qualities of nest-eggs. Yet it's one reason why the dollars employed by this Company are such useful citizens of a thousand western communities.

The dollar you spend at a service station goes to work as fast as the gasoline you buy. It starts in paying the station salesman, the tank-truck drivers who brought the gasoline, the refinery men who made it, the oil field workers who brought in the crude. And that's only the start.

In equal measure, those dollars distributed as earnings become immediately pay-roll. Economists agree that almost everybody is willing to spend earnings when he wouldn't touch savings. When it comes to staying in circulation, earnings are just the type.

For this family they mean a new bathroom, for that family a range or radio, for the next family new outfits for the children—the sort of expenditures with grocer and merchant, carpenter and dressmaker, which make every community appreciate working dollars—the kind that make the mare go.

You can tell a lot about a cigarette by whether it burns fast or slowly. Camel cigarettes are noted for their long burning. In fact, they burned longer, slower than any other brand tested, in recent scientific studies. Van Campen Heilner, the famous American authority on wild game, points out an interesting angle to this. "Camels give more smoking because those choice tobaccos burn so slowly," he says. "And I think the way they burn is a good way to judge the quality of cigarettes too. I can smoke them steadily and they still taste smooth and cool, and my mouth feels fresh—and there's no throat irritation. Camels are mild, flavory. They give more pleasure per puff—and more puffs per pack." Get extra smoking per pack—topped off with the delicate taste of choice tobaccos. Smoke Camels!
